

The expert's guide to Windows NT 4.0

**ADVANCED
TECHNICAL
REFERENCE**

WINDOWS NT[®] WORKSTATION 4.0

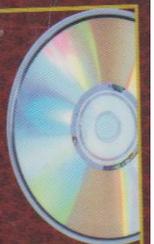

Configure Windows NT as a "universal client" for access to multiple networks and take full advantage of Remote Access Services and Dial-Up Networking

Set up and run a secure intranet Web server with Windows NT Workstation 4.0

Jim Boyce, et al.

que[®]

CD-ROM includes 58 Windows NT programs, including Remotely Possible/32, WebSite, WS_FTP LE9 and Diskeeper Lite!

Introduction 1

- What This Book Is About 2
- Who This Book Is for 2
- How This Book Is Structured 3
- Conventions Used in This Book 8
- Where to Go for More Information 10

I Overview of Windows NT Workstation

1 Operating Systems Overview 13

- Operating Systems and Windows NT Workstation 14
 - The Windows NT Architecture 14
- Windows NT 4.0's Features 16

2 Understanding Windows NT Workstation Architecture 17

- Operating System Overview 18
 - A Brief History of Windows NT 20
- Windows NT Design Objectives 21
 - Extensibility 21
 - Portability 22
 - Compatibility 23
 - C2 Security 23
 - Performance 24
 - Reliability and Robustness 24
- The Windows NT Architecture 24
 - Kernel Mode and User Mode 24
 - The Hardware Abstraction Layer (HAL) 26
 - The Executive 26
 - Protected Subsystems 28
 - Scalability—Supporting Symmetric Multiprocessing 31
- Exploring the Executive 32
 - Objects and Object Manager 32
 - Security Reference Monitor 34
 - Process Manager 35

Local Procedure Call Facility	36
Virtual Memory Manager	36
I/O Manager	37
Exploring the Subsystems	38
Security	38
Win32	39
MS-DOS and Win16	40
Understanding Processes and Threads	43
Overview of Processes and Threads	43
Adding a Network Layer	44
The Redirector	45
The Server	46
Transports (Protocols)	46
Windows NT versus Windows 3.x and Windows 95	47
DOS and Windows 3.x	47
Windows 95	47
Windows NT	48

III | Optimizing System and Application Performance

7 Performance Optimization Overview 135

- Why Bother? 136
 - Hardware Selection and Capacity Planning 136
 - Disk Performance 137
 - Going Beyond the CPU and Disk 137

8 Monitoring Performance 139

- Why Bottlenecks Occur 140
- Overview of Performance Monitor 141
- Working with Performance Monitor 143
 - Starting Performance Monitor and Organizing the Layout 143
 - Changing Views 144

Using Workspace and Settings Files	145
Adding and Monitoring Counters	147
Selecting a Different Computer to Monitor	148
Clearing the Display and Deleting Selections	149
Exporting Data	150
Working with Charts	150
Working with Logs	152
Working with Alert View	155
Working with Reports	158
Limitations of Performance Monitor	159
Lack of Printing Functions in Performance Monitor	159
Lack of Certain Objects and Counters	159
No Smaller Viewing Window	160
Using Other Tools for Monitoring	160
The Different Functions of the Task Manager	160
Norton NT Tools	162
Monitoring Hints	164
From Here...	165
9 Optimizing Physical and Virtual Memory	167
Understanding Memory Architecture	168
Memory Types	168
Cache Memory	169
Memory Voltage	170
Segmented Addressing versus Flat Addressing	172
Optimizing Physical Memory	172
Making Your Memory Work As Fast As it Can	172
Determining if You Have Enough Memory	174
Allocating the Memory You Have	175
Understanding Virtual Memory	176
Pages	176
Page Tables	176
The Translation Lookaside Buffer	177
Understanding NT Memory Use	177
NT's Page Structure	177
System Space	178
User Space	179

