British Library Cataloguing in Publication Data Barritt, C. M. H. Advanced building construction. – 2nd ed. Vol. 2 1. Building I. Title

690 TH145

ISBN 0-582-01970-2

Set in 10/11 Linotron 202 Times Produced by Longman Singapore Publishers (Pte) Ltd. Printed in Singapore.

Contents

Preface ix

Acknowledgements :

Part I General

Chapter 1 Building process legislation 2

- 1.1 The Construction Regulations
- 1.2 The Construction (General Provisions) Regulations 1961 3
- 1.3 The Construction (Lifting Operations) Regulations 1961 7
- 1.4 The Construction (Working Places) Regulations 1966 8
- 1.5 The Construction (Health Welfare) Regulations 1966 10

Chapter 2 Site mechanisation

- 2.1 Construction plant 11
- 2.2 Selection of plant 11 and and a selection of plant 11
- 2.3 Site layout 12
- 2.4 Earth-moving and excavation plant 12
- 2.5 Materials and component handling plant 15
- 2.6 Concrete mixing and placing plant 18
- 2.7 Pile driving and installation plant 21
- 2.8 Pumping and dewatering plant 22

Chapter 3 Site and soil investigation

- 3.1 Definitions 24
- 3.2 Site survey 24
- 3.3 Soil investigation 28
- 3.4 Laboratory tests 30
- 3.5 Applications 32

11

24

Chapter 4 Modular co-ordination and performance standards

- 4.1 The module 37
- 4.2 Preferred and co-ordinated dimensions 38
- 4.3 Terminology 384.4 On- and off-site operations 39
- 4.5 Performance standards 41

