Scheduling Computer and Manufacturing Processes

Second Edition

Springer

Contents

1	Introduction	1
	References	6
2	Basics	9
2.1	Sets and Relations	9
2.2	Problems, Algorithms, Complexity	11
2.2.1	Problems and Their Encoding	11
2.2.2	Algorithms	13
2.2.3	Complexity	16
2.3	Graphs and Networks	21
2.3.1	Basic Notions	21
2.3.2	Special Classes of Digraphs	22
2.3.3	Networks	25
2.4	Enumerative Methods	32
2.4.1	Dynamic Programming	32
2.4.2	Branch and Bound	33
2.5	Heuristic and Approximation Algorithms	35
2.5.1	Approximation Algorithms	35
2.5.2	Local Search Heuristics	37
	References	51
3	Definition, Analysis and Classification of Scheduling Problems	57
3.1	Definition of Scheduling Problems	57
3.2	Analysis of Scheduling Problems and Algorithms	62
3.3	Motivations for Deterministic Scheduling Problems	65
3.4	Classification of Deterministic Scheduling Problems	68
	References	71
4	Scheduling on One Processor	73
4.1	Minimizing Schedule Length	73
4.1.1	Scheduling with Release Times and Deadlines	74
4.1.2	Scheduling with Release Times and Delivery Times	81
4.2	Minimizing Mean Weighted Flow Time	83
4.3	Minimizing Due Date Involving Criteria	95

4.3.1	Maximum Lateness	95
4.3.2	Number of Tardy Tasks	104
4.3.3	Mean Tardiness	109
4.3.4	Mean Earliness	112
4.4	Minimizing Change-Over Cost	113
4.4.1	Setup Scheduling	113
4.4.2	Lot Size Scheduling	116
4.5	Other Criteria	121
4.5.1	Maximum Cost	121
4.5.2	Total Cost	126
	References	129
5	Scheduling on Parallel Processors	137
5.1	Minimizing Schedule Length	137
5.1.1	Identical Processors	137
5.1.2	Uniform and Unrelated Processors	157
5.2	Minimizing Mean Flow Time	166
5.2.1	Identical Processors	166
5.2.2	Uniform and Unrelated Processors	168
5.3	Minimizing Due Date Involving Criteria	171
5.3.1	Identical Processors	171
5.3.2	Uniform and Unrelated Processors	178
5.4	Other Models	180
5.4.1	Semi-Identical Processors	181
5.4.2	Scheduling Imprecise Computations	189
5.4.3	Lot Size Scheduling	192
	References	196
6	Communication Delays and Multiprocessor Tasks	205
6.1	Introductory Remarks	205
6.2	Scheduling Multiprocessor Tasks	210
6.2.1	Parallel Processors	210
6.2.2	Dedicated Processors	218
6.2.3	Refinement scheduling	224
6.3	Scheduling Uniprocessor Tasks with Communication Delays	226
6.3.1	Scheduling without Task Duplication	228
6.3.2	Scheduling with Task Duplication	230
6.3.3	Scheduling in Processor Networks	231
6.4	Scheduling Divisible Tasks	233

References	240
7 Scheduling in Flow and Open Shops	247
7.1 Introduction	247
7.1.1 The Flow Shop Scheduling Problem	247
7.1.2 Complexity	249
7.2 Exact Methods	250
7.2.1 The algorithms of Johnson and Akers	250
7.2.2 Dominance and Branching Rules	253
7.2.3 Lower Bounds	254
7.3 Approximation Algorithms	259
7.3.1 Priority Rule and Local Search Based Heuristics	259
7.3.2 Worst-Case Analysis	262
7.3.3 No Wait in Process	266
7.4 Open Shop Scheduling	267
References	269
8 Scheduling in Job Shops	273
8.1 Introduction	273
8.1.1 The Problem	273
8.1.2 Modeling	273
8.1.3 Complexity	276
8.1.4 The History	277
8.2 Exact Methods	280
8.2.1 Branch and Bound	280
8.2.2 Lower Bounds	281
8.2.3 Branching	282
8.2.4 Valid Inequalities	286
8.3 Approximation Algorithms	288
8.3.1 Priority Rules	288
8.3.3 Opportunistic Scheduling	293
8.3.4 Local Search	294
8.4 Conclusions	308
References	308
9 Scheduling under Resource Constraints	317
9.1 Classical Model	317
9.2 Scheduling Multiprocessor Tasks	328
9.3 Scheduling with Continuous Resources	342

9.3.1	Introductory Remarks	342
9.3.2	Processing Speed vs. Resource Amount Model	344
9.3.3	Processing Time vs. Resource Amount Model	353
9.3.4	Ready Time vs. Resource Amount Model	358
	References	362
10	Scheduling in Flexible Manufacturing Systems	367
10.1	Introductory Remarks	367
10.2	Scheduling Flexible Flow Shops	370
10.2.1	Problem Formulation	370
10.2.2	Heuristics and their Performance	371
10.2.3	Branch and Bound Algorithm	373
10.3	Scheduling Dynamic Job Shops	379
10.3.1	Introductory Remarks	379
10.3.2	Heuristic Algorithm for the Static Problem	380
10.3.3	Computational Experiments	386
10.4	Simultaneous Scheduling and Routing in some FMS	387
10.4.1	Problem Formulation	387
10.4.2	Vehicle Scheduling for a Fixed Production Schedule	389
10.4.3	Simultaneous Job and Vehicle Scheduling	394
10.5	Batch Scheduling in Flexible Flow Shops under Resource Constraints	396
10.5.1	Introduction - Statement of the Problem	396
10.5.2	Mathematical Formulation	398
10.5.3	Heuristic Solution Approach	407
10.5.4	Implementation and Computational Experiment	414
	References	415
11	Computer Integrated Production Scheduling	421
11.1	Scheduling in Computer Integrated Manufacturing	422
11.2	A Reference Model for Production Scheduling	427
11.3	IPS: An Intelligent Production Scheduling System	435
11.3.1	Interactive Scheduling	442
11.3.2	Knowledge-based Scheduling	456
11.3.3	Integrated Problem Solving	462
	References	466
	Index	469
