

# APPLICATION OF MULTIVARIABLE SYSTEM TECHNIQUES

(AMST 90)

Edited by  
R. WHALLEY

UNIVERSITY  
OF BRADFORD

THE INSTITUTE OF  
MEASUREMENT  
AND CONTROL

ELSEVIER APPLIED SCIENCE

## CONTENTS

<i>Preface</i> . . . . .	v
--------------------------	---

### Keynote Address

Control Configuration Design: A Missing Link in the Evolution of Modern Control Theories ( <i>Abstract</i> ) . . . . .	1
K. D. MINTO ( <i>GE Corporate Research and Development, USA</i> ) and C. N. NETT ( <i>Georgia Institute of Technology, USA</i> )	

### Aerospace Applications 1

$H_\infty$ Multivariable Control Designs for Helicopters . . . . .	2
I. POSTLETHWAITE,* S. J. WILLIAMS,† D. MACLAY,† D. J. WALKER* and P. R. SMITH‡ ( <i>*University of Leicester, UK; †Cambridge Control Ltd, UK; ‡RAE Bedford, UK</i> )	
Multivariable Control Design for VSTOL Aircraft Using the Direct Nyquist Array and Characteristic Locus Methods . . . . .	16
S. J. WILLIAMS ( <i>Cambridge Control Ltd, UK</i> ) and P. R. SMITH ( <i>RAE Bedford, UK</i> )	
Scheduling by Switching of $H_\infty$ Controllers for a VSTOL Aircraft. . . . .	33
R. A. HYDE, K. GLOVER ( <i>Cambridge University, UK</i> ) and S. J. WILLIAMS ( <i>Cambridge Control Ltd, UK</i> )	

### Robustness 1

Robustness Characteristics of Fast-Sampling Digital Set-Point Tracking PI Controllers for Regular Linear Multivariable Plants . . . . .	43
B. PORTER and M. Z. OTHMAN ( <i>University of Salford, UK</i> )	
Further Results in the Design of Robust Multivariable Regulators Based on Passivity . . . . .	55
R. G. CAMERON and K. MHANA ( <i>University of Bradford, UK</i> )	

Robust Multivariable Regulator Design Based on Passivity: Two Examples	63
P. VEGA ( <i>Universidad de Valladolid, Spain</i> ), Z. XU ( <i>Southeast University, PR China</i> ), R. G. CAMERON ( <i>University of Bradford, UK</i> ) and F. LI ( <i>CERL, UK</i> )	

### Power Systems 1

Multivariable Control of a Large Coal Fired Power Plant	71
N. RABINDRAN ( <i>CEGB, UK</i> )	
Multivariable Self-Tuning Controller for a Power Station Boiler	86
B. W. HOGG and N. M. EL-RABAIE ( <i>Queen's University of Belfast, UK</i> )	
Laboratory Implementation of Self-Tuning Automatic Voltage Regulator for Turbogenerators	94
Q. H. WU and B. W. HOGG ( <i>Queen's University of Belfast, UK</i> )	

### Multivariable and Multidimensional Systems

Delay-Differential System Models	102
R. WHALLEY ( <i>University of Bradford, UK</i> )	
A Procedure to Achieve Diagonal Dominance Using a Dynamic Controller Structure	112
C.-L. CHEN and N. MUNRO ( <i>UMIST, UK</i> )	
Application of Multivariable Control Techniques to a Visually Guided Autonomous Vehicle	120
P. M. G. SILSON ( <i>Royal Military College of Science, UK</i> ) and J. P. SHERLOCK ( <i>Royal Signals Research Establishment, UK</i> )	

### Process Applications 1

Multivariable Control Strategies Applied to a Gas Pressure Reduction Station	128
I. FLETCHER, C. S. COX and W. J. B. ARDEN ( <i>Sunderland Polytechnic, UK</i> )	
Multivariable PIP Control of an Industrial Waste Gas Scrubber Process	137
K. C. S. NG, I. G. FRENCH and A. R. BOUCHER ( <i>Sunderland Polytechnic, UK</i> )	

- Robust Multivariable Control System Design for a Furnace Based on  
Characteristic Patterns . . . . . 145  
N. E. GOUGH,\* G. M. DIMIROVSKI,† I. H. TING\* and N. SADAOUI\*  
(\*Wolverhampton Polytechnic, UK; †Cyril & Methodius University,  
Yugoslavia)

### Adaptive Control

- Adaptive Control of a Multivariable System with Constrained Control . 153  
W.-T. WU and K.-C. CHEN (*National Tsing Hua University, Taiwan*)
- Decision Rules of Structural Identification Using Standard Models and  
Discriminant Operators . . . . . 160  
V. A. LOTOTSKY, A. A. YARALOV (*Institute of Control Sciences, USSR*),  
A. S. GRINBERG and R. I. MAIZUS (*Central Research Planning and  
Technological Institute for Control and Management, USSR*)
- Adaptive Predictive Control and its Applications in Missile Interception  
Problem . . . . . 171  
J. SHI,\* T. TANG† and Z. ZHANG\* (\**Beijing Institute of Management,  
PR China*; †*Institute of Automation, PR China*)

### Marine Applications

- A Multivariable Approach for Predicting the Response of Ships in Calm  
Water and in Waves . . . . . 179  
R. S. BURNS (*Polytechnic South West, UK*)
- Methods of Reducing Rudder Induced Roll in a Three Fin Torpedo . 187  
R. SUTTON, B. A. STACEY (*Royal Naval Engineering College, UK*) and  
A. R. T. JONES (*ARE Egdon Hall, UK*)
- $H_\infty$  Multivariable Design of a Submarine Depth Control System . . . 194  
S. J. WILLIAMS (*Cambridge Control Ltd, UK*) and W. B. MARSHFIELD  
(*ARE Haslar, UK*)

