CONTENTS

Millimeter Wave Propagation Through the Turbulent Atmosphere S.F. Clifford, et al.	1
Development of MM-wave Solid State Devices in China J.T. Lin	5
IR- and FIR-Magneto Spectroscopy in Intense Magnetic Fields M. von Ortenberg	7
Resonant Tunneling Device and Their Applications to Millimeter Wave and Infrared Technologies C.J. Summers	8
Aspects of Research on FIR-SMM Wave in China Y.K. Lin	12
Study of CO in the Upper Atmosphere of Venus Using a 434 Micron Laser Heterodyne Receiver D. Buhl and G. Chin	15
A Very High Sensitive Radiometer for 7 mm Waveband A.K. Blinov, et al.	19
Advanced Microwave Precipitation Radiometer J.A. Galliano and R.H. Platt	22
High Resolution Acousto-Optical Spectrometer (AOS) with a Bandwidth of 1 GHz for Laboratory spectroscopy and Airborne Astronomy in the Spectral Range 500 GHz - 2000 GHz G.W. Schwaab, et al.	26
Heterodyne Receiver for Airborne Astronomy at 214 μm and 184 μm H.P. Roeser, et al.	30
Apparatus for Spectral Radio Astronomical Observations at Millimeter Wavelengths I.I. Zinchenko, et al.	35
Diffraction Limited Far Infrared Astronomy P.M. Harvey and D.F. Lester	39
Response of YBaCuO Thin Films to Millimeter-wave Electromagnetic Radiation A.S. Afanasyev, et al.	44

CONTENTS

Study of High-T _c Superconducting Thin Film L.B. Liu, Z.A. Pen, M.Q. Ding	48
Far Infrared Absorptance Studies of High T _c Superconducting Material YBa ₂ Cu ₃ O _{7-x} at different Temperatures by FTIR M.M. Pradhan, R.K. Garg and M. Arora	52
Far Infrared Spectroscopy of High-T _c Superconductors at the National Synchrotron Light Source S. Perkowitz and G.P. Williams	56
Far Infrared Measurements on YBCO Films S. Cunsolo, et al.	57
The Measurements of Microwave Characteristics of Josephson Junction at Liquid Nitrogen Temperature S.Z. Cai, et al.	61
Ka Band Josephson Mixer Using Ceramic Bridge at Liquid Nitrogen Temperatures P.H. Wu, et al.	65
Josephson Internal Oscillation-mixing in YBCO superconducting Weak Link at Liquid Nitrogen Temperatures Song, J.M., et al.	68
On Fourier-transform Far-Infrared Imaging by DC Josephson Effect Y.Y. Divin	71
Dielectric Resonators with Azimuthal Waves for Investigations of High-T _c Superconductors N.T. Cherpak and A.Ya. Kirichenko	75
The Planar Orottron at Millimeter and Submillimeter Wavelengths E. Marshall, et al.	77
Electrostatic Electron Cyclotron Resonance Maser and Electrostatic Free Electron Laser S.G. Liu, et al.	78
PELs and Optical Klystrons Based on Tandem Electrostatic Accelerators—A Tunable Coherent Source in the 10-1000 Micrometer Region A. Grover and A. Friedman	83
On — and Off — Axis Emission in the Uniform Magnetic — Field Free-electron Laser J. S6ln	84

