NRC-CNRC

Serge Parent, Joseph J. Pote, and Kenneth W. Neale	253-265	Design of cold-formed compression web members with periodically varying section properties
Transportation engineering		Ingénierie des transports
	ARTICLES	ARTICLES
Ahmed Shalaby and Alan Reggin	139-146	Optimization of data collection needs for manual and automated network-level pavement condition ratings based on transverse variability and neural networks
Zhanmin Zhang and Susan Tighe	156-161	Impact of tridem and trunnion axle groups on premature damage of pavement infrastructure
Omar Al-Battaineh and Isam A. Kaysi	228-238	Genetically-optimized origin-destination estimation (GOODE) model: application to regional commodity movements in Ontario

Canadian Journal of Civil Engineering

Volume 34, Number 2, February 2007

Revue canadienne de génie civil

Volume 34, numéro 2, février 2007

Construction engineering

ARTICLE

Amir Chehayeb, Mohamed Al-Hussein,
and Peter Flynn 177-188

Engineering materials

ARTICLES

Kasthurirangan Gopalakrishnan and
Marshall R. Thompson 189-198

Zhanping You and Qingli Dai 239-252

Hydrotechnical engineering

ARTICLES

Nuray Denli Tokyay and Dilek Yildiz 162-169

C. Chaleeraktrakoon and A. Kangrang 170-176

Shuang Ming Wang and J.C. Doering 210-218

Structural engineering

ARTICLES

Ping Fu and Masoud Farzaneh 147-155

Sang-Hoon Oh, Young-Ju Kim, and
Tae-Sup Moon 199-209

A.H. Salem, M. El Aghoury, F.F. El Dib,
and M.T. Hanna 219-227

Ingénierie de la construction

ARTICLE

An integrated methodology for collecting, classifying, and
analyzing Canadian construction court cases

Matériaux d'ingénierie

ARTICLES

Subgrade stress ratios as airfield pavement rutting
performance indicators

Review of advances in micromechanical modeling of
aggregate-aggregate interactions in asphalt mixtures

Hydraulique

ARTICLES

Characteristics of free overfall for supercritical flows

Dynamic programming with the principle of progressive
optimality for searching rule curves

Development of a mathematical model of frazil ice
evolution based on laboratory tests using a counter-rotating
flume

Ingénierie des structures

ARTICLES

Simulation of the ice accretion process on a transmission
line cable with differential twisting

Cyclic performance of existing moment connections in
steel retrofitted with a reduced beam section and bottom
flange reinforcements

Strength of biaxially loaded slender I-section
beam-columns

Continued on inside back cover / Suite au verso

Front cover: Reduced beam section zone of bottom flange; shortly after significant yielding, bottom flange experienced a brittle fracture (see Oh et al., in this issue, pp. 199-209).

Page couverture : Section de poutre réduite de la semelle inférieure; la semelle inférieure a subi une rupture fragile peu après un important fléchissement (voir Oh et coll., ce numéro, p. 199-209)
