PREFACE xv

1 GENERAL INFORMATION 1

- 1.1 On Kalman Filtering 1
 - 1.1.1 *First of All: What Is a Kalman Filter?* 1
 - 1.1.2 *How It Came to Be Called a Filter* 2
 - 1.1.3 *Its Mathematical Foundations* 3
 - 1.1.4 *What It Is Used For* 3
- 1.2 On Estimation Methods 5
 - 1.2.1 *Beginnings of Estimation Theory* 5
 - 1.2.2 *Method of Least Squares* 7
 - 1.2.3 *Gramian Matrix and Observability* 10
 - 1.2.4 *Introduction of Probability Theory* 10
 - 1.2.5 *Wiener Filter* 11
 - 1.2.6 *Kalman Filter* 12
 - 1.2.7 *Square Root Methods and All That* 16
 - 1.2.8 *Beyond Kalman Filtering* 17
- 1.3 On the Notation Used in This Book 19
 - 1.3.1 *Parameters, Variables, and Variates* 19
 - 1.3.2 *Symbolic Notation* 20

|-------|--|----|
| 1.3.3 | <i>Abbreviations Used</i> | 22 |
| 1.3.4 | <i>Notation for Algorithm Listings</i> | 22 |
| 1.4 | Chapter Summary | 24 |
| | Exercises | 25 |

2 LINEAR DYNAMIC SYSTEMS 27

| | | |
|-------|---|----|
| 2.1 | Chapter Focus | 27 |
| 2.1.1 | <i>Main Points to Be Covered</i> | 28 |
| 2.2 | Dynamic Systems | 29 |
| 2.2.1 | <i>Dynamic Systems Represented by Differential Equations</i> | 29 |
| 2.2.2 | <i>State Variables and State Equations</i> | 30 |
| 2.2.3 | <i>Continuous Time and Discrete Time</i> | 32 |
| 2.2.4 | <i>Time-Varying Systems and Time-Invariant Systems</i> | 32 |
| 2.3 | Continuous Linear Systems and Their Solutions | 32 |
| 2.3.1 | <i>Input/Output Models of Linear Dynamic Systems</i> | 32 |
| 2.3.2 | <i>Dynamic Coefficient Matrices and Input Coupling Matrices</i> | 33 |
| 2.3.3 | <i>Companion Form for Higher-Order Derivatives</i> | 34 |
| 2.3.4 | <i>Outputs and Measurement Sensitivity Matrices</i> | 35 |
| 2.3.5 | <i>Difference Equations and State Transition Matrices</i> | 35 |
| 2.3.6 | <i>Solving Differential Equations for STMs</i> | 36 |
| 2.3.7 | <i>Solution of Nonhomogeneous Equations</i> | 40 |
| 2.3.8 | <i>Closed-Form Solutions of Time-Invariant Systems</i> | 40 |
| 2.3.9 | <i>Time-Varying Systems</i> | 42 |
| 2.4 | Discrete Linear Systems and Their Solutions | 42 |
| 2.4.1 | <i>Discretized Linear Systems</i> | 42 |
| 2.4.2 | <i>Time-Invariant Systems</i> | 43 |
| 2.5 | Observability of Linear Dynamic System Models | 43 |
| 2.5.1 | <i>Observability of Time-Invariant Systems</i> | 44 |
| 2.5.2 | <i>Controllability of Time-Invariant Linear Systems</i> | 45 |
| 2.6 | Procedures for Computing Matrix Exponentials | 46 |
| 2.6.1 | <i>Padé Approximation of the Matrix Exponential</i> | 46 |
| 2.6.2 | <i>Scaling and Squaring</i> | 48 |
| 2.6.3 | <i>An Eclectic Procedure</i> | 48 |
| 2.7 | Chapter Summary | 50 |
| | Exercises | 52 |

