

acides nucléiques et synthèse des protéines chez les végétaux

éditions du cnrs

TABLE DES MATIERES

- Frontispice	5
- Avant-propos	7
- Liste des participants	15
<u>Organization and replication of the nuclear and chloroplast genomes</u>	
- Interspersion of repetitive and non repetitive sequence elements in the genome of cotton. <i>L.S. Dure III and Virginia Walbot</i>	27
- The arrangement of repeated and non-repeated sequences in the wheat genome. <i>Richard Flavell, Derek Smith and Jürgen Rimpau</i>	35
- RNA and protein synthesis in <u>Phaseolus</u> embryogeny : activity related to ploidy level. <i>Mary E. Clutter, Edward Chee-Tak Yeung and N.H. Marcus</i>	45
- Structure of chloroplast DNA from <i>Zea mays</i> . <i>J.E. Bedbrook</i>	53
- Restriction fragment map of the circular plastid DNA from <u>Spinacia oleracea</u> . <i>G. Hobom, H.J.Bohnert, A. Driesel and R.G. Herrmann</i>	63
- Restriction endonuclease analysis of chloroplast and mitochondrial DNAs of higher plants. <i>F. Vedel, F. Quetier and M. Bayen</i>	71
- Restriction enzyme analysis of the chloroplast DNA of <u>Chlamydomonas reinhardi</u> and construction of chloroplast DNA-plasmid hybrids. <i>J.D. Rochaix</i>	77
- Studies of the synthesis, location and segregation of chloroplast DNA in Spinach. <i>J.V. Possingham and R.J. Rose</i>	85
- Presence of divalent metal ions in reiterative DNA sequences from various plant tissues. <i>E. Guille, J. Grisvard and I. Sissoëf</i>	93
- Isolation, fractionation and DNA-binding properties of histones from wheat germ chromatin. <i>W.M. Becker and J.H. Simon</i>	97
- The interaction of basic proteins with DNA and chromatin, development of new methods and presentation of data. <i>K.G. Wagner, H.A. Arfmann, J. Bode, K. Wehling and L. Willmitzer</i>	103
- Analysis of the foldback fraction of wheat DNA. <i>T. Huguet, L. Jouanin and S. Bazetoux</i>	109
- Organization of the soybean genome. <i>A.G. Hepburn, W.B. Gurley and J.L. Key</i>	113
- Localization and characterization of the DNA synthesis in wounded pea seedlings. <i>D. Broekaert and R. Van Parijs</i>	117
- DNA polymerase from ungerminated wheat embryos. <i>Michel Castroviejo, Laura Tarrago-Litvak and Simon Litvak</i>	121
- IS-elements : bacterial structures resembling McClintock's "Controlling elements" in maize. <i>Peter Starlinger</i>	127
- Minicircular DNA in <i>Acetabularia</i> chloroplasts. <i>Beverley R. Green</i> ...	133
- Determination of the number of ribosomal cistrons in chloroplasts of C ₃ and C ₄ plants. <i>J. Callis and V. Walbot</i>	137
- Tobacco chromatin : biochemical and electron microscopic studies <i>C. Gigot, A. Nicolaieff and G. Philipps</i>	143
- Chloroplast DNA synthesis in <i>Euglena gracilis</i> . <i>N. Steele Scott</i>	147
- Spiral, string of grana, chloroplast model tested by computer simulation. <i>C.A. Jope, B.A. Atchinson, R.C. Pringle and S.G. Wildman</i>	153
- Correlation between mitochondrial and plastid structure in <u><i>Euglena gracilis</i></u> . <i>R. Schantz and M. Pellegrini</i>	159