The Electric Analysis of the General Orbit Fel-cyclotron Hybrid	86
L.H. Gong and J.H. Xu	
Research on Oerons in the United States	89
R.D. Worman	
A Study of DRO in a Four Millimeter Wave Band	92
W.L. Dai	
30-350 GHz Antennas Measurements with a New Scalar Network Analyzer	96
H. Gay and J.C. Buisson	
Manufacturing of a Directional Coupler in 8 mm Waveband	97
H.L. Wang	
Highly efficient Frequency Triplers in the Millimeter Wave Region-incorporating a Back-to-back Configuration of Two Varactor Diodes	100
R.J. Wu, et al	
Development of Millimeter Wave Techniques in Finland	107
A. Eklund	
Precise Dielectric Measurements at 68.5 GHz Using an Open Resonator	111
T.J. Luo, H. Ye and Z.M. Du	
Six-port Reflectometer Calibration by Using Five Standards	114
C.J. Cheng, D.F. Li and F.L. Liu	
Analysis of Multiple-strip Discontinuity in a Rectangular Waveguide	118
B.Y. Li, N.C. Wang and H.M. An	
Dominant-mode Propagation Characteristics for Dielectric Tape Lines	122
J.C. Wiltse	
Millimeter Wave Metrology Instrumentation in Panda Land	123
L.C. Chou and Q.Q. Chen	
Diagnostic of Plasma Density Fluctuations by Collective Scattering of 2 mm Radiation	128
L.D. Revin, et al	
Plasma Diagnostics in Infrared and Far-infrared Range for Heliotron B	129
S. Sudo, et al	
Recent Advances of Millimeter-wave Diagnostic Technologies in Institute of Plasma Physics, Academia Sinica	133
Z.S. Wang, et al	

Intense CO ₂ Laser Pulse Attenuation by Pulse-formed Plasma Regions in the Atmosphere V.K. Mamonov and O.A. Volkovitsky	138
Development of a High Power, Power-Modulated Tea CO ₂ Laser for Plasma Diagnostics T. Tsukishima, et al	141
The Application of Stable, High Power, Twin Frequency, Optically Pumped Far-Infrared Lasers to Fusion Plasma Diagnostics W.A. Peebles, et al.	145
Review of Infrared Detector Technology D.G. Crowe	146
Antenna Measurements of Open Structure Schottky Mixers and Determination of Optical Elements for a Heterodyne System at 184 μm, 124 μm and 287 μm R.U. Titz, H.P. Roeser and G. Schwaab	150
Fast Detectors of the Impulse Radiation with the High Repetition Frequency E.V. Beregulin, et al.	154
Schottky-barrier Tunnel Diode as a Point Fast Detector of FIR Laser Radiation S.D. Ganichev, et al.	155
Ambient Temperature Mercury Zinc Telluride Photodetectors Can Achieve Detectivity Higher Than $1 \times 10^8 \text{ cmHz}^{1/2} \text{ W}^{-1}$ at 10.6 μm J. Plotrowski and M. Grudzien	159
Fast Uncooled Detector of the IR-FIR Radiation on the Base of Intraband Photoconductivity E.V. Beregulin, S.D. Ganichev and I.D. Yaroshetskii	160
Response of Stressed Ge: Ga at Millimeter Wavelengths C. Meny, et al.	161
Fast Detector for the Polarization Characteristics Determination of the Pulse IR-FIR Laser Radiation A.V. Andrianov	165
Photoconductivity of the Gapless Hg _{1-x} Cd _x Te in the Quantizing Magnetic Field S.G. Gasan-zade, E.A. Salkov and G.A. Shepelsky	168
The Effects of the Donor Concentration and the Compensation Degree of N-InSb Material on the Performance of InSb Electron Bolometer J.R. Xu, et al	169

On Selective Absorption by Atmospheric Water Vapor in the Atmospheric Window 1,6 m K.A. Aganbekyan and V.V. Kulikov	173
The Influence of Atmospheric Radiation on the Heat Balance of Low-sloped Roofs E. Nowak	174
Multiple Scattering of Millimeter Wave Band Pulse by a Rain G.K. Zagorin and I.P. Polyanskaya	178
Scattering of Pulse Waves by Moving Spheroidal Raindrops and Measuring Principle of the Raindrop Spectrum Wei, Z.	181
IR Radiation Transfer from the Earth D.G. Crowe, R.W. McMillan and J.J. Gallagher	185
Approximate Calculation of MM Wave Propagation Characteristics in Rains with Arbitrary Structure G.K. Zagorin, N.I. Kojevnikova and A.V. Sokolov	189
A Far-infrared Device for Humidity Measurement K. Hisano and H. Tanaka	193
Terrain Roughness Influence on MMW Scattering and Emission G.A. Andreyev and G.A. Gladyshev	197
A Study on 10.6 Micron Wave Propagation in Cloud, Fog and Haze Y.P. Wang, Z.S. Wu and K.F. Ren	201
Inversion of Path-Averaged Raindrop Size Distribution form Rain Attenuation of Multifrequency D.Z. Hu and J. Huang	204
Effect of Atmospheric Turbulence on Measurement of Angular Position of MMW-Source G.A. Andreyev and S.A. Ogarev	208
Propagation of High Power Microwave Pulses in Air Breakdown Environment S.P. Kuo, Y.S. Zhang and P. Kossey	212
Frequency Characteristics of an Atmosphere Channel with Multiply Scattering of MMW Due to Rain G.A. Andreyev and E.V. Frolova	216
Progress in Millimeter-wave Applications J.C. Wiltse	220