Paging—Extending the Space	179
Memory Usage States	179
Detecting and Clearing Memory Bottlenecks	180
Examining Performance to Determine if a Memory Bottleneck Exists	180
Clearing Memory Bottlenecks	200
Optimizing Virtual Memory Use	202
Pagefile Size	202
Paging Device	203
Examining System Resource Issues	204
Resource Trade-offs	204
Cost Recovery for Memory Upgrades	205
A Look to the Future	205
From Here...	207
10 Optimizing the File System	209
FAT or NTFS: Which is Best for You?	210
A Brief Overview of Disk Structure	210
Overview of the FAT File System	211
Overview of NTFS	213
Comparing FAT and NTFS	216
Making Your Choice	217
Overview of File Systems and Performance	218
Controller/Drive Options	218
Cluster and Partition Size	222
Detecting and Clearing Disk Bottlenecks	224
Testing Disk Performance	224
Clearing Up the Bottleneck	228
Using a Stripe Set	230
Using a Volume Set	232
Using the Disk Administrator	232
Overview of Disk Administrator	233
Committing Disk Changes	236
Working with Partitions	236
Formatting Drives	238
Converting FAT to NTFS	239
Creating a Stripe Set	240
Creating a Volume Set	240

Extending a Volume Set	241
Assigning Drive Letters	241
Detecting and Clearing Cache Bottlenecks	242
A Brief Overview of Caching	242
Testing Cache Performance	242
Clearing Up the Bottleneck	244
From Here...	245

11 Exploring NTFS 247

Understanding NTFS's Structure	248
A Flying Tour of Hard Disk Geometry	248
Disk Organization Basics	250
The NTFS Directory Structure	251
Files on an NTFS Volume	252
The NTFS System Files	256
Exploring NTFS's Advantages	258
Long File Names	258
Efficient Use of Disk Space	259
Support for Large Disks	261
File Compression	261
File Security	262
Transaction-Based Structure	262
Better Fault-Tolerance Performance	264
File-Level Security	264
Migrating to NTFS	265
How Does Conversion Work?	265
Where Are the System Files?	266
Do I Have Enough Room on the Partition?	268
Using and Optimizing Compression	269
Setting Up Compression	269
Compression Ratios	271
When Not to Compress	272
From Here...	272

12 Optimizing CPU Performance 273

Overview of CPU Performance	274
Creating a Processor Workspace File	274
Charting Performance	276

Analyzing CPU Performance	278
Processor Scheduling	278
User Mode and Privileged Mode	281
Lower Utilization Bottlenecks	284
16-bit Windows Applications and Processor Usage	284
MS-DOS Applications and Processor Usage	288
“Hidden” Processes Started with Windows NT	289
Eliminating Bottlenecks	291
Adding Additional Processors	292
Monitoring and Optimizing SMP Systems	294
From Here...	296

13 Enhancing Video and I/O Performance 297

Overview of Video Performance	298
Understanding Video Bottlenecks	298
Video Types	298
Bus Types	299
Graphics Accelerators versus Standard Video Boards	301
Video Memory	301
Monitoring Video Performance	302
Improving Video Performance	303
Adding Video Memory	304
Using Updated Video Drivers	305
Changing Resolution of the Video Driver	306
Using the Appropriate Screen Size with a Video Resolution	306
Upgrading Video Adapters	308
Understanding the I/O Subsystem	308
Overview of I/O Performance	308
I/O Bus Types	308
Network Adapters	309
Serial Ports	309
Parallel Ports	313
Other Hardware Devices	315
High Performance I/O Cards	316
Monitoring I/O Performance	316
Optimizing I/O Performance	318