Transcription

- DNA-dependent RNA polymerases of *Zea mays* and plastid RNA metabolism. *Lawrence Bogorad, Klaus Apel and L.A. Haff* 169
- RNA polymerase II from wheat germ : purification and subunit structure. *Jerome J. Jendrisak* 179
- Alternate modes of polyadenylic acid synthesis by maize polymerases. *R.J. Mans, C.O. Gardner, Jr. and R.H. Benson* 187
- Purification of RNA polymerase from wheat embryos by matrix-bound and hydrophobic chromatography. *P. Penon, M. Teissère, Y Azou and J. Ricard* 195
- Evidence for a protein factor stimulating RNA synthesis by DNA-dependent RNA polymerase II from plant cell cultures (Parsley). *G. Link and G. Richter* 201
- Electron microscopic visualization of rDNA transcription in different species of Dasycladaceae. *S. Berger* 207
- Transcription and processing of transcripts in isolated unbroken plastids. *H. Bohnert, A. Driesel and H. Herrmann* 213

Translation. The protein synthesis apparatus

- Nucleic acid sequence evidence for the evolutionary origin of major phyla including plants and algae. *B. Larue, R.J. Cedergren and D. Sankoff* 219
- Evolution of chloroplast ribosomal RNA. *D.E. Buetow, M.S. Kissil and L. Zablen* 227
- A new species of chloroplast RNA. *P.R. Whitfeld, C.J. Leaver, W. Bottomley and B.A. Atchinson* 235
- The prokaryotic nature of wheat embryo mitochondrial 18S ribosomal RNA. *R.S. Cunningham, N.W. Gray, W.F. Doolittle and L. Bonen* 243
- The substrate specificity of aminoacyl-tRNA synthetases from higher plants. *P.J. Lea and L. Fowden* 249
- Wheat germ dimeric aminoacyl-tRNA synthetases. *J.R. Carias, Ph. Chazol, R. Julien, M. Mauricourt, B. Quintard and J.C. Thomas* 255
- Origin of chloroplast-specific tRNAs^{Leu} in *Phaseolus vulgaris* *A. Steinmetz and J.H. Weil* 259
- Purification and properties of wheat embryo tRNA nucleotidyl transferase. *Liliana Ballivian, David Julius and Simon Litvak* 265
- Molecular species of rRNA from *pylaiella* and spinach in denaturing and non-denaturing media. *Mache R., Loiseaux S., Jaillifer-Verne M., Laulhère J.P. and Rozier C.* .. 273
- Free and membrane bound polysomes from plant cell cultures. *J. Pfisterer and K. Kloppstech* 279
- Biochemical characterization and interspecific variation of *Nicotiana* chloroplast and cytoplasmic ribosomal proteins. *Don P. Bourque* 285
- Site of synthesis of chloroplast ribosomal proteins in *Euglena* *G. Freyssinet* 291
- Characterization of peptidyl transferase from wheat germ. *A.B. Legocki and M.H. Sikorski* 297
- In vitro translation of large subunit ribulosediphosphate carboxylase from *Euglena*. *Marvin Edelman, Dofna Sagher and Avi Reisfeld* 305
- Properties of the mRNA and localization of the gene coding for the large subunit of ribulose biphosphate carboxylase in *Chlamydomonas reinhardi*. *S. Howell, P. Heizmann and S. Gelvin* 313