Part II Substructure

 5.1 Purpose of soil stabilisation 44 5.2 Importance of moisture content 44 5.3 Temporary stabilisation 45 5.4 Permanent stabilisation 46 Chapter 6 Coffer dams and caissons 6.1 General 51 6.2 Situation for use 52 6.3 Coffer dams 52 6.4 Caissons 57 Chapter 7 Basement construction 7.1 Purpose of basements 61 7.2 Box basements 62 7.3 Cellular basements or buoyancy raft 64 7.4 Waterproofing methods 66 7.5 Construction procedures 68 7.6 Service entry points 68 Part III Superstructure Chapter 8 Multi-storey framed buildings 8.1 The selection of the material 72 8.2 Multi-storey frames 74 	Chap	oter 5 Soil stabilisation	44
 5.2 Importance of moisture content 44 5.3 Temporary stabilisation 45 5.4 Permanent stabilisation 46 Chapter 6 Coffer dams and caissons 6.1 General 51 6.2 Situation for use 52 6.3 Coffer dams 52 6.4 Caissons 57 Chapter 7 Basement construction 7.1 Purpose of basements 61 7.2 Box basements 62 7.3 Cellular basements or buoyancy raft 64 7.4 Waterproofing methods 66 7.5 Construction procedures 68 7.6 Service entry points 68 Part III Superstructure Chapter 8 Multi-storey framed buildings 8.1 The selection of the material 72 8.2 Multi-storey frames 74 	5.1	Purpose of soil stabilisation 44	
 5.3 Temporary stabilisation 45 5.4 Permanent stabilisation 46 Chapter 6 Coffer dams and caissons 6.1 General 51 6.2 Situation for use 52 6.3 Coffer dams 52 6.4 Caissons 57 Chapter 7 Basement construction 7.1 Purpose of basements 61 7.2 Box basements 62 7.3 Cellular basements or buoyancy raft 64 7.4 Waterproofing methods 66 7.5 Construction procedures 68 7.6 Service entry points 68 Part III Superstructure Chapter 8 Multi-storey framed buildings 8.1 The selection of the material 72 8.2 Multi-storey frames 74	5.2	Importance of moisture content 44	
 5.4 Permanent stabilisation 46 Chapter 6 Coffer dams and caissons 6.1 General 51 6.2 Situation for use 52 6.3 Coffer dams 52 6.4 Caissons 57 Chapter 7 Basement construction 7.1 Purpose of basements 61 7.2 Box basements 62 7.3 Cellular basements or buoyancy raft 64 7.4 Waterproofing methods 66 7.5 Construction procedures 68 7.6 Service entry points 68 Part III Superstructure Chapter 8 Multi-storey framed buildings 8.1 The selection of the material 72 8.2 Multi-storey frames 74	5.3	Temporary stabilisation 45	
Chapter 6 Coffer dams and caissons 6.1 General 51 6.2 Situation for use 52 6.3 Coffer dams 52 6.4 Caissons 57 Chapter 7 Basement construction 7.1 Purpose of basements 61 7.2 Box basements 62 7.3 Cellular basements or buoyancy raft 64 7.4 Waterproofing methods 66 7.5 Construction procedures 68 7.6 Service entry points 68 Part Ill Superstructure Chapter 8 Multi-storey framed buildings 8.1 The selection of the material 72 72 8.2 Multi-storey frames 74 74	5.4	Permanent stabilisation 46	
 6.1 General 51 6.2 Situation for use 52 6.3 Coffer dams 52 6.4 Caissons 57 Chapter 7 Basement construction 7.1 Purpose of basements 61 7.2 Box basements 62 7.3 Cellular basements or buoyancy raft 64 7.4 Waterproofing methods 66 7.5 Construction procedures 68 7.6 Service entry points 68 Part Ill Superstructure Chapter 8 Multi-storey framed buildings 8.1 The selection of the material 72 8.2 Multi-storey frames 74 	Chap	oter 6 Coffer dams and caissons	51
 6.2 Situation for use 52 6.3 Coffer dams 52 6.4 Caissons 57 Chapter 7 Basement construction 7.1 Purpose of basements 61 7.2 Box basements 62 7.3 Cellular basements or buoyancy raft 64 7.4 Waterproofing methods 66 7.5 Construction procedures 68 7.6 Service entry points 68 Part III Superstructure Chapter 8 Multi-storey framed buildings 8.1 The selection of the material 72 8.2 Multi-storey frames 74	6.1	General 51	
 6.3 Coffer dams 52 6.4 Caissons 57 Chapter 7 Basement construction 7.1 Purpose of basements 61 7.2 Box basements 62 7.3 Cellular basements or buoyancy raft 64 7.4 Waterproofing methods 66 7.5 Construction procedures 68 7.6 Service entry points 68 Part III Superstructure Chapter 8 Multi-storey framed buildings 8.1 The selection of the material 72 8.2 Multi-storey frames 74	6.2	Situation for use 52	
 6.4 Caissons 57 Chapter 7 Basement construction 7.1 Purpose of basements 61 7.2 Box basements 62 7.3 Cellular basements or buoyancy raft 64 7.4 Waterproofing methods 66 7.5 Construction procedures 68 7.6 Service entry points 68 Part III Superstructure Chapter 8 Multi-storey framed buildings 8.1 The selection of the material 72 8.2 Multi-storey frames 74 	6.3	Coffer dams 52	
Chapter 7 Basement construction 7.1 Purpose of basements 61 7.2 Box basements 62 7.3 Cellular basements or buoyancy raft 64 7.4 Waterproofing methods 66 7.5 Construction procedures 68 7.6 Service entry points 68 Part Ill Superstructure Chapter 8 Multi-storey framed buildings 8.1 The selection of the material 72 8.2 Multi-storey frames 74	6.4	Caissons 57 June 9 June 1 June	
Chapter 7 Basement construction 7.1 Purpose of basements 61 7.2 Box basements 62 7.3 Cellular basements or buoyancy raft 64 7.4 Waterproofing methods 66 7.5 Construction procedures 68 7.6 Service entry points 68 Part III Superstructure Chapter 8 Multi-storey framed buildings 8.1 The selection of the material 72 8.2 Multi-storey frames 74	First	The Construction (Health Welface) Regulations Weeking	2.1
 7.1 Purpose of basements 61 7.2 Box basements 62 7.3 Cellular basements or buoyancy raft 64 7.4 Waterproofing methods 66 7.5 Construction procedures 68 7.6 Service entry points 68 Part III Superstructure Chapter 8 Multi-storey framed buildings 8.1 The selection of the material 72 8.2 Multi-storey frames 74	Cha	oter 7 Basement construction	61

