NEURAL NETWORKS IN COMPUTER INTELLIGENCE

LiMin Fu

Contents

Preface	xvii
Acknowledgments	xix
I Theory, Methods, Applications	1
1 Introduction	3
1.1 Background	3
1.1.1 History of Artificial Neural Networks	4
1.2 Knowledge-Based Information Processing	5
1.3 Neural Information Processing	8
1.4 Hybrid Intelligence	10
1.5 The Outline of the Book	11
1.6 References	14
2 Basic Neural Computational Models	17
2.1 Introduction	17
2.2 Basic Concepts of Neural Networks	18
2.2.1 Network Properties	18
2.2.2 Node Properties	20
2.2.3 System Dynamics	20
2.3 Inference and Learning	22
2.3.1 Data Representation	24
2.3.2 Functional Classification	25
2.4 Classification Models	25
2.4.1 Single-Layer Perceptrons	26
2.4.2 Multilayer Perceptrons	31
2.5 Association Models	33
2.5.1 Hopfield Nets	33
2.5.2 Bidirectional Associative Memories	38
2.6 Optimization Models	41
2.6.1 Hopfield Nets	41
2.6.2 Boltzmann Machines	45
2.7 Self-Organization Models	48
2.7.1 Kohonen Networks	48
2.7.2 Competitive Learning	53
2.7.3 Hebbian Learning	55
2.8 General Issues	57

2.9	Hardware Implementation	58
2.10	Summary	58
2.11	References	59
2.12	Problems	61
3	Learning: Supervised and Unsupervised	65
3.1	Introduction	65
3.1.1	Definition of Learning	66
3.1.2	Historical Sketch	66
3.2	Supervised and Unsupervised Learning	67
3.3	Statistical Learning	68
3.4	AI Learning	69
3.4.1	Learning Theory	71
3.4.2	Version Spaces	72
3.4.3	ID3	75
3.4.4	AM	77
3.4.5	Meta-DENDRAL	78
3.4.6	Explanation-Based Learning	79
3.4.7	BACON	79
3.5	Neural Network Learning	80
3.5.1	Backpropagation	80
3.5.2	Generalization Methods	91
3.5.3	Radial Basis Function Networks	94
3.5.4	Reinforcement Learning	98
3.5.5	Temporal Difference Learning	99
3.5.6	ART Networks	101
3.6	Genetic Algorithms	105
3.7	Summary	107
3.8	References	107
3.9	Problems	110
4	Knowledge-Based Neural Networks	115
4.1	Introduction	115
4.2	Rule-Based Neural Networks	116
4.2.1	The CF-Based Activation Function	120
4.3	Network Training	122
4.4	Network Revision	125
4.4.1	Semantically Incorrect Connections	126
4.5	Issues	128
4.6	Examples of Theory Revision	129
4.6.1	An Artificial Domain	129
4.6.2	A Real-World Problem	134
4.7	Decision Tree-Based Neural Networks	136
4.8	Constraint-Based Neural Networks	138
4.9	Summary	139

4.10	References	140
4.11	Problems	142
5	Incremental Learning	145
5.1	Introduction	145
5.2	Fundamental Principles	146
5.3	Symbolic Methods	148
5.3.1	Version Spaces	148
5.3.2	COBWEB	148
5.3.3	Decision Tree Approaches	151
5.4	Neural Network Approaches	151
5.4.1	Probabilistic Neural Networks	152
5.4.2	Polynomial Adalines	155
5.4.3	Cascade Correlation Learning	158
5.5	The Incremental RBCN	159
5.6	Summary	164
5.7	References	165
5.8	Problems	166
6	Mathematical Modeling	169
6.1	Introduction	169
6.2	Mathematical Modeling in General	170
6.3	The Applications of Neural Networks	173
6.4	Neural Networks as Mathematical Models	175
6.4.1	Mapping Networks	175
6.4.2	Kolmogorov's Theorem	176
6.4.3	Functional-Link Nets	177
6.4.4	Wavelet Networks	180
6.4.5	General Regression Neural Networks	181
6.4.6	System Identification and Control	185
6.5	Knowledge-Based Approaches	188
6.5.1	The Use of Knowledge	188
6.5.2	Graph-Based Approaches	188
6.5.3	Equation-Based Approaches	190
6.5.4	Rule-Based Approaches	191
6.6	Summary	193
6.7	References	193
6.8	Problems	195
7	Complex Domains	197
7.1	Introduction	197
7.2	Expert System Heuristics	198
7.3	Hierarchical Models	200
7.3.1	Neocognitron	200
7.3.2	Complex Networks	205

