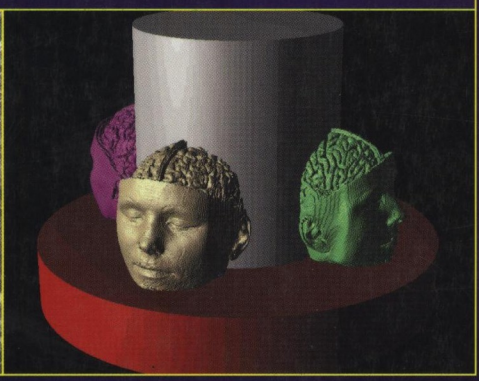
# Volume Graphics



Min Chen, Arie E. Kaufman and Roni Yagel (Eds)

Springer

# Contents

**Colour Plates** xv

## Part I: Perspectives

1. **State-of-the-Art in Volume Graphics**
   *Arie E. Kaufman* ..... 3

2. **Volume Modelling**
   *Gregory M. Nielson* ..... 29

## Part II: Discrete Modelling

3. **Minimally Thin Discrete Triangulation**
   *Valentin E. Brimkov, Reneta P. Barneva and Philippe Nehlig* ..... 51

4. **Smooth Boundary Surfaces from Binary 3D Datasets**
   *Daniel Cohen-Or, Arie Kadosh, David Levin and Roni Yagel* ..... 71

5. **Manufacturing Isovolumes**
   *Michael Bailey* ..... 79

## Part III: Complex Volumetric Objects

6. **Constructive Representations of Volumetric Environments**
   *Min Chen, John V. Tucker and Adrian Leu* ..... 97

7. **vxt: A Class Library for Object Voxelisation**
   *Milos Srámek and Arie E. Kaufman* ..... 119

8. **3D Scan-Conversion of CSG Models into Distance, Closest-Point and Colour Volumes**
   *David E. Breen, Sean Mauch and Ross T. Whitaker* ..... 135

9. **NURBS Volume for Modelling Complex Objects**
   *Zhongke Wu, Hock Soon Seah and Feng Lin* ..... 159

## Part IV: Volume Rendering

**10. Voxels versus Polygons: A Comparative Approach for Volume Graphics**
*Dirk Bartz and Michael Meißner* ..... 171

**11. Fast Multi-Resolution Volume Rendering**
*Yuting Yang, Feng Lin and Hock Soon Seah* ..... 185

**12. High-Quality Volume Rendering Using Seed Filling in View Lattice**
*Jarkko Oikarinen, Rami Hietala and Lasse Jyrkinen* ..... 199

**13. Extending Hypertextures to Non-Geometrically Definable Volume Data**
*Richard Satherley and Mark W. Jones* ..... 211

## Part V: Volume Animation

**14. Fast Volume Rendering and Animation of Amorphous Phenomena**
*Scott A. King, Roger A. Crawfis and Wayland Reid* ..... 229

**15. Visible Human Animation**
*Zhongke Wu and Edmond C. Prakash* ..... 243

**16. Realistic Volume Animation with Alias**
*Nikhil Gagvani and Deborah Silver* ..... 253

## Part VI: Parallel and Distributed Environments

**17. Multi-Resolutional Parallel Isosurface Extraction based on Tetrahedral Bisection**
*Thomas Gerstner and Martin Rumpf* ..... 267

**18. A Volume Rendering Crossbar and SRAM-Based Hardware**
Miron Deyssenroth, Martijn de Boer, Alexander Gröpl, Jürgen Hesser and Reinhard Männer ..... 279

**19. Algorithmically Optimised Real-Time Volume Rendering**
Bernd Vettermann, Jürgen Hesser and Reinhard Männer ..... 287

**20. Hardware Accelerated Voxelisation**
Shiaofen Fang and Hongsheng Chen ..... 301

**21. Volume Graphics and the Internet**
Ken Brodlie and Jason Wood ..... 317

## Part VII: Applications

**22. InViVo-IORT — A System for Quality Control in Intra-Operative Radiotherapy**
*Stefan Walter, Gerd Straßmann and Marco Schmitt* ..... 335

**23. Computer Aided Facial Reconstruction for Forensic Identification**
*Simon D. Michael* ..... 345

**24. A Morphological Approach to Volume Synthesis of Weathered Stones**
*Nao Ozawa and Issei Fujishiro* ..... 367

**25. Volumetric Modelling of 3D Text**
*Zhongke Wu and Edmond C. Prakash* ..... 379

## Part VIII: Glossaries and Indices

**Glossary**
*Mark W. Jones, Adrian Leu, Richard Satherley and Steve Treavett* ..... 391

**Author Index** ..... 407
**Subject Index** ..... 413
