Contents

PREFACE.....	9
SECTION 1. INTELLIGENT SUSPENSION SYSTEMS.....	11
Intelligent Suspension System for Commercial Vehicles — E. Göhring, E.-C. von Glasner, R. Povel and P. Schützner	13
The Analysis of Mechanical Systems with Nonlinear Hydraulic Damper — Assoc. Prof. J. Mandak	27
Different Strategies for Anti Skidding Active Control — P. Marino, S. Meo, M. Scarano	35
Improvement of Performances of a Passive Absorber using Active Hydraulic Actuators — A. Albarrazin, R. Bouc and A. Roure.....	47
Bond Graphs for Nonlinear Modelling of an Electro-Hydraulic System — G.R. Dunlop and S.P. Hampson.....	57
Modélisation de suspensions semi-actives — M. Grima and C. Renou.....	69
La suspension CRONE : une suspension active d'ordre non entier optimal — X. Moreau, A. Oustaloup, M. Nouillant et B. Bluteau	77
Suspension active pour véhicules utilisant une technique d'optimisation — M. Maghraoui et M. Kazoula.....	93
Oleopneumatic Suspension with Preview Semi-Active Control Law — V. Roberti, B. Ouyahia and A. Devallet	107
SECTION 2. ACTIVE NOISE CONTROL	115
Experimental Approach for the Application and Optimisation of Vibro-Acoustic Active Control — C. Chassignon, B. Bouizem, J. C. Henrio, G. Vipperman, P. R. Wagstaff.....	117

Optimal Active Noise Vibration Control using a Combined FEM/BEM — S. Dedieu, M. A. Hamdi, G. Leyrat	129	Control of Rotating Machinery Vibration using an Active Multi-Frequency Spectral Optimization Strategy — M. Maghraoui, M. L. Adams	341
Contrôle actif de modes acoustiques dans un conduit semi-ouvert — L. Moulin, M. A. Galland, M. Sunyach	141	Multivariable Control for a Flexible Rotor : a Case Study — R. M. Sales, H. P. Cumming, P. S. Pietri, F. Beti	353
Modélisation et développement d'un dispositif de contrôle actif de débits pulsés — L. Hardouin, P. Micheau, J. Tartarin, J. Laumonier	157	Étude d'une commande adaptative avec modèle de référence et application à un robot marcheur — A. Bouanani, Y. Hamam	361
Active Control of Acoustic Transmission through a Baffled Rectangular Plate using Vibrating Information — O. Lagarrigue, A. Roure	171	Control of a Flexible Structure : Effects of the Reference Signal on the Damping of the Vibration Modes — H. Hadj-Larbi, A. Barraco	371
SECTION 3. SMART MATERIALS	183	Base Parameters of Flexible Links Robots — P. Chedmail, P. Depince, F. Bennis	393
Vibration Control via Active Damping — B. Azvine, G. R. Tomlinson, R. J. Wynne, O. Sensburg	185	SECTION 6. CONTROL OF COMPLEX SYSTEMS	407
Active Damping with Piezoelectric Actuators and Robust Laws — M. N. Ichchou, M. Colet, D. Lang	197	Convergence of Algorithms for the Automatic Control of Boundary Layer Transition with a Double Suction Panel — J.-L. Rioual, P. A. Nelson, M. J. Fisher, J.-L. Dubois	408
Etude de l'intégration de transducteurs piézoélectriques en conduite — Y. Jaques, A. Khanlich, H. Gagliardini, R. Perret	205	Contribution to the Problem of Parallely Operating Valves — I. Dobias, V. Vleck	420
Improvement of Composite Dynamical and Fatigue Characteristics by use of Shape Memory Alloys — J. Grandó, M. Salvia, J.-P. Laine	225	Active Control of Stability for the Attitude Motion of a Spacecraft — I. Stroe, N. Enescu	429
Designing of a Cyclic Tensile Machine Devoted to the Study of Shape Memory Alloys used in the Smart Structures — M.-J. Bigeon, M. Morin	233	Asymptotic Stabilization of Nonlinear Lagrangian Systems without Measuring Velocities — I. V. Burkov	440
SECTION 4. ACTIVE CONTROL OF FLEXIBLE STRUCTURE	241		
Neural Network Applications for Active Structural Control — F. Casciati, L. Faravelli	243		
Predictive Control of AMD — R. Andrade, F. Lopez-Almansa, J. Rodellar	255		
Robust Active Damping with Acceleration Feedback — A. Preumont, N. Loix	269		
Active Control of an Electromagnetic Suspension System — M. Zayadine, S. Colombi	281		
On the Optimal Design of Active Vibration Control Systems — P. Kiriazov	295		
On the Compatibility of Model Representations in Control and Structural Dynamics — J. A. Brandon, K. M. Holford	303		
Active Isolation of Aeroplane Motors — P. Vannier	315		
Active Control of Flexible Mechanical Structures — A. Froment	329