7.3.3	Modular Neural Networks	206
7.4	Hybrid Models	208
7.4.1	Hamming Networks	208
7.4.2	Counterpropagation Networks	209
7.5	Parallel Models	210
7.6	Differentiation Models	212
7.6.1	Kohonen's Self-Organizing Nets	212
7.7	Control Networks	213
7.7.1	The Feedforward Model	214
7.7.2	The Recurrent Model	215
7.7.3	The Temporal Model	216
7.8	Summary	219
7.9	References	220
7.10	Problems	221
8	Discovery	223
8.1	Introduction	223
8.2	Symbolic Methods	224
8.2.1	Conceptual Clustering	224
8.2.2	The Role of Heuristics	226
8.2.3	Search for Laws	228
8.3	Neural Network Methods	230
8.3.1	Adaptive Clustering	230
8.3.2	Pattern Extraction	231
8.3.3	Mixed Unsupervised and Supervised Architectures	233
8.3.4	Heuristics-Supported Architectures	235
8.3.5	Law-Discovery Architectures	236
8.3.6	Genetic Search	239
8.4	Summary	240
8.5	References	241
8.6	Problems	241
9	Structures and Sequences	243
9.1	Introduction	243
9.2	Connectionist Representation	243
9.2.1	Local Representation	244
9.2.2	Distributed Representation	245
9.2.3	Representation of Variable-Sized Structures	246
9.3	A Hybrid Network Approach	247
9.4	Summary	249
9.5	References	250
9.6	Problems	250

10 Learning Spatiotemporal Patterns	253
10.1 Introduction	253
10.2 Spatiotemporal Neural Networks	254
10.2.1 Static Neural Networks	255
10.2.2 Time-Delay Neural Networks	256
10.2.3 Temporal Summation Neural Networks	259
10.2.4 Recurrent Neural Networks	259
10.2.5 Frequency Coding Neural Networks	261
10.2.6 Complex Neural Networks	261
10.3 Learning Procedures	262
10.3.1 Recurrent Backpropagation	263
10.4 Knowledge-Based Approaches	265
10.4.1 Signal-to-Symbol Transformation	265
10.4.2 Feature Extraction and Problem Abstraction	266
10.4.3 Knowledge-Based Network Architectures	267
10.4.4 Model-Based and Context-Directed Learning	269
10.5 Summary	270
10.6 References	271
10.7 Problems	273
II Neural Networks and Expert Systems	275
11 Expert Systems	277
11.1 Introduction	277
11.2 Knowledge Acquisition	280
11.3 Knowledge Representation	282
11.3.1 Logic	283
11.3.2 Production Rules	283
11.3.3 Semantic Nets	284
11.3.4 Frames	285
11.3.5 Object-Oriented Languages	285
11.3.6 Mixed Representation	286
11.3.7 Analogical Representation	287
11.3.8 Connectionists	287
11.4 Inference Engines	287
11.4.1 Event-Driven Systems	288
11.4.2 Goal-Oriented Systems	288
11.4.3 Expectation-Driven Systems	289
11.4.4 Metalevel Reasoning Systems	289
11.4.5 Blackboard Systems	289
11.4.6 Neural Networks	290
11.5 Reasoning under Uncertainty	290
11.5.1 Probabilistic Approaches	290
11.5.2 Certainty Factors	292

