stochastic
processes
and their
applications

Volume 117, Issue 5, May 2007

CONTENTS

W. Kager, Reflected Brownian motion in generic triangles and wedges 539

F. Baudoin and L. Coutin, Operators associated with a stochastic differential equation driven by fractional Brownian motions 550

J.-D. Deuschel and T. Nishikawa, The dynamic of entropic repulsion 575

M. Flury, Large deviations and phase transition for random walks in random nonnegative potentials 596

F. Confortola, Dissipative backward stochastic differential equations with locally Lipschitz nonlinearity 613

D. DeBlassie and R. Smits, The influence of a power law drift on the exit time of Brownian motion from a half-line 629

I. Bentahar and B. Bouchard, Explicit characterization of the super-replication strategy in financial markets with partial transaction costs 655

Acknowledgement

P. Protter and M.E. Vares, Acknowledgement to referees 673
