UNIX

SYSTEM V RELEASE 4

An Introduction

For New and Experienced Users

Kenneth H. Rosen
Richard R. Rosinski
James M. Farber

A comprehensive guide to the new operating system that unifies UNIX[®] System V, the BSD System, the SunOS[™], and the Xenix[®] System

2-005-9-1

UNIX SYSTEM V RELEASE 4: AN INTRODUCTION FOR NEW AND EXPERIENCED USERS

Kenneth H. Rosen, Richard R. Rosinski,
and James M. Farber

Osborne McGraw-Hill

Berkeley New York St. Louis San Francisco

Paris São Paulo Singapore Sydney
Tokyo Toronto

CONTENTS

	INTRODUCTION	xxxvii
	WHY THIS BOOK IS FOR YOU	1
PART I	BASICS	3
1	BACKGROUND	5
	THE GROWING IMPORTANCE OF THE UNIX SYSTEM	6
	WHAT THE UNIX SYSTEM IS	7
	Applications	7
	Utilities	8
	The File System	9
	The Shell	9
	The Kernel	9
	THE UNIX PHILOSOPHY	10
	THE BIRTH OF THE UNIX SYSTEM	11
	UNIX System V	13
	The Berkeley Software Distribution	14
	The XENIX System	15
	MODERN HISTORY—THE GRAND UNIFICATION	16
	Standards	16
	UNIX SYSTEM V RELEASE 4	18
	New Features and Enhancements in Release 4	19

	VENDOR GROUPS	24
	THE FUTURE OF UNIX SYSTEM V	25
	THE UNIX SYSTEM, DOS, AND OS/2	26
	DOS	27
	OS/2	28
	OS/2 and the UNIX System	29
	SUMMARY	30
	HOW TO FIND OUT MORE	30
2	GETTING STARTED	33
	YOUR SYSTEM CONFIGURATION	34
	Your Keyboard	35
	ACCESSING A UNIX SYSTEM	37
	Before You Start	37
	Selecting a Login	38
	Connecting to Your Local System	39
	Logging In	41
	Changing Your Password	42
	An Incorrect Login	45
	Message of the Day (MOTD)	46
	The UNIX System Prompt	47
	News	48
	Entering Commands on UNIX Systems	49
	The who Command	50
	The finger Command	51
	The write Command	51
	The talk Command	52
	The mesg Command	53
	The wall Command	54
	Correcting Typing Errors	54
	CUSTOMIZING YOUR ENVIRONMENT	55
	LOGGING OFF	56
	SUMMARY	57
3	BASICS: FILES AND DIRECTORIES	59
	FILES	60
	Organizing Files	60
	DIRECTORIES	62
	Subdirectories	63

UNIX SYSTEM FILE TYPES	63
Ordinary Files	64
Links	64
Symbolic Links	64
Directories	65
Special Files	65
THE HIERARCHICAL FILE STRUCTURE	65
Pathnames	66
USING FILES AND DIRECTORIES	70
Listing the Contents of a Directory	70
Viewing Files	71
Directing the Output of cat	72
Combining Files Using cat	72
Creating a File with cat	74
Printing the Name of the Current Directory	75
Changing Directories	75
Moving to Your Home Directory	77
THE DIRECTORY TREE	78
SUMMARY	81
HOW TO FIND OUT MORE	82
4 WORKING WITH FILES AND DIRECTORIES	83
MANIPULATING FILES	84
Moving and Renaming Files	84
Copying Files	87
Linking Files	90
Removing Files	91
Restoring Files	93
CREATING A DIRECTORY	94
Removing a Directory	94
MORE ABOUT LISTING FILES	95
Listing Hidden Files	95
Listing Directory Contents with Marks	96
Controlling the Way ls Displays Filenames	97
SHOWING NONPRINTING CHARACTERS	98
Sorting Listings	98
Combining Options to ls	99
The Long Form of ls	99

PERMISSIONS	101
The chmod Command	102
Setting Absolute Permissions	103
Using umask to Set Permissions	106
Changing the Owner of a File	107
MORE INFORMATION ABOUT FILES	108
Finding Files	108
Running find in the Background	110
Other Search Criteria	111
Getting Information About File Types	111
VIEWING LONG FILES – PAGERS	112
Using pg	113
The more Pager	115
VIEWING THE BEGINNING OR END OF A FILE	115
PRINTING FILES	116
Sending Output to the Printer	117
Specifying a Printer	118
Print Spooling	119
Printing Command Output	119
Identifying lp Output	120
Using lpstat to Monitor the Print System ..	120
Canceling Print Jobs	121
Printing and Formatting	122
Controlling Line Width with fmt	124
SUMMARY	124
HOW TO FIND OUT MORE	125
ELECTRONIC MAIL	127
<i>/usr/bin/mail</i>	129
Reading Mail	129
Sending Mail	131
Sending Mail to Remote Users	135
UNIX System Connections	136
Using Mail Effectively	139
Forwarding Mail	141
The vacation Command	142
The notify Command	144
mailx	145
Reading Mail	145

