Contents

Preface ix

1 Overview of Object-Oriented Analysis

1.1 Setting Up for the Analysis 1

1.2 Information Models 3

1.3 State Models 3

1.4 Process Models 6

1.5 The Work Products of OOA 9

1.6 Preview 9

2 Information Modeling Concepts

2.1 Objects 11

2.2 Attributes 14

2.3 Relationships 21

2.4 Relationship Formalization 24

2.5 Composition of Relationships 26

2.6 Subtypes and Supertypes 28

2.7 Work Products 31

3 Lifecycles of Objects

3.1 Behavior Patterns in the Real World 33
3.2 Lifecycles and the State Transition Diagram 34
3.3 States 38
3.4 Events 42
3.5 Actions 44
3.6 Transitions and the State Transition Table 50
3.7 Timers 52
3.8 Common Lifecycle Forms 54
3.9 Forming Lifecycles 55
3.10 Lifecycles for Subtypes and Supertypes 57
3.11 When to Form Lifecycles 60
3.12 Failure Analysis 62
3.13 Work Products 64

4 Dynamics of Relationships

4.1 Relationship Dynamics 67
4.2 Lifecycles of Relationships 68
4.3 Dynamic Relationships without Lifecycles 70
4.4 Relationships Involving Competition: The Monitor 70
4.5 The General Case of a Competitive Relationship 76
4.6 Competitive Relationships with Instance Lifecycles 80
4.7 Modeling Suggestions 82

5 System Dynamics

5.1 Object Communication Model 85

5.2 Layering of Objects 87
5.3 Patterns of Communication 93
5.4 Threads of Control 94
5.5 Simulation 101
5.6 How to Think about Time 104
5.7 Repetitive Control 108

6 Process Models
6.1 Specifying an Action 111
6.2 Action Data Flow Diagrams 112
6.3 Order of Process Execution 122
6.4 Reuse of Processes 123
6.5 Forming and Assigning Processes 124
6.6 Naming and Describing Processes 128
6.7 State Process Table 129
6.8 Object Access Model 131
6.9 Work Products 132

7 Domains
7.1 Concept of a Domain 133
7.2 Types of Domains 135
7.3 Bridges 138
7.4 Defining Domains 140
7.5 Using OOA with Multiple Domains 142

8 Managing a Large Domain
8.1 Concept of a Subsystem 145
8.2 Initial Definition of Subsystems 146

8.3 Analysis for a Large Domain 148
8.4 Domain-Level Models 151
8.5 Project Matrix 154
8.6 Subsystem Notebook 158

9 Transforming Object-Oriented Analysis into Object-Oriented Design
9.1 Background 161
9.2 Overview of the Design 163
9.3 The State Machine Mechanism of the Architecture 164
9.4 The Timer Class 170
9.5 Class Diagrams for the Application Classes 171
9.6 Inheritance 179
9.7 Class Structure Charts for the Application Classes 181
9.8 The Main Program 189
9.9 Extending and Using the Architecture 192
9.10 Recursive Design 195

Appendices

A OODLE: A Language-Independent Notation for Object-Oriented Design 201

B Using Object-Oriented Analysis with DOD-STD-2167A 223

Index 245
