Discrete Mathematics
Volume 290, Issues 2–3, 28 February 2005

Contents

Contributions

D. Archdeacon and M. Debowsky
A characterization of projective-planar signed graphs 109

M. Changat, H.M. Mulder and G. Sierksma
Convexities related to path properties on graphs 117

G. Chartrand, L. Nebesky and P. Zhang
On hamiltonian colorings of graphs 133

M.-J. Chen, D. Kuo and J.-H. Yan
The bandwidth sum of join and composition of graphs 145

D.J. Grynkiewicz
On four color monochromatic sets with nondecreasing diameter 165

F. Harary and D. Ranjan
Identity orientation of complete bipartite graphs 173

H. Kerivin and A.R. Mahjoub
On survivable network polyhedra 183

H. Li and J. Shu
The partition of a strong tournament 211

H. Martini and V. Soltan
Antipodality properties of finite sets in Euclidean space 221

M.S. Roddy and B.S.W. Schröder
Isotone relations revisited 229

B.P. Tan
On the kings and kings-of-kings in semicomplete multipartite digraphs 249

Y. Teranishi
The number of spanning forests of a graph 259

Communication

A.N. Glebov, A.V. Kostochka and V.A. Tashkinov
Smaller planar triangle-free graphs that are not 3-list-colorable 269

0012-365X/04/$ - see front matter
doi:10.1016/S0012-365X(05)00039-7

Notes

H.L. Abbott and D.R. Hare
The set of values of b for which there exist block designs with b blocks 275

Y. Liu
Characterizations of maximum matching graphs of certain types 283

L. Traldi
Parallel connections and coloured Tutte polynomials 291

Forthcomming special issues 301

List of referees 305

Book announcements 307

Author index to volume 290 311

Master index to volumes 281–290 313

Guide for authors 329
