

Volume 88 Issue 2 February 2008 ISSN 0165-1684

SIGNAL PROCESSING

An International Journal

A publication of the European Association for Signal Processing (EURASIP)

Contents

Abstracted/indexed in: Arts & Humanities Search®; ASFA (Aquatic Sciences and Fisheries Abstracts); Computer and Information Systems; CSA Aerospace, & High Technology Database; CSA Life Sciences Abstracts; CSA Technology Research Database; Current Contents Search®; DIALOG Newsroom; Education Abstracts; Ei Compendex®; Electronics and Communications Abstracts; Energy Science and Technology; Environmental Engineering Abstracts; GeoRef; Inside Conferences; Inspec; MethSci®; MetalBase; PASCAL; SciSearch®; Solid State and Superconductivity Abstracts; Thomson Scientific Science Citation Index; UnCover®; Wilson Applied Science & Technology Abstracts. Also covered in the abstract and citation database SCOPUS®. Full text available on ScienceDirect®

W. Chauvet, B. Lacaze, D. Roviras and A. Duverdier Spreading properties of periodic clock changes application to interleavers	221
V. Atti, A. Spanias, K. Tsakalis, C. Panayiotou, L. Iasemidis and V. Berisha Gradient projection-based channel equalization under sustained fading	236
J.S. Bhat and C. Vijaya Sliding discrete fractional transforms	247
T.Y. Ji, Z. Lu and Q.H. Wu Detection of power disturbances using morphological gradient wavelet	255
M. Narozny, M. Barret and D.-T. Pham ICA based algorithms for computing optimal 1-D linear block transforms in variable high-rate source coding	268
J. Palicot and A. Goupil Performance analysis of the weighted decision feedback equalizer	284
T.-R. Tsai and D.-F. Tseng Subspace algorithm for blind channel identification and synchronization in single-carrier block transmission systems	296
A.T. Fam and I. Sarkar A new class of interlaced complementary codes based on components with unity peak sidelobes	307
R. Punchalard, A. Lorsawatsiri, W. Loetwassana, J. Koseeyaporn, P. Wardkein and A. Roeksabutr Direct frequency estimation based adaptive algorithm for a second-order adaptive FIR notch filter	315
R.L.G. Cavalcante and I. Yamada Steady-state analysis of constrained normalized adaptive filters for MAI reduction by energy conservation arguments	326
V. Rajagopalan, S. Chakraborty and A. Ray Estimation of slowly varying parameters in nonlinear systems via symbolic dynamic filtering	339
M. Souilah A new nonlinear filter for parameters identification in dynamic systems and application to a transmission channel	349

*Contents continued from outside back cover***CONTENTS**

O. Michailovich and A. Tannenbaum On approximation of smooth functions from samples of partial derivatives with application to phase unwrapping	358
D. Peleg and R. Meir A bilinear formulation for vector sparsity optimization	375
S. Morillas, V. Gregori, G. Peris-Fajarnés and A. Sapena Local self-adaptive fuzzy filter for impulsive noise removal in color images	390
Fast Communications	
R. Ranganathan and W.B. Mikhael A comparative study of complex gradient and fixed-point ICA algorithms for interference suppression in static and dynamic channels	399
L. Tao and H.K. Kwan Parallel lattice structures of block time-recursive discrete Gabor transform and its inverse transform	407
R.B. Pachori and P. Sircar EEG signal analysis using FB expansion and second-order linear TVAR process	415
S. Kang, S.W. Heo and S.-J. Baek An enhanced post-filter for improving the performance of an acoustic echo canceller in mobile application	421
A. Zoubir and Y. Wang Performance analysis of the generalized beamforming estimators in the case of coherently distributed sources	428
