

# Pathogenesis and Immunotherapeutic Aspects of Crohn's Disease

## *Role of Mycobacteria*

*Arnold Stronkhorst*

# Contents

<i>Chapter 1:</i>	Introduction; an overview of mycobacterial involvement, immunological aspects, and immunotherapeutical possibilities in Crohn's disease.	9
<i>Chapter 2:</i>	Differential cytokine induction in vitro by mycobacterium paratuberculosis and its purified protein derivative in whole blood.	55
<i>Chapter 3:</i>	Serum antibodies to the mycobacterial 45/48 kilodalton doublet antigen in Crohn's disease.	65
<i>Chapter 4:</i>	Effect of intestinal resection on serum antibodies to the mycobacterial 45/48 kilodalton doublet antigen in Crohn's disease.	79
<i>Chapter 5:</i>	Increased cellular immune response to mycobacterial antigens in Crohn's disease.	93
<i>Chapter 6:</i>	Mycobacterial antigens in resection specimens of patients with inflammatory bowel disease. In situ detection of mycobacterial antigen in the submucosa and subserosa of patients with Crohn's disease.	103
<i>Chapter 7:</i>	Circulating T-cell activation markers in Crohn's disease.	121
<i>Chapter 8:</i>	Tumour Necrosis Factor antibody treatment in Crohn's disease.	131
<i>Chapter 9:</i>	CD4 antibody treatment in patients with active Crohn's disease, a phase 1 dose finding study.	135
<i>Chapter 10:</i>	Anti-CD4 therapy abolishes HLA-DR expression on enterocytes.	153
<i>Chapter 11:</i>	Summary and samenvatting.	161
<i>Curriculum Vitae</i>		173
