

Principles of Environmental Physics

SECOND EDITION

J.L. Monteith & M. Unsworth

CA46

CONTENTS

| | |
|---|------|
| PREFACE TO THE SECOND EDITION | v |
| LIST OF SYMBOLS | viii |
| 1. SCOPE OF ENVIRONMENTAL PHYSICS | 1 |
| 2. GAS LAWS | 4 |
| Pressure, volume and temperature | 4 |
| Specific heats | 6 |
| Lapse rate | 6 |
| Water and water vapour | 8 |
| Other gases | 15 |
| 3. TRANSPORT LAWS | 16 |
| General transfer equation | 16 |
| Molecular transfer processes | 18 |
| Diffusion coefficients | 21 |
| Radiation laws | 24 |
| 4. RADIATION ENVIRONMENT | 36 |
| Solar radiation | 36 |
| Terrestrial radiation | 50 |
| Net radiation | 54 |
| 5. MICROCLIMATOLOGY OF RADIATION (i) Interception | 58 |
| Direct solar radiation | 58 |
| Diffuse radiation | 70 |
| Radiation in crop canopies | 73 |
| 6. MICROCLIMATOLOGY OF RADIATION (ii) Absorption and reflection | 79 |
| Radiative properties of natural materials | 79 |
| Net radiation | 97 |
| 7. MOMENTUM TRANSFER | 101 |
| Boundary layers | 101 |
| Wind profiles and drag on uniform surfaces | 113 |
| Lodging and windthrow | 118 |
| 8. HEAT TRANSFER | 121 |
| Convection | 121 |
| Non-dimensional groups | 121 |
| Measurements of convection | 126 |
| Conduction | 138 |
| Insulation of animals | 140 |

iv Contents

| | | |
|-----|---|-----|
| 9. | MASS TRANSFER (i) Gases and water vapour | 146 |
| | Non-dimensional groups | 146 |
| | Measurement of mass transfer | 148 |
| | Ventilation | 151 |
| | Mass transfer through pores | 155 |
| | Coats and clothing | 163 |
| 10. | MASS TRANSFER (ii) Particles | 165 |
| | Steady motion | 165 |
| 11. | STEADY STATE HEAT BALANCE (i) Water surfaces and vegetation | 177 |
| | Heat balance equation | 177 |
| | Heat balance of thermometers | 180 |
| | Heat balance of surfaces | 184 |
| | Developments from the Penman Equation | 195 |
| 12. | STEADY STATE HEAT BALANCE (ii) Animals | 199 |
| | Heat balance components | 199 |
| | The thermo-neutral diagram | 205 |
| | Specification of the environment | 209 |
| | Case studies | 211 |
| 13. | TRANSIENT HEAT BALANCE | 218 |
| | Time constant | 219 |
| | General cases | 220 |
| | Heat flow in soil | 223 |
| 14. | CROP MICROMETEOROLOGY (i) Profiles and fluxes | 231 |
| | Profiles | 232 |
| | Profile equations and stability | 234 |
| | Measurement of flux above the canopy | 239 |
| 15. | CROP MICROMETEOROLOGY (ii) Interpretation of measurements | 245 |
| | Resistance analogues | 245 |
| | Case studies: | 252 |
| | Water vapour and transpiration | 252 |
| | Carbon dioxide and growth | 253 |
| | Sulphur dioxide and pollutant fluxes to crops | 256 |
| | Transport within canopies | 259 |
| | APPENDIX | 265 |
| | BIBLIOGRAPHY | 273 |
| | REFERENCES | 277 |
| | INDEX | 287 |
