Wolf, Paul R.

Elements of photogrammetry : with applications in GIS. — 3rd ed. / Paul R. Wolf, Bon A. Dewitt.

p. cm.

Includes index.

ISBN 0-07-292454-3

1. Photogrammetry. 2. Aerial photogrammetry. 3. Image processing—Digital techniques. 4. Remote sensing. 5. Geographic information systems. I. Dewitt, Bon A. II. Title.

TR693.W63 2000

|                  |  |           |
|------------------|--|-----------|
|                  | Preface  | xi        |
| <b>Chapter 1</b> | <b>Introduction</b>  | <b>1</b>  |
|                  | 1-1 Definition of Photogrammetry / 1-2 History of<br>Photogrammetry / 1-3 Types of Photographs / 1-4 Taking<br>Vertical Aerial Photographs / 1-5 Existing Aerial Photography /<br>1-6 Uses of Photogrammetry / 1-7 Photogrammetry and<br>Geographic Information Systems / 1-8 Professional<br>Photogrammetry Organizations / 1-9 The World Wide Web /<br>References / Problems   |           |
| <b>Chapter 2</b> | <b>Principles of Photography and Imaging</b>   | <b>17</b> |
|                  | 2-1 Introduction / 2-2 Fundamental Optics / 2-3 Lenses /<br>2-4 Single-Lens Camera / 2-5 Illuminance / 2-6 Relationship of<br>Aperture and Shutter Speed / 2-7 Characteristics of Photographic<br>Emulsions / 2-8 Processing Black-and-White Emulsions /<br>2-9 Spectral Sensitivity of Emulsions / 2-10 Filters / 2-11 Color<br>Film / 2-12 Contact and Projection Printing / 2-13 Digital<br>Images / 2-14 Color Image Representation / 2-15 Digital Image<br>Printing / References / Problems   |           |
| <b>Chapter 3</b> | <b>Cameras and Other Imaging Devices</b>   | <b>52</b> |
|                  | 3-1 Introduction / 3-2 Metric Cameras for Aerial Mapping /<br>3-3 Main Parts of Frame Aerial Cameras / 3-4 Focal Plane and<br>Fiducial Marks / 3-5 Shutters / 3-6 Camera Mounts / 3-7<br>Camera Controls / 3-8 Automatic Data Recording / 3-9 Camera<br>Calibration / 3-10 Laboratory Methods of Camera Calibration /<br>3-11 Stellar and Field Methods of Camera Calibration /<br>3-12 Calibration of Nonmetric Cameras / 3-13 Calibrating the<br>Resolution of a Camera / 3-14 Characteristics of Digital Imaging<br>Devices / References / Problems |           |

|                  |  |            |
|------------------|--|------------|
| <b>Chapter 4</b> | <b>Image Measurements and Refinements</b>  | <b>81</b>  |
|                  | 4-1 Introduction / 4-2 Coordinate Systems for Image Measurements / 4-3 Simple Scales for Photographic Measurements / 4-4 Measuring Photo Coordinates with Simple Scales / 4-5 Trilaterative Method of Photo Coordinate Measurement / 4-6 Measurement of Photo Coordinates with Tablet Digitizers / 4-7 Monocomparator Measurement of Photo Coordinates / 4-8 Photogrammetric Scanners / 4-9 Refinement of Measured Image Coordinates / 4-10 Distortions of Photographic Films and Papers / 4-11 Shrinkage Correction / 4-12 Reduction of Coordinates to an Origin at the Principal Point / 4-13 Correction for Lens Distortions / 4-14 Correction for Atmospheric Refraction / 4-15 Correction for Earth Curvature / References / Problems |            |
| <b>Chapter 5</b> | <b>Object Space Coordinate Systems</b>   | <b>109</b> |
|                  | 5-1 Introduction / 5-2 Concepts of Geodesy / 5-3 Geodetic Coordinate System / 5-4 Geocentric Coordinates / 5-5 Local Vertical Coordinates / 5-6 Map Projections / 5-7 Horizontal and Vertical Datums / References / Problems   |            |
| <b>Chapter 6</b> | <b>Vertical Photographs</b>  | <b>125</b> |
|                  | 6-1 Geometry of Vertical Photographs / 6-2 Scale / 6-3 Scale of a Vertical Photograph over Flat Terrain / 6-4 Scale of a Vertical Photograph over Variable Terrain / 6-5 Average Photo Scale / 6-6 Other Methods of Determining Scale of Vertical Photographs / 6-7 Ground Coordinates from a Vertical Photograph / 6-8 Relief Displacement on a Vertical Photograph / 6-9 Flying Height of a Vertical Photograph / 6-10 Error Evaluation / References / Problems  |            |
| <b>Chapter 7</b> | <b>Stereoscopic Viewing</b>  | <b>147</b> |
|                  | 7-1 Depth Perception / 7-2 The Human Eye / 7-3 Stereoscopic Depth Perception / 7-4 Viewing Photographs Stereoscopically / 7-5 Stereoscopes / 7-6 The Use of Stereoscopes / 7-7 Causes of Y Parallax / 7-8 Vertical Exaggeration in Stereoviewing / References / Problems   |            |
| <b>Chapter 8</b> | <b>Stereoscopic Parallax</b>   | <b>164</b> |
|                  | 8-1 Introduction / 8-2 Photographic Flight-Line Axes for Parallax Measurement / 8-3 Monoscopic Methods of Parallax Measurement / 8-4 Principle of the Floating Mark / 8-5 Stereoscopic Methods of Parallax Measurement / 8-6 Parallax Equations / 8-7 Elevations by Parallax Differences / 8-8 Approximate Equation for Heights of Objects from Parallax   |            |

