
INTRODUCTION TO CHEMICAL ENGINEERING THERMODYNAMICS

J.M. SMITH
H.C. VAN NESS

THIRD EDITION

INTERNATIONAL STUDENT EDITION

A.54-124 EX.1

INTRODUCTION TO CHEMICAL ENGINEERING THERMODYNAMICS

Third Edition

J. M. Smith

Professor of Chemical Engineering
University of California, Davis

H. C. Van Ness

Professor of Chemical Engineering
Rensselaer Polytechnic Institute

INTERNATIONAL STUDENT EDITION

McGraw-Hill Book Company

Auckland Bogotá Guatemala Hamburg Johannesburg Lisbon
London Madrid Mexico New Delhi Panama Paris San Juan
São Paulo Singapore Sydney Tokyo

9	4-5	The Standard Heat of Formation	Pressure	1-10	111
11	4-6	The Standard Heat of Combustion	Work	1-11	122
12	4-7	Effect of Temperature on Standard Heat of Reaction	Heat	1-12	123
18	4-8	Heat Effects of Industrial Reactions		1-13	127
22		The First Law and Other Basic Concepts		Chapter 2	141
22		The Second Law and Other Basic Concepts		Chapter 3	141
22		Joule's Experiment		2-1	141
23	1-5	Internal Energy		2-2	141
23	2-3	Formulation of the First Law of Thermodynamics		2-3	142
26	2-4	The Thermodynamic State and State Functions		2-4	145
31	2-5	Enthalpy		2-5	147
32	2-6	The Steady-State Flow Process and the Concept of Enthalpy		2-6	149
38	2-7	Equilibrium and the Second Law Limitations and Real Processes		2-7	151
39	2-8	The Phase Rule and Irreversible Processes		2-8	154
41	2-9	The Residual Properties and the Most Probable Distribution		2-9	157
48	2-10	Heat Capacity and Specific Heat (Calorimetry)		2-10	159
	3-1	The Third Law of Thermodynamics		3-1	161
57		Volume Properties of Pure Fluids		Chapter 3	161
57		Thermodynamic Properties of Pure Substances		Chapter 4	161
63	3-1	The PVT Behavior of Pure Substances		3-1	161
63	3-2	The Virial Equation and the Equations of State		3-2	161
63	3-3	The Ideal Gas		3-3	161
63	3-4	Applications of the Virial Equation and the Equations of State		3-4	161
63	3-5	Cubic Equations of State		3-5	161
63	3-6	Generalized Correlations and the Accentric Factor		3-6	161
63	3-7	The Behavior of Liquids and the Equations of State		3-7	161
63	3-8	Equations of State for Liquids and Solids		3-8	161
63	3-9	Equations of State for Gases and Liquids		3-9	161
63	3-10	Equations of State for Solids		3-10	161
63	3-11	Equations of State for Polymers		3-11	161
63	3-12	Equations of State for Crystals		3-12	161
63	3-13	Equations of State for Glasses		3-13	161
63	3-14	Equations of State for Amorphous Solids		3-14	161
63	3-15	Equations of State for Liquids		3-15	161
63	3-16	Equations of State for Solids		3-16	161
63	3-17	Equations of State for Polymers		3-17	161
63	3-18	Equations of State for Crystals		3-18	161
63	3-19	Equations of State for Glasses		3-19	161
63	3-20	Equations of State for Amorphous Solids		3-20	161
63	3-21	Equations of State for Liquids		3-21	161
63	3-22	Equations of State for Solids		3-22	161
63	3-23	Equations of State for Polymers		3-23	161
63	3-24	Equations of State for Crystals		3-24	161
63	3-25	Equations of State for Glasses		3-25	161
63	3-26	Equations of State for Amorphous Solids		3-26	161
63	3-27	Equations of State for Liquids		3-27	161
63	3-28	Equations of State for Solids		3-28	161
63	3-29	Equations of State for Polymers		3-29	161
63	3-30	Equations of State for Crystals		3-30	161
63	3-31	Equations of State for Glasses		3-31	161
63	3-32	Equations of State for Amorphous Solids		3-32	161
63	3-33	Equations of State for Liquids		3-33	161
63	3-34	Equations of State for Solids		3-34	161
63	3-35	Equations of State for Polymers		3-35	161
63	3-36	Equations of State for Crystals		3-36	161
63	3-37	Equations of State for Glasses		3-37	161
63	3-38	Equations of State for Amorphous Solids		3-38	161
63	3-39	Equations of State for Liquids		3-39	161
63	3-40	Equations of State for Solids		3-40	161
63	3-41	Equations of State for Polymers		3-41	161
63	3-42	Equations of State for Crystals		3-42	161
63	3-43	Equations of State for Glasses		3-43	161
63	3-44	Equations of State for Amorphous Solids		3-44	161
63	3-45	Equations of State for Liquids		3-45	161
63	3-46	Equations of State for Solids		3-46	161
63	3-47	Equations of State for Polymers		3-47	161
63	3-48	Equations of State for Crystals		3-48	161
63	3-49	Equations of State for Glasses		3-49	161
63	3-50	Equations of State for Amorphous Solids		3-50	161
63	3-51	Equations of State for Liquids		3-51	161
63	3-52	Equations of State for Solids		3-52	161
63	3-53	Equations of State for Polymers		3-53	161
63	3-54	Equations of State for Crystals		3-54	161
63	3-55	Equations of State for Glasses		3-55	161
63	3-56	Equations of State for Amorphous Solids		3-56	161
63	3-57	Equations of State for Liquids		3-57	161
63	3-58	Equations of State for Solids		3-58	161
63	3-59	Equations of State for Polymers		3-59	161
63	3-60	Equations of State for Crystals		3-60	161
63	3-61	Equations of State for Glasses		3-61	161
63	3-62	Equations of State for Amorphous Solids		3-62	161
63	3-63	Equations of State for Liquids		3-63	161
63	3-64	Equations of State for Solids		3-64	161
63	3-65	Equations of State for Polymers		3-65	161
63	3-66	Equations of State for Crystals		3-66	161
63	3-67	Equations of State for Glasses		3-67	161
63	3-68	Equations of State for Amorphous Solids		3-68	161
63	3-69	Equations of State for Liquids		3-69	161
63	3-70	Equations of State for Solids		3-70	161
63	3-71	Equations of State for Polymers		3-71	161
63	3-72	Equations of State for Crystals		3-72	161
63	3-73	Equations of State for Glasses		3-73	161
63	3-74	Equations of State for Amorphous Solids		3-74	161
63	3-75	Equations of State for Liquids		3-75	161
63	3-76	Equations of State for Solids		3-76	161
63	3-77	Equations of State for Polymers		3-77	161
63	3-78	Equations of State for Crystals		3-78	161
63	3-79	Equations of State for Glasses		3-79	161
63	3-80	Equations of State for Amorphous Solids		3-80	161
63	3-81	Equations of State for Liquids		3-81	161
63	3-82	Equations of State for Solids		3-82	161
63	3-83	Equations of State for Polymers		3-83	161
63	3-84	Equations of State for Crystals		3-84	161
63	3-85	Equations of State for Glasses		3-85	161
63	3-86	Equations of State for Amorphous Solids		3-86	161
63	3-87	Equations of State for Liquids		3-87	161
63	3-88	Equations of State for Solids		3-88	161
63	3-89	Equations of State for Polymers		3-89	161
63	3-90	Equations of State for Crystals		3-90	161
63	3-91	Equations of State for Glasses		3-91	161
63	3-92	Equations of State for Amorphous Solids		3-92	161
63	3-93	Equations of State for Liquids		3-93	161
63	3-94	Equations of State for Solids		3-94	161
63	3-95	Equations of State for Polymers		3-95	161
63	3-96	Equations of State for Crystals		3-96	161
63	3-97	Equations of State for Glasses		3-97	161
63	3-98	Equations of State for Amorphous Solids		3-98	161
63	3-99	Equations of State for Liquids		3-99	161
63	3-100	Equations of State for Solids		3-100	161