Replying to Messages	151
mailx Commands when Reading Mail	153
Sending Mail in mailx	153
mailx Options	156
AT&T MAIL AND PMX/TERM	162
PMX/TERM	163
SUMMARY	170
HOW TO FIND OUT MORE	171
THE SHELL	173
YOUR LOGIN SHELL	174
Shell Startup and Your Profile	174
Logging Out	175
WHAT THE SHELL DOES	175
Entering Commands	176
Commands, Command Lines, and Programs	177
USING WILDCARDS TO SPECIFY FILES	177
Wildcards and Hidden Files	179
How Wildcards Work	180
STANDARD INPUT AND OUTPUT	181
Redirecting Output	182
Redirecting Input	183
Using Standard Input with Filename Arguments	184
Redirecting Input and Output	185
Using Pipes	185
Standard Error	188
SHELL VARIABLES	189
Common Shell Variables	190
Getting the Value of a Shell Variable	191
Defining Shell Variables	193
Defining Your Own Shell Variables	194
Shell Variables and Your Environment	195
Exporting Variables	196
COMMAND SUBSTITUTION	196
RUNNING COMMANDS IN THE BACKGROUND	197
Standard I/O and Background Jobs	198
Keeping Jobs Alive When You Log Off ...	199

	JOB CONTROL	200
	Job Control Commands	200
	REMOVING SPECIAL MEANINGS IN	
	COMMAND LINES	202
	Entering Commands Containing NEWLINES ..	204
	SUMMARY	206
	HOW TO FIND OUT MORE	206
7	THE C SHELL AND THE KORN SHELL	207
	THE C SHELL	208
	Login and Startup	208
	C Shell Variables	210
	Command History	215
	Aliases	220
	Job Control	222
	Abbreviating Login Directories	222
	Redirecting Standard Error in the C Shell ..	223
	Filename Completion	224
	THE KORN SHELL	225
	Login and Startup	225
	Korn Shell Variables	225
	Setting Korn Shell Options	226
	Command History	228
	Aliases	233
	Job Control	234
	Abbreviating Login Directories	234
	Changing to the Previous Directory	235
	SUMMARY	235
PART II	TEXT EDITING AND PROCESSING	239
8	TEXT EDITING WITH ed	241
	ed	241
	Background of ed	242
	Editing Modes	243
	Starting ed	244
	Displaying Text	247
	Deleting Text	250
	Avoiding Input Errors	251
	Undoing a Change	252

Making a Backup Copy	253
Manipulating Text	254
Modifying Text	255
ADVANCED EDITING WITH ed	257
Searching and Context Editing	257
Regular Expressions	261
OTHER PROGRAMS THAT USE THE ed	
LANGUAGE	266
ed Scripts	266
diff	268
grep	269
sed	270
SUMMARY	271

9

ADVANCED TEXT EDITING	273
THE vi EDITOR	274
Setting Your Terminal	274
Starting vi	275
Entering Input Mode	278
Leaving Input Mode	279
Exiting vi	279
Moving Within a Window	280
Moving the Window in the Buffer	281
Modifying Text	282
Deleting Text	283
Undoing Changes and Deletions	284
The Ten-Minute vi Tutorial	285
Advanced Editing with vi	289
Writing vi Macros	299
Useful Text Processing Macros	302
EDITING WITH emacs	305
Setting Your Terminal Type	305
Starting emacs	308
Creating Text with emacs	309
Exiting emacs	309
emacs Help	309
Moving Within a Window	310
Moving the Window in the Buffer	310
Deleting Text	311
The Ten-Minute emacs Tutorial	311