Differences / 8-9 Measurement of Parallax Differences /  
8-10 Computing Flying Height and Air Base / 8-11 Error  
Evaluation / References / Problems

## **Chapter 9** Elementary Methods of Planimetric Mapping for GIS 187

9-1 Introduction / 9-2 Planimetric Mapping with Reflection  
Instruments / 9-3 Georeferencing of Digital Imagery /  
9-4 Planimetric Mapping Using a Tablet Digitizer / 9-5 Heads-up  
Digitizing / 9-6 Photomaps / 9-7 Mosaics / 9-8 Uncontrolled  
Digital Mosaics / 9-9 Semicontrolled Digital Mosaics /  
9-10 Controlled Digital Mosaics / References / Problems

## **Chapter 10** Tilted Photographs 208

10-1 Introduction / 10-2 Angular Orientation in Tilt, Swing, and  
Azimuth / 10-3 Auxiliary Tilted Photo Coordinate System /  
10-4 Scale of a Tilted Photograph / 10-5 Relief Displacement on  
a Tilted Photograph / 10-6 Angular Orientation in Omega-Phi-  
Kappa / 10-7 Determining the Elements of Exterior Orientation /  
10-8 Rectification of Tilted Photographs / 10-9 Geometry of  
Rectification / 10-10 Correction for Relief of Ground Control  
Points Used in Rectification / 10-11 Analytical Rectification /  
10-12 Optical-Mechanical Rectification / 10-13 Digital  
Rectification / 10-14 Atmospheric Refraction in Tilted Aerial  
Photographs / References / Problems

## **Chapter 11** Introduction to Analytical Photogrammetry 233

11-1 Introduction / 11-2 Image Measurements / 11-3 Control  
Points / 11-4 Collinearity Condition / 11-5 Coplanarity  
Condition / 11-6 Space Resection by Collinearity / 11-7 Space  
Intersection by Collinearity / 11-8 Analytical Stereomodel /  
11-9 Analytical Interior Orientation / 11-10 Analytical  
Relative Orientation / 11-11 Analytical Absolute Orientation /  
11-12 Analytical Self-calibration / References /  
Problems

## **Chapter 12** Stereoscopic Plotting Instruments 260

12-1 Introduction / 12-2 Classification of Stereoscopic Plotters /  
Part I: Direct Optical Projection Stereoplotters /  
12-3 Components / 12-4 Projection Systems / 12-5 Viewing  
Systems / 12-6 Measuring and Tracing Systems / 12-7 Interior  
Orientation / 12-8 Relative Orientation / 12-9 Absolute  
Orientation / Part II: Stereoplotters with Mechanical Projection /  
12-10 Mechanical Projection Instruments / Part III: Analytical  
Plotters / 12-11 Introduction / 12-12 System Components and  
Method of Operation / 12-13 Advantages of Analytical Plotters /

