McGraw Hill Series on Telecommunications

the INTELLIGENT NETWORK STANDARDS

THEIR APPLICATION TO SERVICES

- Personal communication services (PCS)
- Universal personal telecommunications (UPT)
- Freephone

IGOR FAYNBERG, LAWRENCE R. GABUZDA,
MARC P. KAPLAN, NITIN J. SHAH

Contents

Foreword ix
Preface xi

Chapter 1. Introduction 1

1.1 Overview of This Book 1
1.2 Definition of the Intelligent Network 2
1.3 Evolution of the Intelligent Network 3
1.4 Intelligent Network-Based Services 10
1.5 Relevant Standards Bodies 16
1.6 The Structure and Contents of the ITU-T IN Recommendations 18

Chapter 2. Principles of IN 21

2.1 Overview 21
2.2 Recommendation Q.1201, Principles of Intelligent Network Architecture 22
2.3 An Interpretation of the Four-Plane IN Model in Light of Computer Architectural Concepts 31
2.4 On the Role and Structure of Q.12*x*1 Recommendations 37

Chapter 3. IN Service Plane 39

3.1 Overview 39
3.2 Recommendation Q.1202, Intelligent Network—Service Plane Architecture 40
3.3 Service Aspects of Recommendation Q.1211, Introduction to Intelligent Network Capability Set 1 42
3.4 Service Aspects of (Draft) Recommendation Q.1221, Introduction to Intelligent Network Capability Set 2 45
3.5 Draft Recommendation Q.1222, Service Plane for Intelligent Network Capability Set 2 49

Chapter 4. IN Global Functional Plane 51

4.1 Overview 51
4.2 Recommendation Q.1203, Intelligent Network—Global Functional Plane 52

4.3 Recommendation Q.1213, Intelligent Network—Global Functional Plane for CS-1 60
4.4 Draft Recommendation Q.1223, Intelligent Network—Global Functional Plane for CS-2 (Highlights) 77

Chapter 5. IN Distributed Functional Plane 83

5.1 Overview 83
5.2 Recommendation Q.1204, Intelligent Network—Distributed Functional Plane 85
5.3 Relevant Aspects of Recommendation Q.1211, Introduction to Intelligent Network Capability Set 1 106
5.4 Recommendatin Q.1214, Intelligent Network—Distributed Functional Plane for CS-1 111
5.5 Draft Recommendation Q.1224, Intelligent Network—Distributed unctional Plane for CS-2 (Highlights) 138

Chapter 6. IN Physical Plane 157

6.1 Overview 157
6.2 Recommendation Q.1205, Intelligent Network—Physical Plane 158
6.3 Recommendation Q.1208, General Aspects of the Intelligent Network Application Protocol 162
6.4 Relevant Aspects of Recommendation Q.1211, Introduction to Intelligent Network Capability Set 1 172
6.5 Recommendation Q.1215, Intelligent Network—Physical Plane for CS-1 173
6.6 Recommendation Q.1218, Intelligent Network Interfaces 176
6.7 Draft Recommendation Q.1225, Intelligent Network—Physical Plane for CS-2 201

Chapter 7. Current IN Standardization Work 203

7.1 Overview 203
7.2 CS-3—The Starting Point 204
7.3 ITU-T "Long-Term Architecture" 212
7.4 Regional IN Standards 217

Glossary of Acronyms 221

Bibliography 227

Index 231