| | | |
|----------|--|-----------|
| 3 | RANDOM PROCESSES AND STOCHASTIC SYSTEMS | 55 |
| 3.1 | Chapter Focus | 55 |
| 3.1.1 | <i>Discovery and Modeling of Random Processes</i> | 55 |
| 3.1.2 | <i>Main Points to Be Covered</i> | 56 |
| 3.1.3 | <i>Topics Not Covered</i> | 57 |
| 3.2 | Probability and Random Variables | 57 |
| 3.2.1 | <i>An Example of a Random Variable</i> | 57 |
| 3.2.2 | <i>Probability Distributions and Densities</i> | 60 |
| 3.2.3 | <i>Gaussian Probability Densities</i> | 60 |
| 3.2.4 | <i>Joint Probabilities and Conditional Probabilities</i> | 62 |
| 3.3 | Statistical Properties of Random Variables | 64 |
| 3.3.1 | <i>Expected Values of Random Variables</i> | 64 |
| 3.3.2 | <i>Functions of Random Variables</i> | 65 |
| 3.4 | Statistical Properties of Random Processes | 66 |
| 3.4.1 | <i>Random Processes (RPs)</i> | 66 |
| 3.4.2 | <i>Mean, Correlation, and Covariance</i> | 67 |
| 3.4.3 | <i>Orthogonal Processes and White Noise</i> | 67 |
| 3.4.4 | <i>Strict Sense and Wide Sense Stationarity (WSS)</i> | 68 |
| 3.4.5 | <i>Ergodic Random Processes</i> | 69 |
| 3.4.6 | <i>Markov Processes and Sequences</i> | 69 |
| 3.4.7 | <i>Gaussian Processes</i> | 70 |
| 3.4.8 | <i>Simulating Multivariate Gaussian Processes</i> | 70 |
| 3.4.9 | <i>Power Spectral Density (PSD)</i> | 71 |
| 3.5 | Linear System Models of Random Processes and Sequences | 73 |
| 3.5.1 | <i>Stochastic Differential Equations for Random Processes</i> | 74 |
| 3.5.2 | <i>Discrete Model of a Random Sequence</i> | 76 |
| 3.5.3 | <i>Autoregressive Processes and Linear Predictive Models</i> | 78 |
| 3.6 | Shaping Filters and State Augmentation | 79 |
| 3.6.1 | <i>Correlated Process Noise Models</i> | 79 |
| 3.6.2 | <i>Correlated Measurement Noise Models</i> | 80 |
| 3.7 | Covariance Propagation Equations | 83 |
| 3.7.1 | <i>Propagation in Continuous Time</i> | 83 |
| 3.7.2 | <i>Covariance Propagation in Discrete Time</i> | 87 |
| 3.7.3 | <i>Dependence of Q_k on $Q(t)$</i> | 88 |
| 3.8 | Orthogonality Principle | 91 |
| 3.8.1 | <i>Estimators Minimizing Expected Quadratic Loss Functions</i> | 91 |

| | | |
|----------|---|------------|
| 3.8.2 | <i>Orthogonality Principle</i> | 93 |
| 3.8.3 | <i>Geometric Interpretation of Orthogonality</i> | 95 |
| 3.9 | Chapter Summary | 95 |
| 3.9.1 | <i>Important Points to Remember</i> | 95 |
| 3.9.2 | <i>Important Equations to Remember</i> | 96 |
| | Exercises | 97 |
| 4 | LINEAR OPTIMAL FILTERS, PREDICTORS AND SMOOTHERS | 106 |
| 4.1 | Chapter Focus | 106 |
| 4.1.1 | <i>Estimation Problem</i> | 106 |
| 4.1.2 | <i>Main Points to Be Covered</i> | 107 |
| 4.2 | Kalman Filter | 108 |
| 4.2.1 | <i>Summary of Equations for the Discrete-Time Kalman Estimator</i> | 112 |
| 4.2.2 | <i>Treating Vector Measurements with Uncorrelated Errors as Scalars</i> | 115 |
| 4.2.3 | <i>Using the Covariance Equations for Design Analysis</i> | 116 |
| 4.3 | Kalman-Bucy Filter | 116 |
| 4.4 | Optimal Linear Predictors | 118 |
| 4.4.1 | <i>Prediction as Filtering</i> | 118 |
| 4.4.2 | <i>Accommodating Missing Data</i> | 118 |
| 4.5 | Correlated Noise Sources | 119 |
| 4.5.1 | <i>Correlation between Plant and Measurement Noise</i> | 119 |
| 4.5.2 | <i>Time Correlated Measurements</i> | 119 |
| 4.6 | Relationships between Kalman and Wiener Filters | 120 |
| 4.7 | Quadratic Loss Functions | 120 |
| 4.7.1 | <i>Quadratic Loss Functions of Estimation Error</i> | 121 |
| 4.7.2 | <i>Expected Value of a Quadratic Loss Function</i> | 121 |
| 4.7.3 | <i>Unbiased Estimates and Quadratic Loss</i> | 122 |
| 4.8 | Matrix Riccati Differential Equation | 123 |
| 4.8.1 | <i>Transformation to a Linear Equation</i> | 123 |
| 4.8.2 | <i>Time-Invariant Problem</i> | 124 |
| 4.8.3 | <i>Scalar Time-Invariant Problem</i> | 124 |
| 4.8.4 | <i>Parametric Dependence of the Scalar Time-Invariant Solution</i> | 127 |
| 4.8.5 | <i>Convergence Issues</i> | 129 |
| 4.8.6 | <i>Closed-Form Solution of the Algebraic Riccati Equation</i> | 131 |

| | | |
