

TECHNIQUES FOR CORROSION MEASUREMENT

Papers presented at the CORROSION/92 symposium "Techniques for Corrosion Measurement." Sponsored by Unit Committee T-3L on Technologies for Corrosion Measurements.

*Arturo Bronson
Symposium Chairman*

*Garry Warren
Symposium Vice Chairman*

AN OFFICIAL NACE PUBLICATION

TABLE OF CONTENTS

Preface

<i>A. Bronson, G. Warren</i>	vii
------------------------------------	-----

STEADY-STATE TECHNIQUES

Galvanostatic Measurement of Polarization Resistance

<i>D.A. Jones, R.L. Howryla, I. Chatterjee, F. Wei</i>	1-1
--	-----

Potentiodynamic Polarization Measurement by Controlling Potential Inside a Crevice

<i>S. Wang, S.A. Bradford</i>	2-1
-------------------------------------	-----

Potentiodynamic Polarization Measurements for Predicting Pitting of Copper in Cooling Waters

<i>P. Singh, G.T. Galyon, J.H. Dorler, J. Zahavi, R. Ronkese</i>	3-1
--	-----

Evaluation of Polarization Curves for Copper Alloys Exposed to Natural and Artificial Seawater

<i>F. Mansfeld, G. Liu, C.H. Tsai, H. Shih, B. Little</i>	4-1
---	-----

Electrochemical Techniques for Studying the Corrosion Behavior of Metallic Implant Materials

<i>P. Kovacs</i>	5-1
------------------------	-----

An Electrochemical Corrosion Test for Ranking Alloys for the Use in Some Common Environments

<i>M. Marek</i>	6-1
-----------------------	-----

MECHANICAL-CHEMICAL TECHNIQUES

Measuring and Modelling of Transients During Early Stages of Corrosion

<i>H.S. Isaacs, J-H. Cho, A.J. Davenport, G.S. Frankel</i>	7-1
--	-----

Repassivation of 304 Stainless Steel Investigated With a Single Scratch Test

<i>T.A. Adler, R.P. Walters</i>	8-1
---------------------------------------	-----

Experimental Determination of the Effects of the Surrounding Passive Film on Scratched Electrode Behavior

<i>R.G. Kelly, P.D. Bastek, R.C. Newman</i>	9-1
---	-----

Novel Technique for Measuring Stress Corrosion Cracking of Metallic Electrodes in Aqueous Solutions: Theory and Applications <i>K. Habib, G. Carmichael, R. Lakes, W. Stwalley</i>	10-1
---	------

The Effect of Grain Diameter and Chemical Composition on the Transient Current Response in Fe-Cr-Ni Alloys <i>S.K. Varma, M.M. de Lugo, A. Bronson</i>	11-1
---	------

PASSIVE TECHNIQUES

Electrochemical Noise Techniques for Determining Corrosion Rates and Mechanisms <i>A.N. Rothwell, D.A. Eden</i>	12-1
--	------

Electrochemical Noise for Carbon Steel in Sodium Chloride Solutions—Effect of Chloride and Oxygen Activity <i>J.B. Lumsden, M.W. Kendig, S. Jeanjaquet</i>	13-1
---	------

Estimation of Survival Probabilities in Pitting Corrosion Experiments <i>J. Rojo, A. Bronson</i>	14-1
---	------

On-Line Corrosion Monitoring and Control Within Continuous Food Sterilizers <i>A. Marshall, A. Speirs</i>	15-1
--	------

TRANSIENT TECHNIQUES

Application of Measurement Models for the Analysis of Impedance Spectra <i>P. Agarwal, O.C. Moghissi, M.E. Orazem, L.H. Garcia-Rubio</i>	16-1
---	------

The “Stepping Down the Current” Method: A New Corrosion Measurement for Cathodic Protection of Steel <i>A.L. Raharinaivo, J.J. Carpio</i>	17-1
--	------

Monitoring of Localized Corrosion with Electrochemical Impedance Spectroscopy (EIS) <i>F. Mansfeld, Y. Wang, H. Xiao, H. Shih</i>	18-1
--	------

Use of the Haruyama Break-Point Frequency Method to Evaluate Coatings <i>J.N. Murray, H.P. Hack</i>	19-1
--	------

AC Impedance Spectra of Pipes Buried in Soil <i>A. Kumar, A. Odeh, O. Valente, V. Van Blaricum</i>	20-1
---	------

Application of Electrochemical Impedance Techniques to Estimate Corrosion Damage of Reinforcing Bars in Concrete

N. Goto, K. Matsuoka, S. Ito 21-1

TECHNIQUES USING ELECTRODE OR PROBE CHARACTERISTICS

The Use of Microelectrodes to Determine the Local Conditions Within Active Pits

J.L. Luo, Y.C. Lu, M.B. Ives 22-1

Application of 2D Scanning Vibrating Probe Measurements to the Study of Corrosion Inhibitors

A.J. Davenport, A.J. Aldykiewicz Jr., H.S. Isaacs 23-1
