531 HUMAN CLONING

Easier than you think, but worth the risk?

A single genetic difference between humans and animals could make cloning people less problematic. Marina Murphy reports.

532 RESEARCH

Ionic solutions to chemistry problems

They're green, cheap and set to change chemistry for good. Richard Butler reports on the rise of ionic liquids.

533 COMMENT

Seeking white paper realism

Liz Surkovic from the Chemical Industries Association has confidence in chemicals that the EC white paper fails to recognise.

536 E-COMMERCE

The e-transformation

Rachel Bartels of Accenture's chemical practice discusses the effects that e-commerce could have on the chemical industry over the medium term.