12-14 Analytical Plotter Orientation / 12-15 Three-Dimensional Operation of Analytical Plotters / 12-16 Modes of Use of Analytical Plotters / Part IV: Softcopy Plotters / 12-17 Introduction / 12-18 General Overview of Softcopy Plotters / References / Problems

- Chapter 13** Topographic Mapping and Spatial Data Collection 293
- 13-1 Introduction / 13-2 Direct Compilation of Planimetric Features by Stereoplotter / 13-3 Direct Compilation of Contours by Stereoplotter / 13-4 Representing Topographic Features in Digital Mapping / 13-5 Digitizing Planimetric Features from Stereomodels / 13-6 Digital Elevation Models and Indirect Contouring / 13-7 Orthophoto Generation / 13-8 Map Editing / 13-9 Elevation Data Collection by Laser Mapping Systems / References / Problems
- Chapter 14** Fundamental Principles of Digital Image Processing 307
- 14-1 Introduction / 14-2 The Digital Image Model / 14-3 Spatial Frequency of a Digital Image / 14-4 Contrast Enhancement / 14-5 Spectral Transformations / 14-6 Moving Window Operations / 14-7 Multiscale Representation / 14-8 Summary / References / Problems
- Chapter 15** Principles of Softcopy Photogrammetry 327
- 15-1 Introduction / 15-2 System Hardware / 15-3 Image Measurements / 15-4 Orientation Procedures / 15-5 Epipolar Geometry / 15-6 Digital Image Matching / 15-7 Automatic Production of Digital Elevation Models / 15-8 Automatic Production of Digital Orthophotos / References / Problems
- Chapter 16** Ground Control for Aerial Photogrammetry 346
- 16-1 Introduction / 16-2 Selecting Photo Control Images / 16-3 Number and Location of Photo Control / 16-4 Planning the Control Survey / 16-5 Traditional Field Survey Methods for Establishing Horizontal Control / 16-6 Traditional Field Survey Methods for Establishing Vertical Control / 16-7 Fundamentals of the Global Positioning System / 16-8 Ground Control Surveys by GPS / 16-9 Artificial Targets for Photo Identifiable Control Points / 16-10 Indexing Ground Control / References / Problems

**Chapter 17** **Aerotriangulation** **366**

17-1 Introduction / 17-2 Pass Points for Aerotriangulation / Part I: Semianalytical Aerotriangulation / 17-3 General Description / 17-4 Sequential Construction of a Strip Model from Independent Models / 17-5 Adjustment of a Strip Model to Ground / 17-6 Independent Model Aerotriangulation by Simultaneous Transformations / 17-7 Perspective Center Coordinates / Part II: Analytical Aerotriangulation / 17-8 Introduction / 17-9 Simultaneous Bundle Adjustment / 17-10 Initial Approximations for the Bundle Adjustment / 17-11 Bundle Adjustment with Airborne GPS Control / 17-12 Aerotriangulation with Satellite Images / 17-13 Efficient Computational Strategies for Aerotriangulation / References / Problems

**Chapter 18** **Project Planning** **404**

18-1 Introduction / 18-2 Importance of Flight Planning / 18-3 Photographic End Lap and Side Lap / 18-4 Purpose of the Photography / 18-5 Photo Scale / 18-6 Flying Height / 18-7 Ground Coverage / 18-8 Weather Conditions / 18-9 Season of the Year / 18-10 Flight Map / 18-11 Specifications / 18-12 Cost Estimating and Scheduling / References / Problems

**Chapter 19** **Terrestrial and Close-Range Photogrammetry** **430**

19-1 Introduction / 19-2 Applications of Terrestrial and Close-Range Photogrammetry / 19-3 Terrestrial Cameras / 19-4 Horizontal and Oblique Terrestrial Photos / 19-5 Determining the Angle of Inclination of the Camera Axis / 19-6 Computing Horizontal and Vertical Angles from Oblique Terrestrial Photos / 19-7 Exposure Station Location and Camera Axis Direction / 19-8 Locating Points by Intersection from Two or More Oblique Terrestrial Photos / 19-9 Control for Terrestrial Photogrammetry / 19-10 Planning for Close-Range Photogrammetry / 19-11 Analytical Solution / References / Problems