 7.3 Cellular basements or buoyancy raft 64 7.4 Waterproofing methods 66 7.5 Construction procedures 68 7.6 Service entry points 68 Part III Superstructure Chapter 8 Multi-storey framed buildings 8.1 The selection of the material 72 8.2 Multi-storey frames 74	7.2	Box basements 62	
 7.4 Waterproofing methods 66 7.5 Construction procedures 68 7.6 Service entry points 68 Part III Superstructure Chapter 8 Multi-storey framed buildings 8.1 The selection of the material 72 8.2 Multi-storey frames 74	7.3	Cellular basements or buoyancy raft 64	
 7.5 Construction procedures 68 7.6 Service entry points 68 Part III Superstructure Chapter 8 Multi-storey framed buildings 8.1 The selection of the material 72 8.2 Multi-storey frames 74	7.4	Waterproofing methods 66 Si tuoyal sti2	
7.6 Service entry points 68 Part III Superstructure Chapter 8 Multi-storey framed buildings 8.1 The selection of the material 72 8.2 Multi-storey frames 74	7.5	Construction procedures 68	
Part III Superstructure Chapter 8 Multi-storey framed buildings 8.1 The selection of the material 72 8.2 Multi-storey frames 74	7.6	Service entry points 68 based to accord base also also	
Part III Superstructure Chapter 8 Multi-storey framed buildings 8.1 The selection of the material 72 8.2 Multi-storey frames 74		Concrete mixing and placing plant 18 preuro reaction	
Part III Superstructure Chapter 8 Multi-storey framed buildings 8.1 The selection of the material 72 8.2 Multi-storey frames 74			
Part III Superstructure Chapter 8 Multi-storey framed buildings 8.1 The selection of the material 72 8.2 Multi-storey frames 74			
Chapter 8 Multi-storey framed buildings 8.1 The selection of the material 72 8.2 Multi-storey frames 74	Part	III Superstructure	
Chapter 8Multi-storey framed buildings8.1The selection of the material728.2Multi-storey frames74	N.C.	noticetication	Clean
8.1 The selection of the material 728.2 Multi-storey frames 74	Cha	pter 8 Multi-storey framed buildings	72
8.1 The selection of the material 72 8.2 Multi-storey frames 74			
8.2 Multi-storey frames /4	8.1	The selection of the material 72	
	8.2	Multi-storey frames /4	

Chap	oter 9 Concrete panel buildings	80
9.1 9.2 9.3 9.4 9.5	Box frame structures 80 Structural stability 80 Types of panel 82 Panel production 83 Jointing 84	
Chap	oter 10 Prestressed concrete	88
10.1 10.2 10.3 10.4 10.5	Principle of prestressing 88 Materials 90 Pre-tensioning and post-tensioning 92 Prestressing methods 94 Uses of prestressing 95	
Chap	oter 11 Crosswall construction	97
11.1 11.2 11.3 11.4	Principles 97 Structural design 98 Materials 99 Thermal and sound insulation 101	
Chap	oter 12 Shell roofs	102
12.1 12.2 12.3 12.4	Principles of shells and slabs 102 Forms of shell roof 104 Forces in shells 109 Materials of construction 113	18.1 18.2 18.3 18.4 18.4
Chap	pter 13 Roof lighting and ventilating systems	114
13.1 13.2 13.3 13.4	Where roof lighting and ventilation are required 114 Design of roof glazing 115 Types of glazing in large span roofs 116 Flat roof glazing 119	Cha 19.1 19.2 19.3 19.4
Cha	pter 14 Roof finishes	121
14.1 14.2 14.3 14.4 14.5	Weather exclusion 121 Rainwater run-off 122 Choice of roofing 124 Roof pitch 124 Roofing materials 126	

v

vi

Chapter 15 Curtain walling

15.1	Definition	134

- Advantages of curtain walling 135 15.2
- Performance requirements 135 15.3

Internal construction Part IV

Chapter 16 Partitions

- Partition types and function 142 16.1
- Partitioning methods 143 16.2
- Partition performance standards 145 16.3

Chapter 17 Specialised doors 149

- Fire-resisting doors 149 17.1
- Sound-insulating doors 152 17.2
- 17.3 Flexible doors 153
- Revolving doors 155 17.4

Chapter 18 Wall finishes

- Choosing a wall finish 158 18.1 Types of wet finish 159 18.2
- 162 Types of dry finish 18.3
- Backgrounds 164 18.4
- Wall, floor and ceiling junctions 167 18.5

Chapter 19 Floor finishes

- 19.1 Types of finish 169
- Timber flooring 170 19.2
- 19.3 Sheet flooring 173
- 19.4 Tile flooring 178
- 19.5 Jointless flooring 180

Chapter 20 Suspended ceilings

- General considerations 182 20.1
- 20.2 Types of suspended ceiling 184
- 20.3 Services 186

182

169

158

134

142

Chapter 21 Plastics

- 21.1 Definition of terms used 188
- 21.2 Processing plastics 190
- 21.3 Uses of plastics 195

Part V External works

Chapter 22 Road construction

- 22.1 Rigid pavements 202
- 22.2 Road edge details 202
- 22.3 Kerb design and construction 205
- 22.4 Block paving 207
- 22.5 Road drainage 208
- 22.6 Setting out roads and drains 209

Chapter 23 Site protection and reinstatement

- 23.1 The need to protect 213
- 23.2 Methods of protection 213
- 23.3 Tree planting 214
- 23.4 Grass planting 215
- 23.5 Maintenance 216