### Robotics

- Application and Control of the Differential Gear Articulated Robot Arm 206  
A. L. VIEIRA, K. TAKITA (*UFPA-CT-DEE, Brazil*), T. MIZUTANI  
(*Mitutoyo Corporation, Japan*) and A. G. B. PALHARES (*UNICAMP,  
Brazil*)

Position and Force Control Laws of Hybrid Position/Force Control for a Light, Elastic Manipulation Device . . . . .	212
T. DUMONT,*† W. MORITZ* and E. VALDÈS*† (*University of Paderborn, FR Germany; †ENSAM, France)	

Adaptive Automated Visual Inspection . . . . .	220
J. R. CALDAS PINTO and M. A. NEVES RAMALHO (Universidade Tecnica de Lisboa, Portugal)	

### Keynote Address

Linear System Stability: An Overview of Some Recent Developments . . . . .	228
S. BARNETT (University of Bradford, UK)	

### Aerospace Applications 2

Output Variable Structure Control of the Longitudinal Motion of an Aircraft . . . . .	240
B. A. WHITE (Royal Military College of Science, UK)	

The Applications of Hierarchical Filter in the Flight Vehicle Control System . . . . .	248
Z. YUN and J. SHI (Beijing Institute of Technology, PR China)	

Robust Parameter Design of Flight Control System . . . . .	256
A. CAVALLO, G. DE MARIA (Università degli Studi di Napoli, Italy) and L. VERDE (Centro Italiano Ricerche Aerospaziali, Italy)	

### CAD/Simulation

New Features of the Multivariable Frequency Domain Toolbox for Matlab . . . . .	264
J. M. MACIEJOWSKI (Cambridge University, UK)	

Digital Control and Signal Processing Experimentation Work Station with TMS 34010 Graphics . . . . .	272
W. K. N. ANAKWA, W. YUAN, J. LEE, T. L. STEWART and R. JETTON (Bradley University, USA)	

Educational CAD for Digital Control Systems and its Application to a Roller-Holding Inverted Pendulum . . . . .	280
K. NAKANO, I. TURUMI, F. UEDA and H. MANNOUJI (Fukuoka Institute of Technology, Japan)	

- CAD of Multivariable Systems Using Frequency Concepts and Robustness Theory: An Aerospace Application . . . . . 288  
 J. P. BONNET, D. BEAUVOIS and G. DUC (*SUPELEC, France*)

### Power Systems 2

- A Test Facility for Closed-Loop Engine Control Studies . . . . . 296  
 S. Y. DUAN, R. DOUGLAS and S. THOMPSON (*Queen's University of Belfast, UK*)
- Multivariable Control of Electrohydraulic Drives . . . . . 304  
 H. SCHWARZ and L. GUO (*University of Duisburg, FR Germany*)
- Design of Optimal Controller for a Coal Fired Benson Boiler Based on a Modified Approximate Realisation Algorithm . . . . . 313  
 J. B. VAN HELMONT, A. J. J. VAN DER WEIDEN (*Technical University Delft, The Netherlands*) and H. ANNEVELD (*Stork Boilers, The Netherlands*)

### Robustness 2

- Robustness Characteristics of Fast-Sampling Digital Set-Point Tracking PID Controllers for Completely Irregular Linear Multivariable Plants . . . . . 321  
 B. PORTER and Z. ABIDIN (*University of Salford, UK*)
- Robust Observer Compensator for Continuous Systems with Uncertainties . . . . . 331  
 A. RACHID (*CRAN (CNRS) ESSTIN, France*) and H. BOULES (*EDF (DER), France*)
- Robustness Studies of Luré Systems with Multiple Nonlinearities . . . . . 338  
 H. MIYAGI and K. YAMASHITA (*Ryukyu University, Japan*)
- On the Extension of Robust Stability Problem with Structured Parameter Perturbations . . . . . 346  
 C.-L. CHEN and N. MUNRO (*UMIST, UK*)

### Process Applications 2

- Identification of Multi Input Multi Output Industrial Processes . . . . . 354  
 T. BACKX (*Datex Industry, The Netherlands*) and A. DAMEN (*Eindhoven University of Technology, The Netherlands*)

A Novel Design Method for MIMO Control Systems with Application to a Steam Generator . . . . .	362
D. FRANKE ( <i>Universität der Bundeswehr Hamburg, FR Germany</i> )	
Application of Multivariable Systems Theory to Controller Design for Linear Multipass Processes . . . . .	370
E. ROGERS, K. J. SMYTH and D. H. OWENS ( <i>University of Strathclyde, UK</i> )	
On Line Multivariable Identification of a Power Plant Using a Personal Computer . . . . .	377
L. M. FERNANDEZ,* M. CARDENAS,† A. M. VALENCIANO* and W. OTTENHEIMER* ( <i>*Institute of Cybernetics, Mathematics and Physics, Cuba; †Santa Cruz del Norte Power Plant, Cuba</i> )	

### Modelling

Positively Invariant Polyhedral Sets for Linear MIMO Discrete Systems under Modelling Uncertainties . . . . .	385
A. RACHID and C. HUMBERT ( <i>CRAN-LARA-ESSTIN, France</i> )	
Dynamic Positioning of Ships Modelling and Control . . . . .	390
R. FERREIRO and J. QUEVEDO ( <i>Universidad Politecnica de Cataluña, Spain</i> )	
Direct Design of Exact Model Matching Controller for Multivariable Minimum Phase Plant . . . . .	398
Y. YAMANE ( <i>Ashikaga Institute for Technology, Japan</i> ) and P. N. NIKIFORUK ( <i>University of Saskatchewan, Canada</i> )	
<i>Index of Contributors</i> . . . . .	406