**Chapter 20** **Introduction to Geographic Information Systems** **450**

20-1 Introduction / 20-2 The Importance of Photogrammetry in Generating GIS Databases / 20-3 Spatial Data / 20-4 Nonspatial Data / 20-5 Data Format Conversions / 20-6 Creating GIS Databases / 20-7 GIS Analytical Functions / 20-8 GIS Applications / References / Problems

|                   |   |            |
|-------------------|---|------------|
| <b>Chapter 21</b> | <b>Photogrammetric Applications in GIS</b>  | <b>474</b> |
|                   | 21-1 Introduction / 21-2 Law Enforcement and Regulation /<br>21-3 Hazardous Waste Management / 21-4 Water Quality<br>Management / 21-5 Wildlife Management /<br>21-6 Environmental Restoration / 21-7 Land Development /<br>21-8 Transportation / 21-9 Hydrography / 21-10 Multipurpose<br>Land Information System / 21-12 Summary / References /<br>Problems   |            |
|                   | <b>Appendixes</b>   | <b>493</b> |
| <b>A</b>          | <b>Units, Errors, Significant Figures, and<br/>Error Propagation</b>  | <b>493</b> |
|                   | A-1 Units / A-2 Errors / A-3 Significant Figures / A-4 Error<br>Propagation / References / Problems   |            |
| <b>B</b>          | <b>Introduction to Least Squares Adjustment</b>   | <b>502</b> |
|                   | B-1 Introduction / B-2 Definitions / B-3 Histograms /<br>B-4 Normal Distribution of Random Errors / B-5 Fundamental<br>Condition of Least Squares / B-6 Weighted Observations /<br>B-7 Applying Least Squares / B-8 Systematic Formulation of<br>Normal Equations / B-9 Matrix Methods in Least Squares<br>Adjustment / B-10 Matrix Equations for Precisions of Adjusted<br>Quantities / B-11 Practical Example / References / Problems   |            |
| <b>C</b>          | <b>Coordinate Transformations</b>   | <b>518</b> |
|                   | C-1 Introduction / C-2 Two-Dimensional Conformal Coordinate<br>Transformation / C-3 Alternative Method of Two-Dimensional<br>Conformal Coordinate Transformation / C-4 Coordinate<br>Transformations with Redundancy / C-5 Matrix Methods<br>in Coordinate Transformations / C-6 Two-Dimensional Affine<br>Coordinate Transformation / C-7 Three-Dimensional<br>Conformal Coordinate Transformation / C-8 Two-Dimensional<br>Projective Coordinate Transformation / References / Problems |            |
| <b>D</b>          | <b>Development of Collinearity Condition Equations</b>  | <b>551</b> |
|                   | D-1 Introduction / D-2 Rotation in Terms of Omega, Phi, and<br>Kappa / D-3 Development of the Collinearity Condition<br>Equations / D-4 Linearization of the Collinearity Equations /<br>D-5 Applications of Collinearity / D-6 Rotation in Terms of<br>Azimuth, Tilt, and Swing / D-7 Collinearity Equations Using<br>Azimuth-Tilt-Swing Rotations / D-8 Converting from One<br>Rotation System to the Other / Reference / Problems  |            |

|          |   |     |
|----------|---|-----|
| <b>E</b> | <b>Digital Resampling</b>   | 563 |
|          | E-1 Introduction / E-2 Nearest Neighbor / E-3 Bilinear Interpolation / E-4 Bicubic Interpolation / E-5 Discussion of the Three Methods / References / Problems  |     |
| <b>F</b> | <b>Conversions Between Object Space Coordinate Systems</b>  | 569 |
|          | F-1 Introduction / F-2 Standard Ellipsoid Constants for GRS80 / F-3 Conversion Between Geodetic and Geocentric Coordinates / F-4 Conversion Between Geocentric and Local Vertical Coordinates / F-5 Conversion Between Geodetic and Lambert Conformal Conic Coordinates / F-6 Conversion Between Geodetic and Transverse Mercator Coordinates / References / Problems |     |
|          | <b>Index</b>  | 590 |
