Hydrotechnical engineering

ARTICLE

S.M. Borghei and P. Zarnani 408-417**Structural engineering**

ARTICLES

**Mehdi H.K. Kharrazi, Graham W. Taylor,
and Carlos E. Ventura** 358-369**Timo K. Tikka and S. Ali Mirza** 384-399

DISCUSSIONS

Osama Bedair 437-439**Y. Liu and Q. Tang** 440-442**Transportation engineering**

ARTICLE

**Jin-Tae Kim, Jeongyoon Lee,
and Myungsoon Chang** 370-378**Hydraulique**

ARTICLE

Jet impact geometry and plunge pool dimensions effects on dynamic pressures at pool sidewalls

Ingénierie des structures

ARTICLES

Seismic assessment of rainscreen stucco systems

Effective flexural stiffness of slender structural concrete columns

DISCUSSIONS

Discussion of "Web bearing resistance of W-shape beams framing over columns"

Reply to the discussion by O. Bedair on "Web bearing resistance of W-shape beams framing over columns"

Ingénierie des transports

ARTICLE

Neural-network-based cycle length design for real-time traffic control

Volume 35, numéro 4, avril 2008

Construction engineering

ARTICLES

Jyh-Bin Yang and Shen-Fen Ou 321-332

**H. Ping Tserng
and Chin-Hsiang Chang** 333-348

**Dale Kung, Dinu Philip Alex,
Mohamed Al-Hussein, and Siri Fernando** 418-430

Engineering materials

ARTICLES

**İlker Bekir Topçu, Mehmet Uğur Toprak,
and Devrim Akdağ** 349-357

**İlker Bekir Topçu
and Abdullah Demir** 379-383

**Jincheol Kim, Jonghyun Ryu,
and R.D. Hooton** 400-407

Environmental engineering

TECHNICAL NOTE

Edward A. McBean 431-436

Ingénierie de la construction

ARTICLES

Using structural equation modeling to analyze relationships among key causes of delay in construction

Developing a project knowledge management framework for tunnel construction: lessons learned in Taiwan

Application of lean thinking to improve the productivity of water and sewer service installations

Matériaux d'ingénierie

ARTICLES

Determination of optimal microwave curing cycle for fly ash mortars

Relationship between methylene blue values of concrete aggregate fines and some concrete properties

Evaluation of strength and set behavior of mortar containing shotcrete set accelerators

Ingénierie de l'environnement

NOTE TECHNIQUE

Siloxanes in biogases from landfills and wastewater digesters

Continued on inside back cover / Suite au verso

Front cover: *top left*, oblique aerial photograph of an unimpeded ice run on the Porcupine River, Yukon Territory, Canada, 15 May 1993 (see Jasek. 2003. *Canadian Journal of Civil Engineering*, 30(1): 113-127); *top right*, merging of Greater Vancouver EMME/2 model traffic volumes with digital orthophotos (C. Lim and B. Clement, Strategic Planning Department, Greater Vancouver Transportation Authority), EMME/2 is a registered trademark of Les Conseillers INRO Consultants, Inc. [digital orthophoto (1999) courtesy of McElhanney Consulting, Vancouver, B.C., Canada]; *bottom left*, damage from the 26 December 2004 tsunami, showing impact loads (over and above those caused by wave pressures) caused by floating debris, such as a police car on a building near downtown Banda Aceh, Indonesia (photo courtesy of Dr. Murat Saatcioglu, University of Ottawa); *bottom right*, lifting out the hydraulic excavators from 20 m below grade on the Confederation Plaza project, Vancouver, B.C., Canada (photo courtesy of Dr. Alan Russell, The University of British Columbia).

Page couverture : *gauche supérieure*, dérive des glaces libres sur la rivière Porcupine, Territoire du Yukon, Canada, le 15 mai 1993, en photographie aérienne oblique (voir Jasek. 2003. *Revue canadienne de génie civil*, 30(1) : 113-127); *droite supérieure*, fusionnement des modèles de volumes de circulation EEME/2 du Grand Vancouver à l'aide d'orthophotos digitales (C. Lim et B. Clement, Strategic Planning Department, Greater Vancouver Transportation Authority), EMME/2 est une marque déposée de Les Conseillers INRO Consultants, Inc. [ortho-photo digitale (1999) courtoisie de McElhanney Consulting, Vancouver, C.-B., Canada]; *gauche inférieure*, lors du tsunami du 26 décembre 2004, dommages dus aux charges dynamiques causées par des débris flottants, tel cette auto-patrouille près du centre-ville de Banda Aceh, Indonésie, en plus des dommages dus à la pression des vagues (photo courtoisie de Murat Saatcioglu, Université d'Ottawa); *droite inférieure*, sortie d'excavatrices hydrauliques situées à 20 m sous le niveau du sol, projet de la Confederation Plaza, Vancouver, C.-B., Canada (photo offerte par Alan Russell, The University of British Columbia).