Hardware Suggestions 318

From Here... 320

14 Ensuring Data Security 321

Optimizing and Automating Backup Services 322

A Brief Introduction to NT Backup 322

Creating a Backup Schedule 322

Using WinAt to Schedule Backups 323

Ensuring Backup Integrity 327

Using Fault-Tolerant Volumes 328

NT and Fault Tolerance 328

RAID and NT Workstation 330

Fault-Tolerant Volumes with NT Server 331

Other RAID Solutions 334

Employing and Managing a UPS 335

Why Use a UPS? 336

About UPSes 336

What Should You Look for in a UPS? 337

Installing a UPS 338

Managing a UPS 340

PowerChute Plus 340

From Here... 341

IV | Optimizing Network Performance

15 Networking Overview 345

Integrating with Other Environments 346

Dial-Up Networking 347

16 A Brief Primer on Networks 349

LAN Overview 350

Understanding the Physical Network 351

The Network Interface Card (NIC) 351

Media 353

Topology 354

Bridges and Routers 356

Understanding Network Layers	357
Physical Layer	358
Data Link Layer	358
Network Layer	359
Transport Layer	359
Session Layer	359
Presentation Layer	360
Application Layer	360
Bringing Together the Layers	360
Understanding Network Relationships in Windows NT	361
Understanding Workgroups and Domains	361
Primary and Backup Domain Controllers	363
Understanding Trust Relationships	363
Understanding Groups	364
Integrating Existing Workgroups in Domains	365
Choosing a Domain Model	366
Using a Single Domain Model	367
Using a Single Master Domain Model	368
Using a Multiple Master Domain Model	369
Creating and Managing Domains	370
Understanding Security IDs	371
Creating a Domain During Setup	372
Moving a Domain Controller to a New Domain	372
Managing Domain Controllers	373
Creating and Removing Trust Relationships	375
Adding and Removing Computers in a Domain	376
Understanding Network Security Models	378
User-Level Security versus Share-Level Security	380
Setting Up User-Level Security	381
Sharing Resources with User-Level Security	382
From Here...	384
17 Integrating Windows NT in Novell Environments	385
Using NetWare Services and Protocols	386
Using Microsoft versus Novell	386
Protocol Issues	387
Installing NetWare Services and Protocols	388
Checking Your Bindings	390

Configuring Client Service for NetWare	391
Using Login Scripts	392
Attaching to a NetWare Network	394
Finding a Server	394
Using the Network Neighborhood	395
Attaching to the Network	395
Sharing Resources in NetWare Environments	396
Using NetWare File and Print Services	398
Mapping Drives	398
Capturing Printers	399
Integrating NetWare and Windows NT Print Queues	401
Windows NT's Print Queue	401
NetWare's Print Queue	402
NetWare 3.1x versus 4.x Issues	404
Version 3.1x	404
Version 4.x	404
Changing Your Password	405
From Here...	405

18 Integrating Windows NT in Microsoft Environments 407

Using Windows NT Workstation as a Client/Server	408
Domain versus Workgroup	408
Users and Groups	410
Managing Users and Groups with the User Manager	411
Sharing Objects	412
Integrating DOS Systems	415
Applications	415
Printing	416
Integrating with Windows for Workgroups Clients	416
Files and Directories	418
Applications	418
Printing	418
Integrating with Windows 95 Systems	420
Files and Directories	421
Printing	421
Integrating with Windows NT Workstations	422
From Here...	422

19 Integrating Windows NT in UNIX Environments 425

- Operating System Comparison 426
 - System Architecture 426
 - Subsystems 426
 - Login Scripts 427
 - Virtual Memory (Swap) 427
 - Network Utilities 427
 - File Systems 427
- File Services 428
 - FTP: File Transfer Protocol 428
 - rcp: Remote Copy Program 429
 - tftp: Trivial File Transfer Protocol 430
 - NFS: Network File System 430
- Print Service Interoperability 432
 - Printing from Windows NT to UNIX Printers 432
 - Installing the Microsoft TCP/IP Printing Service 432
 - Installing the UNIX Printer 433
 - Sharing Your UNIX Printer with other Workstations 434
 - Printing from UNIX to Windows NT 435
 - Printing Utilities 436
- Application Interoperability 436
 - X Windows 436
 - Configuring eXceed for Windows NT 437
- Other UNIX Tools 439
 - Simple Network Management Protocol (SNMP) 439
 - Finger 441
 - Nslookup 442
 - Simple TCP/IP Services 443
 - Other Tools 443
- From Here... 443

20 Using Dial-Up Networking 445

- What Is Dial-Up Networking? 446
 - Routing versus Remote Control 446
 - Dial-Up Networking versus RAS 448
- RAS Scenarios 449

