

BARRY B. BREY

THE INTEL MICROPROCESSORS

8086/8088, 80186,
80286, 80386, AND 80486

ARCHITECTURE, PROGRAMMING, AND INTERFACING

THIRD EDITION

9-3	The Programmable Peripheral Interface	352
9-4	The 8279 Programmable Keyboard/Display Interface	369
9-5	8254 Programmable Interval Timer	379
9-6	8251A Programmable Communications Interface	390
9-7	Analog-to-Digital (ADC) and Digital-to-Analog Converters (DAC)	399
9-8	Summary	407
9-9	Questions and Problems	409

10 INTERRUPTS 412

	Introduction	412
	Chapter Objectives	412
10-1	Basic Interrupt Processing	412
10-2	Hardware Interrupts	422
10-3	Expanding the Interrupt Structure	430
10-4	8259A Programmable Interrupt Controller	433
10-5	Real-Time Clock	447
10-6	Summary	449
10-7	Questions and Problems	450

11 DIRECT MEMORY ACCESS AND DMA-CONTROLLED I/O 452

	Introduction	452
	Chapter Objectives	452
11-1	Basic DMA Operation	453
11-2	The 8237 DMA Controller	454
11-3	Shared-Bus Operation	470
11-4	Disk Memory Systems	491
11-5	Video Systems	501
11-6	Summary	508
11-7	Questions and Problems	509

12 THE FAMILY OF ARITHMETIC COPROCESSORS 511

	Introduction	511
	Chapter Objectives	511
12-1	Data Formats for the Arithmetic Coprocessor	512
12-2	The 80X87 Architecture	515
12-3	Processor Interface	520
12-4	The Instruction Set	521
12-5	Programming with the Arithmetic Coprocessor	543
12-6	Summary	551
12-7	Questions and Problems	552

CONTENTS

PREFACE ix–xii

INTRODUCTION TO THE MICROPROCESSOR

1

Introduction	1
Chapter Objectives	1
1-1 The Evolution of the Microprocessor	2
1-2 Basic Microprocessor Architecture	4
1-3 Memory and the Microprocessor	8
1-4 The Programming Model	11
1-5 Real Mode Memory Addressing	17
1-6 Protected Mode Memory Addressing	22
1-7 Data Formats	27
1-8 The Instruction Set	32
1-9 Summary	37
1-10 Questions and Problems	39

ADDRESSING MODES

41

Introduction	41
Chapter Objectives	41
2-1 Data-Addressing Modes	42
2-2 Register Addressing	45
2-3 Immediate Addressing	46
2-4 Direct Data Addressing	48
2-5 Base-Plus-Index Addressing	53
2-6 Register Relative Addressing	56
2-7 Base Relative-Plus-Index Addressing	58
2-8 Scaled-Index Addressing	61

2-9	Program Memory-Addressing Modes	62
2-10	Stack Memory Addressing	65
2-11	Summary	67
2-12	Questions and Problems	70

3 DATA MOVEMENT INSTRUCTIONS 73

	Introduction	73
	Chapter Objectives	73
3-1	MOV Revisited	74
3-2	PUSH/POP	82
3-3	Load-Effective Address	87
3-4	String Data Transfers	90
3-5	Miscellaneous Data Transfer Instructions	96
3-6	Segment Override Prefix	100
3-7	Assembler Details	101
3-8	Summary	111
3-9	Questions and Problems	113

4 ARITHMETIC AND LOGIC INSTRUCTIONS 116

	Introduction	116
	Chapter Objectives	116
4-1	Addition, Subtraction, and Comparison	117
4-2	Multiplication and Division	127
4-3	BCD and ASCII Arithmetic	133
4-4	Basic Logic Instructions	136
4-5	Shifts and Rotates	143
4-6	String Comparisons	148
4-7	Summary	150
4-8	Questions and Problems	151

5 PROGRAM CONTROL INSTRUCTIONS 154

	Introduction	154
	Chapter Objectives	154
5-1	The Jump Group	154
5-2	Procedures	164
5-3	Introduction to Interrupts	170
5-4	Machine Control and Miscellaneous Instructions	175
5-5	Summary	178
5-6	Questions and Problems	180

6	PROGRAMMING THE MICROPROCESSOR	182
	Introduction	182
	Chapter Objectives	182
	6-1 Modular Programming	183
	6-2 Using the Keyboard and Video Display	191
	6-3 Data Conversions	199
	6-4 Disk Files	211
	6-5 Example Programs	223
	6-6 Hooks	236
	6-7 Summary	247
	6-8 Questions and Problems	248
7	8086/8088 HARDWARE SPECIFICATIONS	251
	Introduction	251
	Chapter Objectives	251
	7-1 Pinouts and the Pin Functions	252
	7-2 Clock Generator (8284A)	257
	7-3 Bus Buffering and Latching	260
	7-4 Bus Timing	266
	7-5 Ready and the Wait State	271
	7-6 Minimum Mode versus Maximum Mode	275
	7-7 Summary	278
	7-8 Questions and Problems	279
8	MEMORY INTERFACE	281
	Introduction	281
	Chapter Objectives	281
	8-1 Memory Devices	282
	8-2 Address Decoding	293
	8-3 8088 Memory Interface	303
	8-4 8086, 80286, and 80386SX Memory Interface	311
	8-5 80386DX and 80486 Memory Interface	319
	8-6 Dynamic RAM	323
	8-7 Summary	332
	8-8 Questions and Problems	334
9	BASIC I/O INTERFACE	337
	Introduction	337
	Chapter Objectives	337
	9-1 Introduction to I/O Interface	338
	9-2 I/O Port Address Decoding	345

THE 80186/80188 AND 80286 MICROPROCESSOR 555

- Introduction 555
- Chapter Objectives 555
- 13-1 80186/80188 Architecture 555
- 13-2 Programming the 80186/80188 Enhancements 564
- 13-3 80188 Example Interface 582
- 13-4 Introduction to the 80286 586
- 13-5 Summary 590
- 13-6 Questions and Problems 591

THE 80386 AND 80486 MICROPROCESSORS 593

- Introduction 593
- Chapter Objectives 593
- 14-1 Introduction to the 80386 Microprocessor 594
- 14-2 The 80386 Register Structure 612
- 14-3 The 80386 Instruction Set 617
- 14-4 80386 Memory Management 623
- 14-5 Moving to Protected Mode 632
- 14-6 Virtual 8086 Mode 638
- 14-7 The Memory Paging Mechanism 639
- 14-8 Introduction to the 80486 Microprocessor 645
- 14-9 80486 Instruction Set 656
- 14-10 Summary 659
- 14-11 Questions and Problems 660

APPENDICES

- A The Assembler and Disk Operating System 663
- B Instruction Set Summary 706
- C Flag Bit Changes 774
- D Bus Standards 776
- E Answers to Even-Numbered Questions and Problems 779

INDEX
