# Global Biogeochemical Cycles in the Climate System

*Edited by*

Ernst-Detlef Schulze  
Martin Heimann  
Sandy Harrison  
Elisabeth Holland  
Jonathan Lloyd  
Iain Colin Prentice  
David Schimel

Contributors .....	xiii
Foreword by Paul J. Crutzen .....	xv
Preface by David Schimel .....	xvii

## Introduction

1 <i>Uncertainties of Global Biogeochemical Predictions</i> , <b>E. D. Schulze</b> , D. S. S. Schimel .....	3
1.1 Introduction .....	3
1.2 The IGBP Transect Approach .....	3
1.2.1 The Patagonian Transect .....	3
1.2.2 The Australian Transect .....	5
1.2.3 The European Transect .....	5
1.3 Variability in Processes .....	6
1.4 Biome Approach and Functional Types .....	10
1.5 New Approaches to Functional Diversity .....	10
1.6 Conclusions .....	12
References .....	14
2 <i>Uncertainties of Global Climate Predictions</i> , <b>L. Bengtsson</b> .....	15
2.1 Introduction .....	15
2.2 Observational Evidence .....	16
2.3 Physical Rationale .....	17
2.3.1 Stochastic Forcing .....	17
2.3.2 Solar irradiation Changes .....	18
2.3.3 Volcanic Effects .....	18
2.3.4 Anthropogenic Effects .....	20
2.4 Response to Forcing of the Climate System .....	20
2.5 Results from Climate Change Prediction Experiments .....	23
2.6 Summary and Conclusions .....	26
References .....	27
3 <i>Uncertainties in the Atmospheric Chemical System</i> , <b>G. P. Brasseur</b> , E. A. H. Holland .....	31
3.1 Introduction .....	31
3.2 Synthetic View of Chemical Processes in the Troposphere .....	32
3.3 The IMAGES Model .....	33
3.4 Changes in the Chemical Composition of the Global Troposphere .....	34
3.5 Concluding Remarks .....	39
References .....	39
4 <i>Inferring Biogeochemical Sources and Sinks from Atmospheric Concentrations: General Consideration and Applications in Vegetation Canopies</i> , <b>M. Raupach</b> .....	41
4.1 Introduction .....	41
4.2 Scalar and Isotopic Molar Balances .....	43
4.2.1 General Principles .....	43
4.2.2 Single-Point Eulerian Equations .....	44
4.2.3 Source Terms for CO <sub>2</sub> .....	45
4.2.4 Single-Point Lagrangian Equations .....	45

4.3	Inverse Methods for Inferring Scalar Sources and Sinks in Canopies . . . . .	47
4.3.1	General Principles . . . . .	47
4.3.2	Localized Near Field Theory . . . . .	47
4.3.3	The Dispersion Matrix . . . . .	48
4.3.4	Turbulent Velocity Field . . . . .	49
4.3.5	Solutions for Forward, Inverse and Implicit Problems . . . . .	50
4.3.6	Field Tests . . . . .	52
4.4	Inverse Methods and Isotopes in Canopies . . . . .	53
4.4.1	Path Integrals and Keeling Plots . . . . .	53
4.4.2	Inverse Lagrangian Analysis of Isotopic Composition . . . . .	54
4.5	Summary and Conclusions. . . . .	55
	Appendix A . . . . .	57
	Appendix B . . . . .	57
	References . . . . .	58
5	<i>Biogeophysical Feedbacks and the Dynamics of Climate</i> , <b>M. Claussen</b> . . . . .	61
5.1	Introduction . . . . .	61
5.2	Synergisms . . . . .	62
5.2.1	High Northern Latitudes . . . . .	62
5.2.2	Subtropics. . . . .	62
5.3	Multiple Equilibria . . . . .	64
5.4	Transient Interaction . . . . .	66
5.5	Perspectives . . . . .	67
	References . . . . .	69