The Point-to-Point Protocol	451
The PPP Frame	452
Establishing a PPP Connection	453
The Serial Line Internet Protocol (SLIP)	456
RAS Security	456
PPP Authentication	457
RAS Options	459
Native Windows NT Security	460
Third-Party Security Products	460
Data Encryption	460
Virtual Private Networks	460
Installing the Windows NT RAS Server	462
Configuring TCP/IP for RAS Clients	464
Configuring IPX for RAS Clients	465
Configuring RAS Authentication Options	466
Starting the Remote Access Service	467
Installing the Windows NT RAS Client	469
The Basic Screen	470
The Server Screen	471
The Script Screen	474
The Security Screen	476
The X.25 Screen	477
Initiating a RAS Session	478
From Here...	478

V | Using TCP/IP and Internet Features

21 TCP/IP and Internet Overview 481

TCP/IP Support in Windows NT	482
DHCP	483
DNS and WINS	483
Peer Web Services	484

22 Overview of TCP/IP 485

A Brief History of TCP/IP	486
Development of a Standard	486
Founding Concepts	486

Fitting TCP/IP into the OSI Reference Model	489
The Network Access Layer	490
The Network Layer	491
The Transport Layer	497
The Application Layer	501
Understanding TCP/IP Communications	502
IP Addressing	502
IP Routing	505
IP Multiplexing	506
Using TCP/IP on the Corporate Network	507
Fitting TCP/IP into the Windows NT Networking Stack	508
Overview of TCP/IP Utilities	509
Finger	509
FTP	510
TFTP	513
Telnet	513
RCP	514
REXEC	514
RSH	515
LPR	515
From Here...	516

23 Using Basic TCP/IP Services 517

Using TCP/IP on a Windows NT Network	518
Windows NT Standards Compliance	519
TCP/IP and the Windows NT Networking Architecture	519
Installing the Windows NT TCP/IP Services	524
Configuring TCP/IP Properties	525
The IP Address Page	526
The DNS Page	531
The WINS Address Page	534
The Routing Page	536
Bindings	537
Simple TCP/IP Services	538
TCP/IP Troubleshooting	538
Basic Troubleshooting Techniques	539
PING	540
TRACERT	541

HOSTNAME	543
IPCONFIG	543
ARP	544
ROUTE	545
NETSTAT	546
NBTSTAT	548
Windows NT Performance Monitor	548

From Here... 549

24 Using DHCP 551

The Origins of DHCP	552
Administrative Problems of TCP/IP	552
BOOTP and DHCP	553
Advantages of Windows NT's DHCP Server	554
Understanding DHCP Communications	557
The DHCP Negotiation Process	561
Releasing an IP Address Assignment	563
Renewing an IP Address Assignment	564
Lease Expiration and Renewal	564
Running a Windows NT DHCP Server	566
Installing the Windows NT DHCP Service	566
Configuring the DHCP Service	567
Viewing DHCP Activities	570
Installing the DHCP Relay Agent	571
Installing a DHCP Client	572
From Here...	573

25 Using DNS and WINS 575

Understanding Name Resolution and TCP/IP	576
Node Names	577
Name Resolution Methods	578
Understanding the NetBIOS Name Service	581
Fundamentals of NetBIOS over TCP/IP	582
NetBT Node Types	582
NetBT Name Registration	585
Registering NetBIOS Names Using Broadcasts	585
Registering NetBIOS Names Using WINS	586

NetBT Name Resolution	586
The NetBIOS Name Cache	587
WINS Name Resolution	588
Broadcast Name Resolution	591
LMHOSTS Name Resolution	591
Using DNS for Windows Name Resolution	592
Understanding Domain Name System Services	593
DNS Name Registration	593
DNS Name Resolution	594
Using a HOSTS File	595
Installing a WINS Server	595
Using the WINS Manager	596
LMHOST Files	600
Installing a Windows NT DNS Server	602
Using the DNS Manager	603
Using WINS for DNS Lookups	604
Enabling Name Resolution at Windows Network Client Workstations	605
Choosing the Best Name Resolution Method for Your Network	606
From Here...	607

26 Installing and Configuring Peer Web Services 609

Installing PWS from the CD-ROM	610
Installing the Correct Processor Version	610
The INETSTP Program	610
Internet Service Manager	613
The WWW Service	613
The FTP Service	620
The Gopher Service	626
Stopping, Starting, and Pausing Services	629
Connecting to and Viewing Other Servers	631
Service View Options	632
Securing Peer Web Services	633
Remotely Configuring Peer Web Services	634
From Here...	635

