

KADS

A PRINCIPLED APPROACH TO
KNOWLEDGE-BASED
SYSTEM DEVELOPMENT

KNOWLEDGE-
BASED
SYSTEMS

edited by g. schreiber, b. wielinga & j. breuker

Contents

Preface	xi
Contributors	xv
1 Introduction and Overview	1
<i>Guus Schreiber, Bob Wielinga and Joost Breuker</i>	
1.1 Views on Knowledge Acquisition	2
1.2 Principle 1: Multiple Models	4
1.3 Principle 2: Knowledge-Level Modelling	4
1.4 The KADS Model Set	6
1.5 Experiences	10
1.6 Book Contents	12
I Theoretical Basis	19
2 Modelling Expertise	21
<i>Bob Wielinga, Guus Schreiber and Joost Breuker</i>	
2.1 Introduction	21
2.2 Knowledge Categories	22
2.3 Domain Knowledge	22
2.4 Inference Knowledge	26
2.5 Task Knowledge	30
2.6 Strategic Knowledge	33
2.7 Synopsis of the Model of Expertise	34
2.8 Reusable Model Elements	35
2.9 Knowledge Acquisition Process	41
2.10 Relation to Other Approaches	42
2.11 Future Developments and Conclusions	45
3 Modelling System-User Cooperation in KADS	47
<i>Joost Breuker and Paul de Greef</i>	
3.1 Introduction	47
3.2 Functions, Cooperation and Communication	48

3.3	Task Model: Decomposition and Distribution	51
3.4	Cooperation Model	55
3.5	CHEZ CHEF: An Example of Cooking Cooperation	60
3.6	Modelling Communication	66
3.7	Conclusions	69
4	A KADS Domain Description Language	71
	<i>Guus Schreiber</i>	
4.1	Introduction	71
4.2	Existing Approaches to Data/Knowledge Modelling	72
4.3	Requirements for a Domain Description Language	75
4.4	Definition of the Domain Description Language	77
4.5	Discussion	88
5	Model Construction	93
	<i>Guus Schreiber and Bob Wielinga</i>	
5.1	Introduction	93
5.2	Graphical Representation of Inference Structures	94
5.3	Model-Construction Process	97
5.4	Tuning the Inference Structure for Systematic Diagnosis	100
5.5	Top-down Construction	103
5.6	A KADS Inference Structure for Heuristic Classification	112
5.7	Discussion: Generic Model Components	114
6	Operationalizing Models of Expertise	119
	<i>Guus Schreiber</i>	
6.1	Introduction	119
6.2	Design Process	120
6.3	Structure-Preserving Design	124
6.4	A Skeletal Architecture	130
6.5	Computational Decisions	134
6.6	Existing Approaches to Computerized Support	142
6.7	Maximizing Support and Flexibility: An Example	144
6.8	Discussion	148
7	KADS and Conventional Software Engineering	151
	<i>Guus Schreiber and Bob Wielinga</i>	
7.1	Introduction	151
7.2	Model Set	152
7.3	Modelling Framework	155
7.4	Modelling Techniques	156
7.5	The Role of the Analysis Model in Design	162
7.6	Conclusions	163

II	Languages and Tools	167
8	(ML)²: A Formal Language for KADS Models of Expertise	169
	<i>Frank van Harmelen and John Balder</i>	
8.1	Introduction	169
8.2	Domain Layer	172
8.3	Inference Layer	177
8.4	Task Layer	186
8.5	Experience	198
8.6	Discussion	200
8.7	Conclusion	201
9	MODEL-K: Making KADS Run	203
	<i>Angi Voß and Werner Karbach</i>	
9.1	Motivation	203
9.2	MODEL-K	204
9.3	The Office-Planning Task	205
9.4	Conceptual Model	207
9.5	Operational Refinement	212
9.6	The Airplane-Parking Task	216
9.7	Concluding Remarks	218
10	Using OMOS to Represent KADS Conceptual Models	221
	<i>Marc Linster</i>	
10.1	Introduction	221
10.2	Assumptions and Requirements	222
10.3	The OMOS Language	224
10.4	OMOS and KADS	233
10.5	Rephrasing K-ONCOCIN as O-ONCOCIN	234
10.6	Which Changes did Occur?	240
10.7	OMOS Model of the Task	240
10.8	Discussion	244
11	Shelley — Computer Aided Knowledge Engineering	247
	<i>Anjo Anjewierden, Jan Wielemaker and Catherine Toussaint</i>	
11.1	Introduction	247
11.2	Relation to Previous Work	248
11.3	Functions	248
11.4	Scenario	249
11.5	Requirements	255
11.6	Functionality Provided	256
11.7	Illustrated Tour	262
11.8	Conclusions	262

III Applications	265
12 The Paint Advisor: A Communicative Expert System	267
<i>Bart Benus, Robert de Hoog and Rob van der Spek</i>	
12.1 Introduction	267
12.2 Knowledge Acquisition	268
12.3 User Analysis	275
12.4 Tuning Expert- and Lay-Knowledge	281
12.5 Field Test	283
12.6 Lessons Learned	286
13 Managing and Maintaining an Operational KADS System	289
<i>Jonathan Killin</i>	
13.1 Introduction	289
13.2 A Short History of FraudWatch	290
13.3 Managing the Business Case	294
13.4 Managing the Methods	301
13.5 Maintaining FraudWatch	306
13.6 Conclusions	309
14 Rational Reconstruction of Diagnostic Expertise	313
<i>Radboud Winkels and Joost Breuker</i>	
14.1 Introduction	313
14.2 Model of Cooperation	315
14.3 Model of Expertise	316
14.4 System Control	326
14.5 Diagnosing Student's Errors	327
14.6 Modelling Communication	330
14.7 User Interface	332
14.8 Evaluation and Experiences	332
14.9 Conclusions	335
15 Qualitative Prediction of Behaviour	337
<i>Bert Bredeweg</i>	
15.1 Introduction	337
15.2 Three Major Approaches	338
15.3 Meta-classes	340
15.4 Inference Structure	353
15.5 Task and Strategic Knowledge	356
15.6 Concluding Remarks	357

16 A KADS Conceptual Model of the ONCOCIN Task	359
<i>Marc Linster and Mark Musen</i>	
16.1 Introduction	359
16.2 A Knowledge-Level Analysis of ONCOCIN	360
16.3 Model-construction Process	364
16.4 Domain Knowledge	369
16.5 Inference Knowledge	372
16.6 Task Knowledge	377
16.7 Design Model	381
16.8 Discussion	381
17 Applying KADS to the Sisyphus Domain	385
<i>Guus Schreiber</i>	
17.1 Introduction	385
17.2 Sample Problem Statement	386
17.3 Modelling the Office Assignment Problem	388
17.4 Initial Observations	391
17.5 Model of Expertise	392
17.6 Operationalizing the Model of Expertise	407
17.7 Discussion	412
18 Using KADS to Analyse Problem-Solving Methods	415
<i>Guus Schreiber, Bob Wielinga and Hans Akkermans</i>	
18.1 Introduction	415
18.2 Framework for Specification of PSM's	417
18.3 A Model of Cover-and-Differentiate	418
18.4 Analysing Cover-and-Differentiate	427
18.5 Conclusions	429
Bibliography	431
Name Index	447
Subject Index	452
