# BULLETIN

AMERICAN  
CERAMIC  
SOCIETY

## NDE of Green Bodies / 27

### Refractories

- Molten-Metal Applications / 33
- Use of Steel Fibers / 39

### Decorating

- Screen Printing Variations / 44
- Stoneware Tile Coatings / 52

### Product Focus:

NDT/NDE Systems / 50

# CONTENTS

Volume 82, Number 3, March 2003

global news . . .

## feature articles

3	calendar
7	president's letter
9	global news
10	technology briefs
12	business stats
14	refractory hot line
17	GMIC news
18	ACerS section notes
20	NICE news
21	ceramics online
25	names in the news
50	product focus
65	product news
67	business services
77	career opportunities/ classified ads
79	information please/ ad index
80	last page

### 27 Nondestructive Evaluation of Green Components

Although recent developments of testing methods have improved insights into the microstructure of green bodies, many demands of material and component developers cannot or cannot economically be met. Torsten Rabe, Rainer Rudert, Jurgen Goebels and Karl-Wolfram Harbich

### 33 Mullite-Based Refractories for Molten-Metal Applications

Fabrication of mullite-based refractory tube was conducted using three methods: extrusion, isostatic pressing and ramming. The ramming method was found to be the most cost-effective for fabricating a tube. Sadanand Achari and L.N. Satapathy

### 39 Use of Steel Fibers in the Refractories Industry

Steel-fiber-reinforced castables are widely used under severe conditions because of their high mechanical strength and thermal shock resistance. Hamed Samadi

### 43 Industrial Vacuum Cleaning Systems

### 44 Color Variations in Screen Printing Ceramics

A study was conducted to determine the influence of printing and flooding speeds, squeegee angle and pressure, and condition of squeegee edge on color variation in ceramic printing. C. Moschik, W. Eppich and G. Hübner

### 49 Turbine Blade Coating System

### 52 Stain-Resistant Sol-Gel Silica Coatings on Stoneware Tile

A new sol-gel coating method, compatible with current industrial ceramic processes, allows multilayer film synthesis on porcelainized stoneware tile. E. Miorin, C. Pagura, M. Battagliarin, M. Fabrizio, M. Guglielmi and P. Miselli

### 59 Melt Viscosities of Silicate Glasses

Glass & Optical Materials Division's 2002 George W. Morey Award paper. R.H. Doremus

AMERICAN CERAMIC SOCIETY BULLETIN covers news and activities of the Society and its members, includes items of interest to the ceramic community, and provides the most current information concerning all aspects of ceramic technology, including research and development, manufacturing, engineering and marketing.

AMERICAN CERAMIC SOCIETY BULLETIN (ISSN No. 0002-7812). ©2003 PUBLISHED MONTHLY, 12 TIMES A YEAR. PRINTED IN THE UNITED STATES OF AMERICA. EDITORIAL AND SUBSCRIPTION OFFICES: P.O. Box 6136, WESTERVILLE, OH 43086-6136. SUBSCRIPTION INCLUDED WITH AMERICAN CERAMIC SOCIETY MEMBERSHIP. NONMEMBER SUBSCRIBER RATES: NORTH AMERICA, 1 YEAR \$50; INTERNATIONAL (AIR MAIL ONLY), 1 YEAR \$100. BACK ISSUES: NORTH AMERICA, \$9 PER ISSUE; INTERNATIONAL, \$12 PER ISSUE. ALL RATES INCLUDE SHIPPING CHARGES. OUR STANDARD DELIVERY METHOD OUTSIDE NORTH AMERICA IS VIA BULK AIR MAIL PROVIDED BY AN INTERNATIONAL RE-MAIL CARRIER.

POSTMASTER: PLEASE SEND ADDRESS CHANGES TO AMERICAN CERAMIC SOCIETY BULLETIN, P.O. Box 6136, WESTERVILLE, OH 43086-6136. PERIODICAL POSTAGE PAID AT WESTERVILLE, OHIO, AND ADDITIONAL MAILING OFFICES. ALLOW SIX WEEKS FOR ADDRESS CHANGES.
