Introduction

Contents

Introduction	11
1. Microbalance	15
2. Determination of Carbon and Hydrogen in a Rapid Oxygen Stream	18
3. Determination of Several Elements in a Single Weighed Sample	53
4. Determination of Nitrogen	70
5. Determination of Halogens and Sulphur in a Flask	99
6. Determination of Elements by Fusion with Alkaline Agents in a Microbomb	117
7. Determination of Active Hydrogen	135
8. Determination of Alkoxy Groups	147
9. Determination of Thioalkyl Groups	154
10. Determination of Oxyethylene Groups	156
11. Determination of Carbonyl Group by Oximation	158
12. Determination of Amine Nitrogen	163
13. Determination of Nitro Group in Saturated Aliphatic and Alicyclic Nitro Compounds	167
14. Determination of Aromatic Nitro Compounds	169
15. Bromatometric Determination of Organic Sulphides	170
16. Determination of Water	172
17. Aquametric Determination of Alcohols	198
18. Aquametric Determination of Carbonyl Group	200
19. Polyethylene Box with Controlled Atmosphere	202
Appendices	208
References	219
Index	226