11.5.3	Dempster-Shafer's Theory	293
11.5.4	Fuzzy Set Theory	293
11.5.5	Neural Networks	295
11.6	Hybrid Expert Systems	295
11.7	Fuzzy Logic and Neural Networks	298
11.7.1	Fuzzy Neural Networks	298
11.8	Summary	301
11.9	References	302
11.10	Problems	304
12	Causal Learning and Modeling	307
12.1	Introduction	307
12.2	Causal Modeling	308
12.2.1	Causal Ordering	310
12.2.2	Estimation of Model Parameters	311
12.3	Causal Simulation and Inference	311
12.3.1	The Bayesian Network	313
12.4	Causal Neural Networks	314
12.4.1	Simple Neural Networks	317
12.4.2	Graph-Based Networks	318
12.4.3	Function-Based Networks	320
12.4.4	Rule-Based Networks	321
12.5	Learning Causal Knowledge	323
12.5.1	Learning Causal Patterns	325
12.6	Summary	327
12.7	References	327
12.8	Problems	329
13	Validation and Verification	331
13.1	Introduction	331
13.2	Performance Validation	331
13.3	Validation of a Learning System	335
13.3.1	Aspects of Validation	336
13.3.2	Approaches to Validation	337
13.4	Validation of a Performance System	341
13.4.1	Aspects of Validation	342
13.4.2	Approaches to Validation	343
13.5	Validation of Individual Patterns	344
13.5.1	Performance of a Rule	344
13.5.2	Statistical Significance of a Pattern	344
13.6	Verification	345
13.6.1	Verification of Rule Bases	345
13.6.2	Verification of Neural Networks	347
13.7	Summary	348
13.8	References	348

13.9 Problems	349
14 Rule Generation from Neural Networks	351
14.1 Introduction	351
14.2 Basic Definitions	352
14.3 Search on Adapted Nets	355
14.3.1 Properties	362
14.4 Learning in Practical Domains	363
14.4.1 Learning under Noise	363
14.4.2 Learning under Missing Data	366
14.4.3 Many-Category Learning	367
14.5 Various Rule Extraction Methods	367
14.6 Summary	368
14.7 Appendix: Formal Bases	369
14.8 References	374
14.9 Problems	374
15 Learning Grammars	377
15.1 Introduction	377
15.2 Formal Grammars	378
15.3 Theoretical Limitations	381
15.4 Symbolic Methods	381
15.5 The Neural Network Approach	383
15.6 Learning Rules from Neural Networks	387
15.6.1 The State Space Method	387
15.6.2 The Weight Space Method	389
15.7 Summary	391
15.8 References	392
15.9 Problems	393
III Case Studies	395
16 Genetic Pattern Recognition	397
16.1 Introduction	397
16.2 Polygenic Trait Analysis	399
16.2.1 Genetic Linkage	399
16.2.2 Statistical Analysis	401
16.3 Genetic Pattern Discovery	401
16.4 Experiments	405
16.5 Results	405
16.6 Discussions	408
16.7 References	409

17 Drug Discovery	411
17.1 Introduction	411
17.2 Machine Learning and Drug Design	412
17.3 Feature-Based Learning	414
17.3.1 Feature Extraction and Selection	414
17.3.2 Dimensionality Reduction	416
17.3.3 Feature Transformation	417
17.4 The Drug Discovery Program	418
17.5 Results	419
17.6 Discussions	420
17.7 References	423
18 Flow Cytometric Analysis of Leukemia	425
18.1 Introduction	425
18.2 Methods	426
18.2.1 The Theoretical Basis	426
18.2.2 The Description of the Algorithm	430
18.2.3 The Relations to Other Clustering Methods	431
18.2.4 Statistical Evaluation	432
18.3 Results	433
18.3.1 A Normal Blood Sample	434
18.3.2 A Leukemic Blood Sample	439
18.4 Discussions	442
18.5 References	442
Index	445
