

11TH INTERNATIONAL CONFERENCE ON
**COMPUTER-AIDED
PRODUCTION ENGINEERING**

Contents

C509/127/95	KRONOS: A fully generative process planner based on the 'synthetic intelligence' approach J-P S van Griethuysen	1
C509/019/95	Coevolution systems for economic design T M Hill	9
C509/057/95	Bridging CAD and computer-controlled assembly lines K Takeuchi, A Mizowaki, Y Sada, and Y Shimizu	15
C509/125/95	A computer-based tool for the evaluation of pre-requisites for effective implementation of emerging manufacturing philosophies A K Kochar	21
C509/043/95	Information provision to the concurrent engineering environment D A Adams, C-J Ferguson, and C Irgens	29
C509/073/95	Computer-aided design and assessment of tools and components for nett-shape manufacturing Y Qin and R Balendra	35
C509/130/95	Positioning a 2½-D component in its blank X Xu and S Hinduja	41
C509/041/95	Geometry based surface modelling A A Ball	49
C509/040/95	A new method for the flexible definition of machinability for milling operations I D Carpenter and P G Maropoulos	55
C509/060/95	Numerical analysis and experimental tests of deep drawing sequences L Fratini, S Lo Casto, and F Micari	61
C509/088/95	Thermoplastic considerations for simulation of nett-forming of turbine aerofoils X Lu and R Balendra	67
C509/124/95	Process monitoring and control of electroerosion-dissolution machining A K M DeSilva, A B Khayry, and J A McGeough	73

C509/091/95	Preforming considerations for the injection forging of tubes R Balendra, S B Petersen, and D Colla	79
C509/037/95	Integrating reverse engineering, rapid prototyping and investment casting in the jeweller's craft R Ippolito, L Iuliano, and A Gatto	85
C509/045/95	The applicability of DSS for fault diagnostics within the electronics assembly industry L B Newnes and J K Chambers	91
C509/006/95	Machine chain similarity, a new approach for cell formation M Kazerooni, L H S Luong, and K Abhary	97
C509/046/95	Production planning and control strategies for cellular manufacturing facilities C Makatsoris and C B Besant	107
C509/033/95	Intelligent manufacturing systems: a case in production control M A S Monfared and S J Steiner	115
C509/005/95	Computer-aided process planning for printed circuit board assembly J Singh, J Gan Gah Kok, and L K Kiong	123
C509/004/95	A bottom-up integration of CAPM and CAMM K F Pun	131
C509/067/95	Flexibility of MRP II systems S Strzelczak	137
C509/056/95	Dynamic scheduling in a multiple objective production environment using a fuzzy adaptive controller G Perrone, U La Commare, G Lo Nigro, and C Nuccio	143
C509/109/95	A knowledge based system for the design of axisymmetric components for manufacture by powder metallurgy techniques L N Smith and P S Midha	149
C509/099/95	A knowledge based decision based support system for production management C E R Wainwright, D E Tucker, and R Leonard	155

C509/020/95	Knowledge based strategies for CAD enhancement T M Hill and R Hill	161
C509/008/95	Employing simulation to assist production planning and control of semi-automated manufacturing cells F T S Chan, L H S Luong, K Ahbary, and N K H Tang	167
C509/089/95	Scheduling of a flexible assembly system using genetic algorithms S J T Liang and M Mannion	173
C509/039/95	Aggregate process modelling techniques for process planning applications P G Maropoulos	179
C509/072/95	Product modelling in assembly process planning: use of octree representation in assembly sequence detection G Dini, F Failli, and M Santochi	185
C509/075/95	Preform design of multistage forging process using finite element based backward simulation technique H G Zhang, A Ajmal, G Q Zhao	191
C509/001/95	The effect of part handling decisions on the performance of flexible manufacturing systems A Boyle and A Kaldos	197
C509/093/95	Computer simulation of numerically controlled electrochemical machining (ECM-NC) with a spherical tool electrode J Kozak, L Dabrowski, A Ruszaj, and R Slawinski	205
C509/092/95	Manufacturing cost modelling by factorial design M L Philpott, E A Branstad, and R David	211
C509/061/95	Performance estimation of car engine assembly systems K J Aitchison and J M Kay	217
C509/079/95	Precision machining using machine tools with limited accuracy K-D Bouzakis and K Efstathiou	223
C509/044/95	Automation of powder production within the food and pharmaceutical industries L B Newnes, J N Staniforth, S A MacGregor, and G R Kay	231

C509/031/95	High-speed/high-torque driving for robot joints and its applications T Honda, S Kaneko, and S Kan	237
C509/126/95	A paradigm for sequential model validation in manufacturing systems V I Vitanov, N G Bennett, and D K Harrison	243
C509/122/95	Part 1: An analytical framework for structural control of flexible manufacturing systems S A Reveliotis, M A Lawley, and P M Ferreira	249
C509/122/95	Part 2: Structural control policies for flexible manufacturing systems S A Reveliotis, M A Lawley, and P M Ferreira	255
C509/027/95	An object orientated approach to the development of a constructive geometric model for computer aided design, manufacturing, and inspection systems C Hastie and C D McCausland	261
C509/074/95	Explicit feature interaction modelling in CAD and CAM systems A G Pedley and M Ehrmann	269
C509/002/95	Application of a computer model for high speed machining simulation I F Dagiloke, A Kaldos, and B Mills	277
C509/084/95	The future of DNC in batch manufacturing environments K T K Toh and S T Newman	283
C509/023/95	Model driven configuration of integrated manufacturing systems R H Weston	289
C509/083/95	The implementation of CIM system in Beijing No. 1 machine tool plant B Zhou and X Wu	295
C509/101/95	Capacity planning for manufacturing strategy: a case study C E R Wainwright	303

CS09/123/95

Measures derived from image analysis for use in the monitoring of mineral wool production

D R Philpott, A Angwafo, P R Bullen, F Trdic, and B Sirok

309

CS09/048/95

A model for computer support design co-ordination in concurrent engineering

K J MacCallum and X Liu

315