Contents

Preface

List of Symbols

Chapter 1 Introduction

1-1	The Scope of Thermodynamics	1
1-2	Fundamental Quantities	2
1-3	Time	2
1-4	Length	2
1-5	Mass	3
1-6	Force	3
1-7	Temperature	5
1-8	Secondary Quantities	9
1-9	Volume	9

1-10	Pressure	9
1-11	Work	11
1-12	Energy	12
1-13	Heat	18
Chapter 2 The First Law and Other Basic Concepts		22
2-1	Joule's Experiments	22
2-2	Internal Energy	23
2-3	Formulation of the First Law of Thermodynamics	23
2-4	The Thermodynamic State and State Functions	26
2-5	Enthalpy	31
2-6	The Steady-State Flow Process	32
2-7	Equilibrium	38
2-8	The Phase Rule	39
2-9	The Reversible Process	41
2-10	Heat Capacity and Specific Heat	48
Chapter 3 Volumetric Properties of Pure Fluids		57
3-1	The <i>PVT</i> Behavior of Pure Substances	57
3-2	The Virial Equation	63
3-3	The Ideal Gas	66
3-4	Applications of the Virial Equation	80
3-5	Cubic Equations of State	81
3-6	Generalized Correlations and the Acentric Factor	85
3-7	The Behavior of Liquids	94
Chapter 4 Heat Effects		104
4-1	Heat Capacities of Gases as a Function of Temperature	105
4-2	Heat Capacities of Solids and Liquids	112
4-3	Heat Effects Accompanying Phase Changes of Pure Substances	114
4-4	The Standard Heat of Reaction	116

