INTRODUCTION TO
MATERIAL
AND
ENERGY
BALANCES

CONTENTS

CHAPTER 1 INTRODUCTION	1
1.1 THE ROLE OF THE CHEMICAL ENGINEER	1
1.2 THE ROLE OF BALANCE CALCULATIONS	7
1.3 REVIEW OF BASIC CONCEPTS	11
1.3.1 The Conservation Principles	12
1.3.2 Chemical Stoichiometry	14
1.3.3 Equation-Solving Concepts	18
1.3.4 Dimensional Quantities and Their Manipulation	24
1.4 PREVIEW OF SUBSEQUENT CHAPTERS	31
CHAPTER 2 MATERIAL BALANCES IN NONREACTING SYSTEMS	33
2.1 FORMULATING THE MATERIAL BALANCE PROBLEM	33
2.1.1 Material Balance Variables	34
2.1.2 Material Balance Equations and Their Properties	37
2.1.3 Material Balance Information	42
2.2 ANALYSIS OF THE MATERIAL BALANCE PROBLEM	49
2.2.1 The Degree of Freedom	50
2.2.2 Solution Strategy	56
2.3 SYSTEMS INVOLVING MULTIPLE UNITS	60
2.3.1 Independent Sets of Balance Equations	60
2.3.2 Degree-of-Freedom Analysis	65
2.3.3 Special Multiunit Configurations	69
2.3.4 Strategy of Solution	77
2.4 SUMMARY	85
CHAPTER 3 SPECIES BALANCES IN REACTING SYSTEMS	106
3.1 SPECIES BALANCES WITH A SINGLE CHEMICAL REACTION	107
3.1.1 The Rate of Reaction Concept	109
3.1.2 The Limiting Reactant and Conversion	112
3.1.3 Degree-of-Freedom Analysis	114

3.2	SPECIES BALANCES WITH MULTIPLE CHEMICAL REACTIONS	124
3.2.1	Generalized Stoichiometry	126
3.2.2	The Fractional Yield	133
3.2.3	Degree-of-Freedom Analysis	137
3.3	THE ALGEBRA OF MULTIPLE CHEMICAL REACTIONS	149
3.3.1	Linear Independence of Reactions	150
3.3.2	Determination of Linear Independence	154
3.3.3	Independent Specifications	161
3.4	SUMMARY	164
CHAPTER 4	ELEMENT BALANCES	187
4.1	THE ELEMENT BALANCE EQUATIONS	188
4.1.1	The Atom Matrix and General Balance Equations	190
4.1.2	The Algebra of Element Balances	196
4.1.3	Degree-of-Freedom Analysis	200
4.2	THE RELATIONSHIP BETWEEN ELEMENT AND SPECIES BALANCES	209
4.2.1	Nonreacting Systems	210
4.2.2	Reacting Systems	213
4.2.3	The Maximum Number of Independent Reactions	218
4.3	APPLICATIONS INVOLVING CHEMICAL PROCESSING OF FOSSIL FUELS	220
4.3.1	Fossil Fuels and Their Constituents	220
4.3.2	Characterization of Fossil Fuels	222
4.3.3	Major Types of Chemical Processing Operations for Fossil Fuels	224
4.4	CONVERSION OF ELEMENT BALANCES TO SPECIES BALANCES	236
4.4.1	The Relation between Atom Matrix and Reaction Stoichiometry	237
4.4.2	Construction of a Set of Independent Reactions	240
4.4.3	Application to Systems with Incomplete Stoichiometry	245
4.5	SUMMARY	251
CHAPTER 5	MATERIAL BALANCES IN PROCESS FLOWSHEETS	264
5.1	STRATEGY FOR MANUAL COMPUTATIONS	264
5.1.1	Sequencing with Complete Solution	265
5.1.2	Sequencing with Partial Solution	267
5.1.3	Root-Finding Methods	277
