

D. Driankov

H. Hellendoorn

M. Reinfrank

**An
Introduction
to Fuzzy
Control**

Second Edition

Springer

Table of Contents

1	Introduction	1
1.1	Fuzzy Control from an Industrial Perspective	2
1.1.1	A Lot of Fuzz About Fuzzy Control	2
1.1.2	Fuzzy Control: Real-time Expert Systems or Nonlinear Control Systems?	2
1.1.3	The Benefits of Fuzzy Control	3
1.1.4	The Limits of Fuzzy Control	6
1.1.5	On When to Use Fuzzy Control	8
1.1.6	The Market Place	9
1.1.7	What Needs to Be Done?	11
1.2	Knowledge Based Systems for Process Control	13
1.2.1	Process Monitoring	13
1.2.2	Fault Diagnosis	14
1.2.3	Planning and Scheduling	15
1.2.4	Supervisory Control	16
1.3	Knowledge Based Controllers	17
1.4	Knowledge Representation in KBCs	21
1.4.1	Knowledge Representation in SECSs	22
1.4.2	Knowledge Representation in FKBCs	28
2	The Mathematics of Fuzzy Control	37
2.1	Introduction: Fuzzy Sets	37
2.1.1	Vagueness	37
2.1.2	Fuzzy Set Theory Versus Probability Theory	38
2.1.3	Classical Set Theory	40
2.1.4	Fuzzy Sets	44
2.1.5	Properties of Fuzzy Sets	52
2.1.6	Operations on Fuzzy Sets	55
2.2	Fuzzy Relations	61
2.2.1	Classical Relations	61
2.2.2	Fuzzy Relations	63
2.2.3	Operations on Fuzzy Relations	65
2.2.4	The Extension Principle	73
2.3	Approximate Reasoning	74

2.3.1	Introduction	74
2.3.2	Linguistic Variables	75
2.3.3	Fuzzy Propositions	76
2.3.4	Fuzzy If-then Statements	80
2.3.5	Inference Rules	82
2.3.6	The Compositional Rule of Inference	83
2.3.7	Representing the Meaning of If-then Rules	85
2.4	Representing a Set of Rules	93
2.4.1	Mamdani Versus Gödel	93
2.4.2	Properties of a Set of Rules	97
2.4.3	Completeness of a Set of Rules	98
2.4.4	Consistency of a Set of Rules	100
2.4.5	Continuity of a Set of Rules	101
2.4.6	Interaction of a Set of Rules	101
3	FKBC Design Parameters	103
3.1	Introduction: The Structure of a FKBC	103
3.1.1	Fuzzification Module	103
3.1.2	Knowledge Base	104
3.1.3	Inference Engine	105
3.1.4	Defuzzification Module	106
3.2	Rule Base	107
3.2.1	Choice of Variables and Content of Rules	107
3.2.2	Choice of a Term Set	111
3.2.3	Derivation of Rules	114
3.3	Data Base	115
3.3.1	Choice of Membership Functions	115
3.3.2	Choice of Scaling Factors	126
3.4	Inference Engine	128
3.5	Choice of Fuzzification Procedure	131
3.6	Choice of Defuzzification Procedure	132
3.6.1	Center-of-Area/Gravity	134
3.6.2	Center-of-Sums	135
3.6.3	Height	136
3.6.4	Center-of-Largest-Area	137
3.6.5	First-of-Maxima	137
3.6.6	Middle-of-Maxima	138
3.6.7	Description of Two Examples	138
3.6.8	Comparison and Evaluation of Defuzzification Methods	141
4	Nonlinear Fuzzy Control	145
4.1	Introduction	145
4.2	The Control Problem	147
4.3	The FKBC as a Nonlinear Transfer Element	149
4.3.1	FKBC Computational Structure	149

4.3.2	The Nonlinearity of the Controller	155
4.3.3	Rule Based Representation of Conventional TE	159
4.4	Types of FKBC	163
4.4.1	PID-like FKBC	164
4.4.2	Sliding Mode FKBC	171
4.4.3	Sugeno FKBC	186
5	Adaptive Fuzzy Control	197
5.1	Introduction	197
5.2	Design and Performance Evaluation	198
5.2.1	The Performance Monitor	198
5.2.2	The Adaptation Mechanism	203
5.2.3	Performance Evaluation	207
5.3	The Main Approaches to Design	207
5.3.1	Membership Function Tuning using Gradient Descent	207
5.3.2	Membership Function Tuning Using Performance Criteria	214
5.3.3	The Self-Organizing Controller	219
5.3.4	A Model Based Controller	231
6	Stability of Fuzzy Control Systems	245
6.1	Introduction	245
6.2	The State Space Approach.	248
6.3	Stability and Robustness Indices	259
6.3.1	The One-dimensional Case	259
6.3.2	The n -dimensional Case	262
6.4	Input-Output Stability	273
6.4.1	The Spaces of Signals	274
6.4.2	The Input-Output Notion of a System	274
6.4.3	The Input-Output Notion of Stability	274
6.5	The Circle Criterion	275
6.5.1	Stability Analysis – SISO Case	276
6.5.2	Stability Analysis – MIMO Case	276
6.5.3	Application of the Circle Criterion to Design	281
6.6	The Conicity Criterion	283
