

SCHAUM'S OUTLINE SERIES

THEORY AND PROBLEMS OF

SI (metric) edition

Thermodynamics

M. M. ABBOTT

H. C. VAN NESS

INCLUDING 225 SOLVED PROBLEMS

SCHAUM'S OUTLINE SERIES

McGRAW-HILL BOOK COMPANY

CONTENTS

Chapter		Page
5	EQUATIONS OF STATE AND CORRESPONDING-STATES CORRELATIONS FOR PVT SYSTEMS	143
5.1	The Compressibility Factor	143
5.2	Virial Equations of State	146
5.3	Truncated Forms of the Virial Equations	150
5.4	Empirical Equations of State	152
5.5	Corresponding-States Correlations	155
<hr/>		
6	THERMODYNAMICS OF FLOW PROCESSES	181
6.1	Energy Equations for Closed Systems	181
6.2	Energy Equations for Steady-State-Flow Processes	186
6.3	General Energy Equations	190
6.4	Application of the Second Law to Flow Processes	192
6.5	The Mechanical-Energy Balance	198
<hr/>		
7	CHEMICAL THERMODYNAMICS	232
7.1	Partial Molar Properties	232
7.2	Fugacity. Fugacity Coefficient	236
7.3	Equality of Fugacities as a Criterion of Phase Equilibrium	243
7.4	Ideal Solutions. Standard States. Property Changes of Mixing. Activity	246
7.5	Excess Properties. Activity Coefficient	251
7.6	Phase Diagrams for Binary Systems	255
7.7	Vapor-Liquid Equilibrium Calculations	261
7.8	Chemical-Reaction Stoichiometry. Property Changes of Reaction	269
7.9	Chemical-Reaction-Equilibrium Calculations	278
<hr/>		
8	THERMODYNAMIC ANALYSIS OF PROCESSES	311
8.1	The Work of a <i>Completely</i> Reversible Process	311
8.2	Energy that Becomes Unavailable for Work	314
	<i>Review Questions for Chapters 5 through 8</i>	336
<hr/>		
Appendix 1	CONVERSION FACTORS	339
<hr/>		
Appendix 2	PREFIXES FOR DECIMAL MULTIPLES AND SUBMULTIPLES ...	340
<hr/>		
Appendix 3	CRITICAL CONSTANTS AND ACENTRIC FACTOR	340
<hr/>		
	INDEX	341