Design of Optimum Six-Port Network in Dielectric Waveguide Y. Shen and D.M. Xu	221
Design Consideration of Polarization Interferometer in the MM and SMM Wavelength Region B.S. Qiu, et al.	226
Infrared Optical Properties of Vanadium Oxide Thin Films E.E. Chalm	229
Leaky-wave Antenna for Millimeter Waves with Conductor-dielectric Periodic Modulation T.L. Dong	233
Computer Control Automatic Measurement of SMMW Wavelength and Field Distribution Pattern X.S. Zheng, et al.	237
Precision Measurement of Submillimeter Wave Frequency Z.M. Du, et al.	240
8mm Branched NRD Guide Directional Coupler M.L. Zhu, Z.H. Jiang and L.F. Qi	243
Resonance Transformation of Electromagnetic Waves into Sound in Metals in a Magnetic Field L.E. Aronov, et al.	246
Coating Formation Via Metal Ignition by CW CO ₂ Laser Beam V.I. Konov and V.G. Raichenko	247
Far Infrared Analysis of the HgTe-CdTe Superlattice S. Perkowitz, L.S. Kim and O. Wu	251
Resistance Measurements on Point-contact Diodes H.D. Riccius and L.H. Jones	252
A Rugged 94GHz Millimetre-wave Balanced Mixer J.A. Wells, N.J. Cronin and P.H. Reece	254
A Low Noise Wideband Mixer for 3mm Band Y.T. Cao and Y.Q. Gong	257
Nonlinear Analysis of mm-wave Upconverter Y.F. Tang and Z.H. Peng	260
Nb-AlO _x -Nb Junctions Structures for mm Wave Receivers A.B. Ermakov, et al.	264
Subharmonically Pumped SIS Mixer V.Y. Belitsky, et al.	268

Far-Infrared Response of Schottky Diodes: High-Frequency Limit N.A. Mordovets, I.N. Kotel'nikov and A.T. Shul'man	272
High-order Harmonic Mixing in the Submillimeter Wave Region B.Q. Zhou, et al.	276
Ka-band Crystal Detector with Flat Response D.X. Qu and H. Yu	279
Optimum Geometrical Dimensions of Beam Lead Schottky Barrier Mixer Diode D. Zheng, L.C. Wang and P.M. Fang	283
Tunable Gyrotron Development and Applications to Plasma Physics G.F. Brand	288
Stability and Efficiency Enhancement of Cyclotron Auto Resonance Maser Amplifiers A.T. Lin	292
Theoretical and Experimental Investigations of W-band Whispering Gallery Mode Dielectric Resonator Y. Li, S.H. Xu and S.L. Tong	296
Peniromagnetron Amplifier Theory V.D. Eremaka, V.A. Zhurakhovskiy and V.P. Shestopalov	299
Design of a 100 kw Gyro-TWT C.S. Kou, et al.	303
Far-infrared Magneto-optical Resonance as a Fundamental Method of Semiconductor Characterization—State of the Art E. Otsuka	307
Magnetic Resonance in Rb_2MnCl_4 by Sweeping the Frequency in the mm-wave Range and by Sweeping the Magnetic Field R. Geick, et al.	311
Magnetic Phase Transitions in Rb_2MnCl_4 Studied by Neutron Scattering and Spectroscopic Measurements in the Millimeter Wave Range R. Geick, et al.	315
Nonreciprocal Magnetoplasma Polaritons in Thin Semiconductor Layers N.N. Beletski, E.A. Gasan and V.M. Yakovenko	319
Millimeter-wave Substrate Mounted Antenna Measurements M. Gouker and J.J. Gallagher	323

