## Part 1: Knowledge-Engineering Activities 1

### 1 Knowledge Acquisition and Knowledge Engineering 5

1.1 Architecture of Expert Systems 7

1.2 Development of Expert Systems 8

1.2.1 Iterative Development 11

1.2.2 Role of Knowledge Acquisition 12

1.2.3 Steps in the Development of an Expert System 14

1.2.4 Goals of Knowledge Acquisition 19

1.3 Developers of an Expert System 23

1.3.1 Knowledge Engineers 24

1.3.2 Experts 25

1.4 Points to Remember 26

### 2 Defining the Expert System 28

2.1 Understanding the Context 30

2.2 Defining the Objectives 33

2.3 Defining the Task 37

- 2.4 Identifying the Users 39
  - 2.4.1 Discussions about the Users 41
  - 2.4.2 Discussions with the Users 42
  - 2.4.3 Discussions about User Acceptance 43
- 2.5 Specifying the Operating Environment 45
- 2.6 Identifying the Source of Expertise 47
  - 2.6.1 Identifying Written Material 48
  - 2.6.2 Identifying the Experts 49
  - 2.6.3 Inclusion of Experts in the Project Team 50
  - 2.6.4 Agreeing on a Final Authority 54
- 2.7 Recording the Definition 56
- 2.8 Integrating Information from Multiple Sources 58
  - 2.8.1 Obtaining the Information 60
  - 2.8.2 Building Consensus 61
- 2.9 Points to Remember 65

### **3 Obtaining a General Understanding of the Task 70**

- 3.1 Task Overview 72
- 3.2 Case Discussion 73
  - 3.2.1 Select a Variety of Cases for Discussion 75
  - 3.2.2 Arrange to Discuss a Case 75
  - 3.2.3 Ask the Expert to Step Through the Case 76
  - 3.2.4 Develop a Standard Form for Case Descriptions 80
- 3.3 Preparation for the First Interview 81
  - 3.3.1 Prepare the Expert 81
  - 3.3.2 Prepare the Knowledge Engineers 87
- 3.4 Common Problems 91
  - 3.4.1 Information Overload 92
  - 3.4.2 Focus on Irrelevant Details 92
- 3.5 Points to Remember 93

### **4 Dividing the Functionality of the Expert System 96**

- 4.1 Identifying Possible Classification 97
  - 4.1.1 Identifying Subtasks 98
  - 4.1.2 Classifying Cases by Inputs 99
  - 4.1.3 Classifying Cases by Results 107
- 4.2 Comparing Categories 108
  - 4.2.1 Relative Size 109
  - 4.2.2 Relative Difficulty 114
  - 4.2.3 Relative Importance 117
- 4.3 Planning for Development 119
  - 4.3.1 Identifying Development Increments 119

- 4.3.2 Ordering Development Increments 122
- 4.3.3 Estimating Development Time 128
- 4.4 Points to Remember 133

## **5 Learning the Steps in the Task 138**

- 5.1 Learning the Expert's Strategy 141
- 5.2 Defining the Expert's Strategy 145
- 5.3 Testing the Generality of the Definition 147
- 5.4 Defining the Expert System's Procedure 151
- 5.5 Points to Remember 157

## **6 Understanding the Expert's Reasoning Process 159**

- 6.1 Identifying the Expert's Inferences 160
  - 6.1.1 Recognizing Inferences 160
  - 6.1.2 Reviewing Case Discussions 162
- 6.2 Checking for Hidden Assumptions 167
  - 6.2.1 Checking for Implicit Assumptions 167
  - 6.2.2 Checking for Obvious Assumptions 167
- 6.3 Investigating the Use of Uncertainty 171
  - 6.3.1 Learning How to Make Inexact Conclusions 172
  - 6.3.2 Learning How to Use Inexact Conclusions 177
  - 6.3.3 Learning How to Label Different Degrees of Certainty 182
  - 6.3.4 Learning How to Combine Different Degrees of Certainty 182
- 6.4 Points to Remember 184

## **7 Defining Important Characteristics of a Case 185**

- 7.1 Identifying the Specific Examples 187
- 7.2 Learning How the System Should Obtain Information 194
- 7.3 Defining Input Data 196
  - 7.3.1 Identifying the Source of the Data 196
  - 7.3.2 Investigating the Reliability of the Data 197
- 7.4 Defining Output Results 199
- 7.5 Points to Remember 200

## **8 Organizing the Knowledge 202**

- 8.1 Creating a Project Dictionary 203
- 8.2 Creating a Case Library 206
  - 8.2.1 Collecting Information Relevant to a Case 206
  - 8.2.2 Designing a Case Report 207
  - 8.2.3 Organizing the Case Reports 210
  - 8.2.4 Maintaining the Case Library 214
- 8.3 Points to Remember 216

