100 BIOTECHNOLOGY

Consolidation in a growing industry

The UK biotech industry faces its next hurdle, as competition for funding puts pressure on smaller companies to merge. Claire Curran reports.

101 AFTERWORDS

103 COMMENT

Animal experiments are here to stay

Simon Festing responds to threats from animal rights groups by putting forward measures to promote public awareness of animal research.

104 PERSONAL CHEMISTRY

Professor Janet M Thornton

105 PATENTS

106 HISTORY

Linus Pauling: scientist of the century

Linus Pauling was one of the greatest scientists of the 20th century and a passionate peace campaigner. George B and Laurie M Kauffman, and Isaac Mayo commemorate his centenary.

112 MICROBIOLOGY

Showing bugs the red light

With the threat of 'superbugs' and a return to the pre-antibiotic era looming, photosensitising drugs may save us from topical infections. Mark Wainright and Michael Wilson investigate the potential.
