Volume 28, Number 16

November 2008

Contents

Special Issue: Selected Papers from the 10th Conference on Process Integration, Modelling and Optimisation for Energy Saving and Pollution Reduction – PRES2007

Editorial

J. KLEMEŠ and S. PIERUCCI 2005 Emission reduction by process intensification, integration, P-Graphs, micro CHP, heat pumps and advanced case studies

Regular papers

D. REAY 2011 The role of process intensification in cutting greenhouse gas emissions

P. VARBANOV and F. FRIEDLER 2020 P-graph methodology for cost-effective reduction of carbon emissions involving fuel cell combined cycles

J. HETLAND and T. CHRISTENSEN 2030 Assessment of a fully integrated SARGAS process operating on coal with near zero emissions

V. KUHN, J. KLEMEŠ and I. BULATOV 2039 MicroCHP: Overview of selected technologies, products and field test results

B. THOMAS 2049 Benchmark testing of Micro-CHP units

J. MATICS and G. KROST 2055 Micro combined heat and power home supply: Prospective and adaptive management achieved by computational intelligence techniques

C. WEMHOENER, T. AFJEI and R. DOTT 2062 IEA HPP Annex 28 – standardised testing and seasonal performance calculation for multifunctional heat pump systems

C. KEIL, S. PLURA, M. RADSPIELER and C. SCHWEIGLER 2070 Application of customized absorption heat pumps for utilization of low-grade heat sources

K. OCHSNER 2077 Carbon dioxide heat pipe in conjunction with a ground source heat pump (GSHP)

L. HOUDKOVÁ, J. BORÁŇ, V. UCEKAJ, T. ELSÄBER and P. STEHLÍK 2083 Thermal processing of sewage sludge – II

D. C. Y. FOO, Y. H. CHEW and C. T. LEE 2089 Minimum units targeting and network evolution for batch heat exchanger network

E. AXELSSON, M. R. OLSSON and T. BERNTSSON 2100 Opportunities for process-integrated evaporation in a hardwood pulp mill and comparison with a softwood model mill study