- 9 Developing a Conceptual Model of the Expert System 219**
- 9.1 Analyzing Strategic Knowledge 222
    - 9.1.1 Defining High-Level Control 223
    - 9.1.2 Identifying Substeps of the Task 223
    - 9.1.3 Defining the Substeps 225
  - 9.2 Analyzing Judgmental Knowledge 228
    - 9.2.1 Understanding How to Make Conclusions 228
    - 9.2.2 Understanding How to React to New Information 242
    - 9.2.3 Describing the Inference Structure 244
  - 9.3 Analyzing Factual Knowledge 245
    - 9.3.1 Creating Definitions for Characteristics of a Case 246
    - 9.3.2 Classifying the Characteristics 249
    - 9.3.3 Organizing Case-Independent Facts 252
    - 9.3.4 Organizing Case-Independent Relationships 257
  - 9.4 Creating a Design Document 261
  - 9.5 Refining the Conceptual Model 265
  - 9.6 Points to Remember 266
- 10 Using the Conceptual Model 271**
- 10.1 Reviewing your Understanding with the Expert 272
    - 10.1.1 Presenting an Intermediate Representation 273
    - 10.1.2 Evaluating an Intermediate Representation 276
  - 10.2 Focusing Knowledge Acquisition 281
    - 10.2.1 Discussing Strategic Knowledge 282
    - 10.2.2 Discussing Judgmental Knowledge 284
    - 10.2.3 Discussing Factual Knowledge 288
  - 10.3 Analyzing Requirements for Implementation 289
  - 10.4 Implementing the Knowledge Base 293
  - 10.5 Points to Remember 295
- 11 Reviewing the Performance of the Expert System 297**
- 11.1 Demonstrating the Expert System 298
    - 11.1.1 Introducing a Demonstration 300
    - 11.1.2 Presenting a Demonstration 300
    - 11.1.3 Correcting Problems with the Presentation 306
  - 11.2 Reviewing Typescripts 307
    - 11.2.1 Creating Typescripts 308
    - 11.2.2 Preparing for a Typescript Review 308
    - 11.2.3 Conducting a Typescript Review 310
  - 11.3 Reviewing an Expert System's Results 311
  - 11.4 Reviewing Interactions with an Expert System 313
  - 11.5 Preparing for Recurrent Testing of an Expert System 317
  - 11.6 Points to Remember 319

**Part 2: Interviewing Activities 321**

- 12 Knowledge Acquisition and Interviewing 323**
- 12.1 Effective Communication 325
    - 12.1.1 Common Vocabulary 326
    - 12.1.2 Confirmation of Comprehension 326
  - 12.2 Relationship between Participants 327
    - 12.2.1 Duration of the Relationship 328
    - 12.2.2 Shared Goals between Participants 328
    - 12.2.3 Trust between Participants 329
    - 12.2.4 Cooperation and Conflict between Participants 329
    - 12.2.5 Influence of the Interviewee on Achievement of Goals 329
    - 12.2.6 Development of the Relationship 330
  - 12.3 Points to Remember 330
- 13 Interview Participants 333**
- 13.1 Knowledge-Acquisition Roles 334
  - 13.2 Interactions between Knowledge Engineer and Expert 334
    - 13.2.1 Sensitivity to the Expert's Feelings 335
    - 13.2.2 Sensitivity to Nonverbal Communication 337
    - 13.2.3 Sensitivity to Cultural Differences 342
    - 13.2.4 Dialog Examples 344
    - 13.2.5 Group Interactions 348
  - 13.3 Interactions among Knowledge Engineers 350
  - 13.4 Points to Remember 356
- 14 Preparation for an Interview 357**
- 14.1 Planning the Content 359
  - 14.2 Arranging the Time and Location 362
    - 14.2.1 Frequency of Interviews 362
    - 14.2.2 Time of Day 362
    - 14.2.3 Interview Location 363
  - 14.3 Identifying the Necessary Materials 364
  - 14.4 Preparing the Expert 365
  - 14.5 Preparing Yourself 367
  - 14.6 Points to Remember 367
- 15 Transfer of Information during an Interview 370**
- 15.1 Verbal Communication 371
    - 15.1.1 Introduction to an Interview 371
    - 15.1.2 Body of an Interview 372
    - 15.1.3 Closing of an Interview 375

- 15.2 Information Capture in a Permanent Record 377
  - 15.2.1 Note Taking 377
  - 15.2.2 Using Flip Charts and Whiteboards 379
  - 15.2.3 Audio Recording 381
  - 15.2.4 Video Recording 382
- 15.3 Points to Remember 383

## **16 Interview Dialog 385**

- 16.1 Introducing a Topic 385
- 16.2 Asking a Question 387
  - 16.2.1 Identifying the Information to Request 387
  - 16.2.2 Putting the Question into Words 389
  - 16.2.3 Voicing the Question to the Expert 393
  - 16.2.4 Correcting Problems with the Question 393
- 16.3 Listening to the Expert's Answer 404
- 16.4 Responding to an Answer 406
  - 16.4.1 Asking Follow-up Questions 408
  - 16.4.2 Confirming Your Understanding 410
  - 16.4.3 Resolving Contradictions 412
  - 16.4.4 Learning the Expert's Terms 414
  - 16.4.5 Adding Items to the Agenda 416
  - 16.4.6 Responding to an Uninformative Answer 418
- 16.5 Closing a Topic 418
- 16.6 Dialog Examples 419
- 16.7 Becoming Proficient 427
- 16.8 Points to Remember 429

## **17 Keeping an Interview Productive 433**

- 17.1 Balance of Control in an Interview 433
- 17.2 Problems that Impede Interview Productivity 435
  - 17.2.1 Problems Caused by Knowledge Engineers 435
  - 17.2.2 Problems Caused by Experts 436
- 17.3 Points to Remember 457

### **Part 3: Review 461**

## **18 Knowledge-Acquisition Challenges 463**

- 18.1 Understanding the Challenges 464
- 18.2 Applying Knowledge-Acquisition Techniques 467
  - 18.2.1 Be Flexible 467
  - 18.2.2 Use Cases throughout the Project 468
  - 18.2.3 Review your Understanding Frequently 468

18.3 Avoiding Project Failure 470

18.4 Beyond the Basic Techniques 473

**Glossary 475**

**Additional Reading 495**

**Index 503**