A General-purpose Software for Full-wave Analysis of Microwave and Millimeter Wave Planar Transmission Lines Z.Q. Chen and B.X. Gao	324
A Study of Suspended Microstripline Pin Diode Switch J.F. Miao and W.L. Jia	328
Resonant Tunneling and Negative Differential Conductance in Single and Multiple Quantum Well Structures A. Torabi, et al.	331
Study of Twin-Channel Branch Junction of 8mm & 4mm Wave C.P. Deng, X. Liu and Y.Q. Cui	332
The Accurate Design of mm-wave Fin-line Filter Z.H. Peng, Q.Y. Li and J. Lei	338
A New Type of MMW Integrated Directional Couplers R.R. Xu, A.S. Rong and S.P. Li	342
Advances in Millimeter-wave Applications in China R.P. Zhang, L.H. Jiang and Y.C. Shen	346
Light Scattering from Coherently Excited Bulk and Surface Phonon-polaritons Y.N. Polivanov and R.S. Sayakhov	351
Study of Solid-plasma Control Components for Millimeter Frequencies V.I. Miteva and K.P. Ivanov	354
A New Four-port Two-state Reflectometer D.P. Li, F.L. Liu and C.J. Cheng	355
A Cat System for Network Analysis at Q-band T.Y. An, et al.	359
A MMW Therapeutic Apparatus and Its Clinical Application W.Z. Huang, et al.	363
A New Design of Six-port Reflectometer without Power Meter H.R. Gu and H. Guan	367
Measurement of Two-port Networks by a Single Six-port Relectometer X.M. Lou	370
Broad-Band mm-wave Power Meter H.L. Kuang	374

Measuring Complex Dielectric Constant of Dielectric Material in Millimeter Waves by Radiating Technique G.D. Li, C.S. Shi and Q. Sun	378
Protective and Anti-reflection Carbon Coating for IR Optics Materials A.A. Gorbunov, et al.	382
The Method of Simultaneous Measurement of Energy and Forms of the Radiation Pulse of the Powerful CO ₂ Laser E.M. Barkhudarov, et al.	384
Geostron Research at the Naval Reseach Laboratory A.K. Ganguly, et al.	387
High Power K-band Microwave Emission from an Intense E-beam Cyclotron Maser E.M. Götgenbach, et al.	391
Detection of Superpower Microwave Radiation G.A. Askaryan, et al.	392
Carm EC Heating Source for High Field Tokamaks Q.S. Wang, et al.	396
Initial Operation of a Cherenkov Carm H.B. Cao, D.B. McDermott and N.C. Luhmann, Jr.	400
Analysis of Whispering-gallery Superconducting Dielectric Resonator Modes Y. Li and S.P. Zhou	404
Spectroscopic Probes of Nonambient Environments F.C. De Lucia	409
Temperature Dependence of Some Absorption Bands in the Far IR- Region W.I. Nasser	413
Nonlinear Solid-state Spectroscopy in the Far Infrared F. Kellmann	419
Some Progress on Far Infrared Spectroscopic Techniques E.C. Shen, J.W. Su and Z.Y. Yu	423
A Radiospectrometer of Millimeter Range and Investigations of Dielectric Properties of Some Gaseous Mediums K.A. Aganbeykhan, V.B. Ermakov and V.V. Kulikov	427
EPR Study of TBA (TCNQ) ₂ in the Far Infrared P. Janssen and K.U. Leuven	428