4-5	The Standard Heat of Formation	118
4-6	The Standard Heat of Combustion	122
4-7	Effect of Temperature on the Standard Heat of Reaction	123
4-8	Heat Effects of Industrial Reactions	127
Chapter 5 The Second Law of Thermodynamics		140
5-1	Statements of the Second Law	141
5-2	The Heat Engine	142
5-3	The Thermodynamic Temperature Scale	145
5-4	The Ideal-Gas Temperature Scale	147
5-5	The Concept of Entropy	149
5-6	Second-Law Limitations and Real Processes	152
5-7	Entropy Changes and Irreversibility	154
5-8	Entropy from the Microscopic Viewpoint (Statistical Thermodynamics)	159
5-9	The Third Law of Thermodynamics	162
Chapter 6 Thermodynamic Properties of Fluids		168
6-1	Relationships among the Thermodynamic Properties	169
6-2	Thermodynamic Properties of a Single-Phase System	172
6-3	Two-Phase Systems	184
6-4	Types of Thermodynamic Diagrams	187
6-5	Tables of Thermodynamic Properties	191
6-6	Generalized Correlations of Thermodynamic Properties for Gases	192
Chapter 7 Thermodynamic Properties of Homogeneous Mixtures		213
7-1	Property Relationships for Systems of Variable Composition	214

7-2	Partial Molar Properties	216
7-3	Fugacity. Fugacity Coefficient	227
7-4	Fugacities in Ideal Solutions. Standard States	240
7-5	Property Changes of Mixing. Activity	245
7-6	Heat Effects of Mixing Processes	252
7-7	Excess Properties. Activity Coefficients	265
7-8	Gas Mixtures	270
Chapter 8 Phase Equilibria		
8-1	The Nature of Equilibrium	291
8-2	Criteria of Equilibrium	291
8-3	The Phase Rule. Duhem's Theorem	295
8-4	Vapor-Liquid Equilibrium. The Fundamental Problem. Idealizations	296
8-5	Phase Diagrams for Miscible Systems	302
8-6	Vapor-Liquid Equilibrium Calculations for Miscible Systems	314
8-7	Activity Coefficients from Experimental Data	331
8-8	Gibbs-Duhem Equation. Coexistence Equation. Stability	345
8-9	Systems of Limited Liquid-Phase Miscibility	357
Chapter 9 Chemical-Reaction Equilibria		
9-1	The Reaction Coordinate	377
9-2	Application of the Criteria for Equilibrium to Chemical Reactions	383
9-3	The Standard Gibbs Free Energy Change and the Equilibrium Constant	384
9-4	Effect of Temperature on the Equilibrium Constant	389
9-5	Evaluation of Equilibrium Constants	391
9-6	Relations between Equilibrium Constants and Composition	398
9-7	Calculation of Equilibrium Conversions for Single Reactions	403
9-8	The Phase Rule and Duhem's Theorem for Reacting Systems	415
9-9	Multireaction Equilibria	419

Chapter 10	Thermodynamics of Flow Processes	439
10-1	Fundamental Equations	440
10-2	Flow in Pipes	453
10-3	Maximum Velocity in Pipe Flow	460
10-4	Metering and Throttling Processes	461
10-5	Nozzles	465
10-6	Compressors	470
10-7	Ejectors	477
10-8	Temperature Measurements at High Velocities	477
Chapter 11	Conversion of Heat into Work by Power Cycles	488
11-1	Vapor Cycles: The Steam Power Plant	489
11-2	Analysis of the Steam-Power-Plant Cycle	492
11-3	Internal-Combustion Engines. The Otto Engine	497
11-4	The Diesel Engine	500
11-5	The Combustion-Gas-Turbine Power Plant	503
11-6	Jet Engines. Jet-Propulsion Cycles	507
11-7	Rocket Engines	509
Chapter 12	Refrigeration and Liquefaction	513
12-1	The Carnot Refrigeration Cycle	514
12-2	The Air-Refrigeration Cycle	516
12-3	The Vapor-Compression Cycle	517
12-4	Comparison of Refrigeration Cycles	520
12-5	The Choice of Refrigerant	522
12-6	Absorption Refrigeration	530
12-7	The Heat Pump	535
12-8	Liquefaction Processes	536
Chapter 13	Thermodynamic Analysis of Processes	546
13-1	The Calculation of Ideal Work	546
13-2	Lost Work	551
13-3	Thermodynamic Analysis of Steady-Flow Processes	554

Appendix A Conversion Factors	567
Appendix B Critical Constants and Acentric Factors	569
Appendix C Steam Tables	571
Appendix D Supplement to Chapter 7	603
D-1 Partial Molar Property Equation	603
D-2 The Fugacity of a Solution and Its Relation to the Component Fugacities	605
D-3 General Equations for the Gibbs Free Energy and Related Functions	608
D-4 Equations Based on T and V as Independent Variables	614
D-5 Activity Coefficients in Relation to the Choice of Standard States	616
Index	621
