# TÉLÉCOMS DE LA TRANSMISSION À L'ARCHITECTURE DE RÉSEAUX

Claude Servin

Préface de J.-P. Arnaud

MASSON 

# CONTENTS

<b>Preface</b> .....	XI
<b>Foreword</b> .....	XIII
<b>Introduction</b> .....	1

## 1. DATA REPRESENTATION

1-1. Overview .....	7
1-2. Different information types .....	7
1-3. Information encoding .....	8
1-4. Data digitalisation .....	10
1-5. Internal data representation .....	14

## 2. DATA TRANSMISSION

2-1. Constitutive elements of a data link .....	19
2-2. Classification of transmission modes .....	20
2-3. Transmission media .....	25
2-4. Error processing .....	41
2-5. Numerical signal coding techniques .....	47
2-6. Baseband transmission .....	51
2-7. Broadband transmission .....	56
2-8. Junction .....	65
2-9. Link control .....	71

## 3. TRANSMISSION OPTIMISATION

3-1. Overview .....	77
3-2. Traffic quantification .....	77

3-3. Line utilisation optimisation .....	83
3-4. Data transmission optimisation .....	91
3-5. Communication protocols optimisation .....	93

#### **4. THE CONCEPT OF "NETWORK"**

4-1. Overview .....	113
4-2. Network topologies .....	114
4-3. Switched techniques .....	117
4-4. Relation types .....	122
4-5. Network mechanisms involved .....	125
4-6. Network security .....	140

#### **5. NETWORK ARCHITECTURE**

5-1 OSI Reference Model .....	155
5-2 TCP / IP .....	195
5-3 Manufacturer architectures .....	210

#### **6. ÉVOLUTION TO HIGH SPEED NETWORKS**

6-1 Overview .....	225
6-2 Frame relay .....	228
6-3 Cells relay (ATM) .....	232

<b>Annexes</b> .....	243
<b>Index</b> .....	249