Millimeter-wave Spatial and Quasi-optical Power Combining Techniques Kai Chang	431
Finite Element Analysis of the Dielectric Resonator J.B. Tang and M.S. Sun	435
Far Infrared Radiation from Uniaxially Compressed p-type GE I.V. Altukhov, M.S. Kagan and V.P. Sinis	439
Developing Status of Millimeter Wave Tubes in China F.J. Liao, et al.	443
D-band Silicon Impatt Diode L.R. Jin, et al.	447
The Millimeter Wave GUNN Oscillator and Self-Oscillating Mixer Using the Nonradiative Dielectric Waveguide S.M. Liu and L.C. Liao	450
Study on Broadband Millimeter Wave Oscillators W. Hong and S.F. Li	453
Influence of Moisture on Cavity-stabilized Oscillators D.F. Li, D.J. Wang and L.G. Zheng	457
Millimeter Waves for Communications E.N. Barnhart	461
Mini-tea CO ₂ Laser Arrays C.Z. Pan, M. Zhai and X.P. Li	465
Measurement of Submillimeter Wave Attenuation in Biological Materials T. Fuse, M. Taki and O. Yokoro	469
A Quasioptical Impedance Measurement in Dielectric Image Line K. Kikuchi	473
Dynamic Characteristics of Microstrip Lines on Magnetized Ferrimagnetic Substrates M. Albuquerque, et al.	477
Modern K _a -band/Millimeter Wave Radar Systems S.L. Johnston	481
Millimeter-wave Generation and Characterization of a GaAs Fet by Optical Mixing D.N.W. Chew and H.R. Fetterman	493
New NRD guide Oscillator J.F. Miao and P. Yang	494

Short Pulse IMPATT Oscillators Y.F. Yang, et al.	497
Novel Large Signal Mathematical Model of MM-wave Gunn Device N. Chen, Z.L. Sun and S.F. Li	500
WCO for Millimeter-wave Phase-locked Sources D.J. Wang and D.F. Li	503
A New Viewpoint on the Operation Principles of the Reflection Type Cavity-stabilized GUNN Oscillator D.J. Wang	506
Operation of Sixteenth Harmonic Cusptron Oscillator S.P. Kao and K.K. Tiong	510
A Study of the Characteristics of a Novel Millimeter-wave Microslab Waveguide G.S. Pe and C.E. Liao	514
Analysis of Groove NRD Waveguide Using Eigen-weighted Boundary Integral Equation Method W.K. Zhang and L. Zhu	518
The Analysis of the Dispersion Characteristics of Several Kinds of Coupled Suspended Substrate Microstrip Lines and Transmission Lines with the Method of Lines E.J. Gu, Y.Y. Wang and Y.H. Shu	522
The Impedance Characteristic of NRD Waveguide L. Li and S.M. Liu	526
Dielectric Resonator in Nonradiative Dielectric Waveguide Bandstop Filter L.C. Liao and S.M. Liu	529
Sub-Quarter Micron Gate Length High Electron Mobility Transistors Processing Technology Y.F. Yang	532
An Influence of Surface Polaritons on Damping of Modes in an IR Irregular Hollow Dielectric Waveguide N.L. Lipatov P.P. Pashinin and A.M. Prokhorov	536
MM-Wave Stable Solid-State Source with Spherochelette Open Oscillating System A.V. Arkhipov, et al.	539
Open Resonator Measurement of the Propagation Parameters of Ferromagnetic Materials at Q-band Frequencies B.J. Barr and A.N. Imani	541