- Regulation of leghaemoglobin gene expression during root nodule development. <i>D.P.S. Verma</i>	319
- Cell-free synthesis of pea seed storage proteins. <i>T.J.V. Higgins and Donald Spencer</i>	327
- The subunit structure and cell-free synthesis of major storage protein from bean (<i>Phaseolus vulgaris</i> L.) seeds. <i>T.C. Hall, F.A. Bliss, D.S. Ryan and S.M. Sun</i>	335
- The cellular site of synthesis of chloroplast elongation factors. <i>P. Tiboni, B. Parisi and O. Ciferri</i>	345
- Immunological studies on the mitochondrial elongation factor G. <i>M.L. Munoz-Calvo, O. Tiboni, G. Veneroni and O. Ciferri</i>	351
- Leghaemoglobin synthesis in isolated soybean root nodule cell. <i>D.T. Nash and H.M. Schulmann</i>	357
- Messenger-type RNA from <i>Acetabularia</i> . <i>K. Kloppstech</i>	363
- Properties of poly(A)-containing RNA. <i>Donald Grierson</i>	369
- Extent of transcription of the plant genome; Estimation and fractionation of the repetitive genes coding for RNA. <i>D. Grierson and V. Hemleben</i>	375
- Characteristics of <i>Vicia faba</i> meristematic root cells polyadenylated RNAs purified by thermal elution from poly(U)-sepharose. <i>G. Trapy and R. Esnault</i>	381
<u>Synthesis of nucleic acids and proteins by organelles. Organelle-nuclear relationships</u>	
- The persistence of plastid polyribosomes and fraction I protein synthesis in ageing wheat leaves. <i>C.J. Brady and N. Steele Scott</i>	387
- Biosynthesis of chloroplast membrane proteins in <i>Chlamydomonas reinhardi</i> . <i>Maurice M. Margulies and Allan Michaels</i>	395
- Tylakoid membrane proteins of the green alga <i>Acetabularia mediterranea</i> . <i>K. Apel</i>	403
- The products of <i>in vitro</i> protein synthesizing systems programmed by chloroplast and cytoplasmic RNA and chloroplast DNA. <i>W. Bottomley, T.J.V. Higgins, P.R. Whitfeld and C.J. Leaver</i>	413
- The synthesis of chloroplast RNA. <i>M.R. Hartley, C.W. Head and Janet Gardiner</i>	419
- Studies on rapidly labelled RNA species synthesized in the chloroplast of spinach. <i>J. Speirs</i>	425
- Chloroplast rRNA synthesis in <i>Euglena gracilis</i> . <i>N. Steele Scott</i>	431
- Biosynthesis of rRNA and characterization of DNA in mitochondria of <i>Petroselinum sativum</i> root cell suspension cultures. <i>R. Misske and G. Richter</i>	435
- Oligo(A)-containing messenger RNA from the mitochondria of germinating <i>Trichoderma</i> . <i>Dalia Rosen, Esra Golun and Marvin Edelman</i>	441
- Cytoplasmic protein synthesis specifically required for 70S activity involved in chloroplast membrane biogenesis. <i>J. Gershoni</i>	447
- The synthesis of some enzymes of the photosynthetic carbon cycle in bean leaves. <i>J.W. Bradbeer, G.P. Arron, R. Kemble and O. Wara-Aswapati</i>	453
- The effects of 2-(4 methyl-2,6 dinitroanilino)-N-Methyl propionamide on bean chloroplast development. <i>A. Herrera, J.W. Bradbeer and R.J. Kemble</i>	457
- MDMP as an inhibitor of protein synthesis in plants. <i>Robert Baxter and D. Weeks</i>	463
- Effect of 5-bromodeoxyuridine (BrdUrd) on chloroplast differentiation in tobacco cell cultures. <i>P. Seyer and A.M. Lescure</i>	467