	Advanced Editing with emacs	314
	Modifying Text with emacs	315
	Editing with Multiple Windows	318
	emacs Macros	319
	SUMMARY	320
	HOW TO FIND OUT MORE	320
10	INTRODUCING TEXT PROCESSING	321
	troff HISTORY	322
	troff AND THE UNIX PHILOSOPHY	322
	troff Versus nroff	323
	THE TEXT FORMATTING PROCESS	323
	STARTING OUT WITH troff	324
	troff Commands Versus Macros	326
	THE MEMORANDUM MACROS	328
	Formatting Letters	329
	Displaying and Printing Output	330
	The Formatted Letter	332
	Macros for Letters	332
	Formatting Memoranda	334
	Formatting Lists	337
	A Summary of Basic mm Macros	340
	Commonly Used mm Macros	340
	Printing Options	352
	Other Macro Packages	353
	UNIX SYSTEM WRITING AIDS: spell AND WRITER'S WORKBENCH	354
	spell	354
	The Writer's Workbench	357
	UNIX SYSTEM SOFTWARE PACKAGES FOR TEXT PROCESSING	359
	Text Formatters	359
	WYSIWYG Word Processors	360
	Text Formatting Versus WYSIWYG Systems	361
	Desktop Publishing Packages	362
	UNIX SYSTEM TEXT PROCESSING TOOLS FOR DOS	364
	SUMMARY	364
	HOW TO FIND OUT MORE	365

11	ADVANCED TEXT PROCESSING	367
	PREPROCESSORS	368
	Formatting Tables	369
	Formatting Mathematics	375
	Formatting Pictures	384
	Drawing Graphs	389
	CUSTOMIZING DOCUMENTS	390
	An Overview of troff Commands	391
	Defining Strings	399
	Number Registers	399
	Writing Macros	401
	USING SOURCE FILES	404
	Troff and Postscript	406
	Printing Your Documents on a PostScript Printer	407
	Including PostScript Pages in Your Documents	407
	PREVIEWING troff OUTPUT ON A BIT-MAPPED DISPLAY	410
	SUMMARY	410
	HOW TO FIND OUT MORE	411
	PART III USING AND BUILDING TOOLS	413
12	TOOLS	415
	FINDING PATTERNS IN FILES	417
	grep	417
	Some Useful Options	421
	fgrep	423
	egrep	425
	WORKING WITH COLUMNS AND FIELDS ...	426
	cut	426
	Using cut with Fields	426
	Using cut with Columns	429
	paste	430
	Using cut and paste to Reorganize a File ..	431
	join	432
	TOOLS FOR SORTING	433
	sort	434
	uniq	438

COMPARING FILES	439
cmp	440

diff	441
dircmp	442
CHANGING INFORMATION IN FILES	443
tr	443
sed	447
EXAMINING FILE CONTENTS WITH od	451
od	451
TOOLS FOR MATHEMATICAL CALCULATIONS	453
dc	453
bc	455
factor	459
MONITORING INPUT AND OUTPUT	460
tee	460
script	461
TOOLS FOR DISPLAYING DATE AND TIME ..	462
cal	463
date	463
SUMMARY	465
HOW TO FIND OUT MORE	465
13 SHELL PROGRAMMING I	467
AN EXAMPLE	468
Executing a Script	469
Other Ways to Execute Scripts	470
PUTTING COMMENTS IN SHELL SCRIPTS ...	474
PROVIDING ARGUMENTS TO SHELL PROGRAMS	474
Positional Parameters	475
Shifting Positional Parameters	477
Shell Variables	478
Special Variables for Shell Programs	481
Korn Shell Variables and Variable Operations	482
SHELL INPUT AND OUTPUT	484
Writing to Standard Output	484
Reading Input	485

	Using awk with Standard Input and Output	539
	Running awk Programs from Files	540
	Multi-Line awk Programs	540
	HOW TO SPECIFY PATTERNS	541
	String Patterns	542
	Numeric Patterns	548
	BEGIN and END	548
	SPECIFYING ACTIONS	549
	Variables	549
	Numeric Operations and Functions	552
	Arrays	553
	User-Defined Functions	554
	Defining Functions	555
	Control Statements	556
	INPUT	558
	Reading Input from Files	558
	Reading Input from the Keyboard	559
	Reading Input from a Pipe	560
	Passing Variables to a Program on the Command Line	560
	Multi-Line Files and Record Separators	561
	OUTPUT	562
	print	562
	printf	563
	Sending Output to Files	563
	USING awk WITH THE SHELL	563
	TROUBLESHOOTING YOUR awk PROGRAMS	565
	A SHORT awk TUTORIAL	566
	The Basics: Using awk to Read Fields	566
	Built-In Variables	567
	Trying Different Patterns	567
	Taking Actions	568
	SUMMARY	569
	HOW TO FIND OUT MORE	569
PART IV	NETWORKING	571
16	COMMUNICATIONS	573
	THE BASIC NETWORKING UTILITIES	574

The Development of the UUCP System	574
The UUCP Network	575
Using the cu Command to Call a Remote System	579