A Quasi-optical Method of Measuring Polarised Wire Grids at Short Millimetre Wavelengths Z.Q. Wang and B.Q. Zhou	542
Specific Features of Focusator Calculations and Constructions in Millimeter and Centimeter Wavebands A.L. Gutman, S.N. Satunin and V.A. Silin	545
IR-image Visualization in Resonant Gas Media G.G. Adonts, G.P. Djotyan and E.G. Kanatsyan	549
Design for the Quasi-optical Source-array in 3 Millimeter Wave Band Q.M. Wang and C.T. Xue	550
Measuring Quasi-optic Complex for Spectroscopic Investigations at $h\nu/KT \gg 1$ A.A. Vertiy, et al.	554
Model Simulation of Target Characteristics Employing Millimeter Wave Systems B.H. Chen	556
The Engineering of Over-Mode Components and System for ECR-Preionization and ECRH L.G. Xu, et al.	560
A Scanning Mirror Short Millimeter Wave Field Pattern Automatic Measuring System Z.M. Du, S.B. Chen and Z.C. Lin	564
A Multimode Conical Feedhorn in 8mm Wave Band Z.S. Lin, C.Y. Shun and W.R. Liu	567
Development of a Ka-band Communication Receiver Front-end and Its Noise Analysis X.Y. Zhang and H.P. Jiang	571
Recording Materials for Holography in the 10.6 μm Region L. Libera, et al.	574
A Low-cost V-groove Waveguide to Microstrip Transition Y.M. Choi and Y.F. Leung	575
Pulsed CO ₂ Laser Treatment of Diamond Films N.I. Chapliev, V.I. Konov and S.M. Pimenov	579
Recent Developments in the Orbitron MASER I. Alexeff, M. Rader and F. Dyer	583
Thermal-emitting Diodes for IR V.K. Malyutenko and A.I. Liptuga	588

In-Situ Radiometric Evaluation of the Spectral Irradiance Created by the Optical Radiation Sources K.K. Fera, G.P. Ispăşoiu and D.G. Sporea	591
Negative Cyclotron Mass Maser—A New Type of Semiconductor Generator for Millimeter and Submillimeter Wave Range A.I. Gavrilenko and Z.F. Krasil'nik	592
Resonance Absorption of the IR-FIR Radiation in Semiconductors and its Technical Utilization E.N. Beregalin, et al.	597
Radwave Excitation of Resonant D.C. Electromotive Force in Metals I.E. Aronov and V.L. Falko	601
Instability of Electromagnetic Oscillations of the Millimeter Wave Range Specified by Injection of Charge Carrier in Inhomogeneous Semiconductor Structures M.N. Butryka, O.V. Glukhov and V.M. Yakovenko	602
Stability Condition for 8mm Phase-locked Source B.F. Li and X.H. Yun	606
Experimental Study of an Overmode Power Combiner of 8mm IMPATT Diodes W.D. Bi and S.J. Xino	610
Varactor-tuned Ka-band GUNN Oscillator H.F. Zhang and X.B. Song	614
Thin Traveling-wave Maser with Gain Bandwidth Exceeding 200 MHz A.A. Lavrionovich, T.A. Smirnova and N.T. Cherpak	617
The Optimum Design of Microstrip Antenna Array for Millimeter Waves H.H. Zou and J.D. Xu	619
Optimized Design of Finline Filter for Millimeter-wave E.X. Feng and J.M. Fu	622
Improved perturbation Analysis of Dielectric Grating Antenna S.J. Xu and X.Z. Wu	626
A Traveling Wave Structure for Millimeter Wave Antennas K.M. Huang and Y.S. Zhao	629
Performance Improvements of Nonradiative Dielectric Guide Leaky-wave Antenna in 8mm Wavelength Q. Han and Y.C. Liu	632

An Improved Finite Element Analysis for Open Dielectric Waveguides S.J. Xu and K. Jiang	635
The Closed-form Formulas of Fin-line Discontinuities at Millimeter Wave Band R.R. Wu, A.S. Rong and S.F. Li	639
Theoretical Study of Quasi Continuously Tunable Optically Pumped NH ₃ Laser Y.K. Lin and X.D. Yang	643
Assignments and Experimental Verification of FIR CD30H Laser Lines S. Kon and K. Takeshita	647
Hole Burning Effect and Lasers Containing Saturable Absorber with Dominant Inhomogeneous Broadening D.V. Hoang	651
A Newly Designed Pulsed and Optically Pumped FIR Laser C.Z. Pan and J.M. Zhan	653
Intracavity Pumped FIR Lasers L.N. Orlov, Y.I. Nekrashevich and O.L. Galko	657
Temperature Dependence of FIR Laser Output Power L.N. Orlov	661
Electron-beam Controlled Discharge N ₂ O Laser A.A. Ionin, et al.	662