- Protein synthesis by spinach and Euglena chloroplasts isolated in gradients of silica sols. *C.A. Price* 473
- Control of nucleic and protein synthesis by hormones and environmental factors
- Hormonal control of the level of translatable mRNA for α -amylase in barley aleurone layers. *T.J.V. Higgins, J.A. Zwar and J.V. Jacobsen* 481
- The long-lived messenger RNA from dry seeds : Evidence for its existence, intra cellular location and role in germination. *Peter I. Payne, Margaret E. Gordon, Marta Dobrzanska, Mary L Parker* 487
- The in-vitro synthesis of hordeins with polysomes from normal and high lysine varieties of barley. *J.E. Fox, Helen M. Pratt, P.R. Shewry and B. Mifflin* 501
- Zein biosynthesis and molecular properties. *A. Viotti, C. Bove E. Gianazza and P.G. Righetti* 511
- RNA synthesis during imbibition of a dormant seed. *C. Van de Walle and G. Forgeur* 515
- Messenger RNA metabolism in germinating radish seedlings. *M. Delseny, L. Aspart, A. Got and Y. Guitton* 521
- Effect of GA₃ on protein synthetic activity and fractionation of tyrosine labelled proteins at different stages of germinating wheat embryo. *S.P. Yadav and H.K. Das* 527
- Enhancement of RNA polymerase activity by a factor separated on a 2-4-D affinity column. *Joe H. Cherry* 533
- Some aspects of the hormonal control of transcription in plants. *Jacques Ricard, Marcel Teissère and Paul Penon* 539
- Hormonal control of transcription in higher plants. *R.B. Van Huystee* 545
- Two elongation responses to auxin : implication for current hypotheses of auxin action. *Larry N. Vanderhoef* 551
- Shifts in the RNA and protein metabolisms of Spirodella (duckweed) *A. Rosner, A. Reisfeld, K.M. Jakob, J. Gressel and M. Edelman* 561
- The effect of indolacetic acid on RNA synthesis in tobacco pith explants. *R.J. Bogers, A. Quint and A.M. Ledebøer* 569
- Hormonal influence on tRNAs and protein synthesis in male and female organs of higher plants. *B. Durand and R. Durand* 575
- Effects of plant growth substances on the maturation of cytoplasmic rRNAs in cultured higher plant cells (Acer pseudoplatanus). *J.P. Cecchini and R. Miassod* 581
- Effects exerted by phytohormones on the process of transcription and polyadenylation of plant mRNA. *Lidia D. Wasilewska* 587
- Cytokinin mediated translational control of protein synthesis in cultured soybean cells. *D. Tepfer and D. Fosket* 593
- 5 Fluorouracil and α -amylase synthesis in barley aleurone layers. *Shirley Rodaway* 599
- The mobilisation of stored messenger-RNA of Phaseolus vulgaris induced by light. *A.B. Giles* 603
- The effect of light on protein synthesis in green leaves. *G.C. Blackwood and C.J. Leaver* 611
- Induction of chloroplast development. Translation studies with temporally distinguished messengers. *G.M. Indira and A. Gnanam* 617
- Phenotypical temperature-adaption of in vivo protein synthesis in wheat seedlings (Triticum aestivum) *M. Weidner and G. Combrink* 623
- The effect of horizontal clinostat on growth, water and protein contents in Helianthus annuus hypocotyls. *M. Bara* 629

Foreign DNA and plant cells. Plant viruses

- Single stranded interruptions in cauliflower mosaic virus DNA. <i>M. Volovitch, J.P. Dumas, G. Drugeon and P. Yot</i>	635
- The structure of viroids. <i>H.L. Sänger, G. Klotz, D. Reisner, H.J. Gross and A.K. Kleinschmidt</i>	643
- Induction of a lytic cycle in lysogenic cyanophytes. <i>C. Cocito, B. Boucau and D. Goldstein</i>	657
- Small particles containing the coat protein cistron associated with the cowpea strain of TMV. <i>P.R. Whitfeld and T.J.V. Higgins</i>	663
- Comparison of the replication and translation of two non-divided genome plant viruses. <i>A. Siegel and V. Hari</i>	669
- Plant virus replication : in vitro synthesis of turnip yellow mosaic virus coat protein and RNA. <i>B. Ricard, C. Barreau, C. Bove, A. Charron, C. Mouches, J. Latrille and J.M. Bove</i>	673
- Alfalfa mosaic virus polysomes. <i>Tineke Rutgers, Cor E.G.C. Bakhuizen and John F. Bol</i>	685
- Translation of cowpea mosaic virus RNA in a messenger dependent cell free system from rabbit reticulocytes. <i>H.R.B. Pelham and E.J. Stuik</i>	691
- Differences between aminoacylated viral transfer RNAs in their in- teraction with elongation factor 1. <i>T.C. Hall, M. Bastin</i>	697
- Uptake behaviour of tobacco leaf protoplasts in culture. <i>M.A. Mayo and D.J. Robinson</i>	699
- Replication of viroid RNA in tomato protoplasts. <i>H.L. Sänger and H.P. Mühlbach</i>	705
- Index des auteurs	711