VI Working with the Registry

27 Registry Overview 639

- Working with the Registry 640
 - The Registry Editors 640
 - Focusing on the Registry 641

28 Understanding the Registry 643

- Overview of the Registry 644
 - Registry Cautions 644
 - Advantages of the Registry 644
 - Disadvantages of the Registry 645
 - How the Registry Is Used by Windows NT 645
 - Items that Modify the Registry 645
- Replacing and Supplementing INI Files 646
 - Why Keep INI Files? 647
- How the Registry Is Organized 647
 - Registry Keys 648
 - Registry Subkeys 650
 - Registry Values 655
 - Registry Hives and Files 656
- Exploring the Interaction Between the Registry and Windows NT 658
- INI Entries in the Registry 660
- Registry Size Limits 663
- Using the Windows NT Diagnostics Program to View Registry Settings 664
- Comparing the Windows NT and Windows 95 Registries 667
 - Windows NT versus Windows 95 Registry Files 667
 - Windows NT versus Windows 95 Registry Structure 668
- From Here... 668

29 Backing Up and Editing the Registry 669

- When Is This Trip Necessary? 670
 - Removing Improperly Deleted Files 670
 - Resolving Software Incompatibilities 670
 - Tweaking User Logon 671
 - Disabling System Shutdown 672

Understanding the Importance of Backups	673
Backing Up the Registry	675
Automatic Backups	675
Using NT Backup	676
Using REGBACK.EXE	677
Using REGEDT32 to Back Up the Registry	677
Using REGEDIT.EXE to Back Up the Registry	678
Indirectly Modifying the Registry	679
Using the Registry Editors	680
Using REGEDIT	680
Using REGEDT32	681
From Here...	685

30 Restoring and Repairing the Registry 687

Overview of Common Problems	688
When Can't Backups Help?	688
Automatic Registry Repair	689
Restoring the Registry from a Backup	690
Using NT Backup	690
Restoring Files Using REGREST	691
Restoring Files Using RDISK	691
Using the Emergency Repair Disk	692
Restoring Part of the Registry	693
From Here...	695

VII Administering a Windows NT Workstation

31 Administration Overview 699

Managing Users	700
Managing Servers Properties	701
Managing the File System	701
Managing Printers	701
Monitoring and Controlling System Performance	702

32 Administering Users 703

- Creating and Modifying User Accounts 704
 - Overview of User Manager 704
 - Understanding Accounts and Groups 705
 - Local versus Global Groups 707
 - Built-In Groups 708
 - Controlling Views and Selecting Users 711
 - Creating User Accounts 712
 - Creating Groups 717
 - About Permissions 719
 - Understanding and Assigning Access Rights 720
 - Administering Accounts Remotely 723
 - Installing the Tools 724
 - Connecting Remotely 724
- Managing User Profiles 727
 - Understanding Profiles 727
 - How Profiles Are Created and Stored 728
 - Specifying a Profile Path 729
 - Supporting Roaming Users 729
 - Copying Profiles 730
 - How Profiles Are Updated 731
- Using System Policies 732
 - Using the System Policy Editor 733
 - Customizing the System Policy 734
 - Using Manual Update Mode 737
- Setting Account Policies 738
 - From Here... 740

33 Managing Server Properties 741

- Controlling Resource Access 742
 - Understanding Permissions 742
 - An Overview of Sharing 744
 - Applying Share Permissions 746
- Replicating Directories 748
 - Importing Directories 749
- Managing Printers 749
 - Overview of Local Printing 749
 - Remote Printing 750

Installing a Printer	752
Setting Printer Properties	756
Sharing a Printer	756
Managing Print Queues	757
Using a Printer Pool	758
Using Custom Separator Pages	760
Setting Printer Server Properties	762
From Here...	764

Appendixes

A Registry Customization Tips 767

Registry Editing Tools	768
Desktop Tools That Use the Registry	770
Registry Backup Tools	771
Where Do I Get These Tools?	772
On the Web	773
ftp Sites	773
On CompuServe	773
On the Microsoft Network	774
