AVIATION WEEK & SPACE TECHNOLOGY

About the Cover

Computer-based modeling allows designers at Lockheed Martin Tactical Aircraft Systems to consider the entire life span of a proposal such as the Joint Strike Fighter (see p. 46). These computer graphics were developed at Lockheed Martin by Mark A. Wood, Mark A. Lauden and Steve C. Hall.

HEADLINE NEWS

EC outlines path for consolidation

Aerospace 'clusters' urged to counter U.S. giants as frustration mounts in Europe over pace

24

Hill ups NMD, caves in on B-2s

\$247.7-billion defense budget now at White House for review

25

Jet-powered car reaches Mach 0.94

Goal is first supersonic auto

28

Atlantis resupply mission bolsters Mir station

Gets new astronaut, computer, and water and supplies vital to restoring science work on the base

29

Space crews endorse Mir, but some concerns linger

Say station in good shape, safe for continued long-term habitation

32

MGS settling into Mars orbit

Increasing dynamic pressure from continued aerobraking almost fully deploys balky solar panel

33

U.K. prepares for Skynet 4 follow-on

U.K., France and Germany moving to develop military satellites

34

AIR TRANSPORT

US Airways accord sets stage for growth

After years of cutbacks, carrier will begin a global expansion—if it can finalize series of labor pacts

35

UPS pilots reject contract offer

Little chance of a strike until after Christmas season

38

New Air France chief to seek stability

Expected to strengthen state-owned carrier's profitability and its quest for global business

39

CFIT eyed in Garuda crash

Accident likely will intensify calls for addition of MSAW capability to radars at international airports

40

ICAO setting agenda for global safety

Panel forms to address common safety trends, prescribe action

42

FAA probing ATC errors at Dallas-Fort Worth

Resulted in violations of minimum separation standards, but no near-midair collision threat

42

Northwest, KLM extend global alliance

Meanwhile, American Airlines and British Airways face continuing hurdles in forming partnership

43

Berlin OKs new international facility, airport privatization

Project intended to meet future traffic growth requirements

44

LOOSE NUKE WARNING

Clinton upbraided on 'loose nukes'

Advised to redouble efforts against the mounting threat

THE INFO TECH EDGE

Aerospace chases the software boom

Industry using computers to make entire business process more intelligent **46**

Boeing translates 737 to digital era

Allows improvements to software suite based on 777 experience **48**

Raytheon integrates product development

Greater use of CAD/CAM at restructuring program core **50**

Lockheed Martin develops virtual reality tools for JSF

To cut manufacturing costs, fighter serviceability costs and improve development cycle times **51**

Product simulation seen as cost cutter

Computer simulation, software programming become most efficient ways for design analysis **52**

Diverse workforce writing station's codes

Development mode illustrates extent to which systems management software is growing in importance for space **54**

Hughes pushes software standards

Seeking better ways to find and retain computer scientists **55**

Dassault Systemes extends CATIA reach

So engineers and subcontractors can share 'information pipeline' **55**

DASA production software optimizes work flow

IDs status of work, transmits relevant data to other stations **56**

AERONAUTICAL ENGINEERING

First Gripen squadron combat-ready in Sweden

Country begins fielding elements of concept for fully integrated, digital air defense system **57**

<http://www.awgnet.com>

Aviation Week's Web site offers selected articles from the current issue, as well as daily news updates, the Safety Resource Center, a gallery of photos and features from special issues. It's also a great jumping off spot for surfing to other aerospace sites. We're available on CompuServe, too; just GO AWG.

Russia, Ukraine back An-70 transport

Proceed with tests of prototype, other countries seek launch funding for Future Large Aircraft **58**

SPACE TECHNOLOGY

Boeing aligns space work

Restructures following merger with McDonnell Douglas, acquisition of Rockwell aerospace operations **61**
