## Construction engineering

ARTICLE

Ireim Dikmen and M. Talat Birgonul 58-68

## Engineering materials

ARTICLE

V.K.R. Kodur and R. McGrath 93-102

## Hydrotechnical engineering

ARTICLES

Jie Yang, Ronald D. Townsend, and Bahram Daneshfar 19-28

M. Gunal and A. Guven 41-48

Muhammad Ashiq, John C. Doering, and Takashi Hosoda 69-80

Soleyman Emami and Anton J. Schleiss 81-92

## Structural engineering

ARTICLES

M.A. Youssef, M.H. El Naggar, and M. Ahmed 10-18

J.H. Lin 49-57

## Ingénierie de la construction

ARTICLE

An analytic hierarchy process based model for risk and opportunity assessment of international construction projects

## Matériaux d'ingénierie

ARTICLE

Effect of silica fume and lateral confinement on fire endurance of high strength concrete columns

## Hydraulique

ARTICLES

Applying the HEC-RAS model and GIS techniques in river network floodplain delineation

Prediction of flow patterns in scoured beds caused by submerged horizontal jets

Bed-load transport model based on fractional size distribution

Design of erosion protection at diversion tunnel outlets with concrete prisms

## Ingénierie des structures

ARTICLES

Monotonic and cyclic load behaviour of helical pile connectors in the vertical direction

Response of a bridge to a moving vehicle load
