

**SCHAUM'S OUTLINE SERIES**

**THEORY AND PROBLEMS OF**

# **OPTICS**

**EUGENE HECHT**

**INCLUDING 346 SOLVED PROBLEMS**

**SCHAUM'S OUTLINE SERIES IN SCIENCE**

**McGRAW-HILL BOOK COMPANY**

# CONTENTS

		Page
<b>Chapter 1</b>	<b>WAVE MOTION</b> .....	1
1.1	Introduction .....	1
1.2	The Differential Wave Equation .....	1
1.3	Sinusoidal Waves .....	3
1.4	Phase and Phase Velocity .....	6
1.5	Complex Number Representation .....	8
1.6	Three-Dimensional Waves .....	11
1.7	Wavefronts .....	15
<hr/>		
<b>Chapter 2</b>	<b>ELECTROMAGNETIC WAVES AND PHOTONS</b> .....	20
2.1	Maxwell's Equations and Electromagnetic Waves .....	20
2.2	The Index of Refraction .....	23
2.3	Irradiance .....	24
2.4	Photons – Energy and Momentum .....	26
2.5	The Electromagnetic-Photon Spectrum .....	27
<hr/>		
<b>Chapter 3</b>	<b>REFLECTION AND TRANSMISSION</b> .....	32
3.1	Introduction .....	32
3.2	The Laws of Reflection and Refraction .....	32
3.3	Fermat's Principle .....	36
3.4	The Fresnel Equations .....	40
3.5	The Critical Angle .....	46
<hr/>		
<b>Chapter 4</b>	<b>GEOMETRICAL OPTICS</b> .....	51
4.1	Introduction .....	51
4.2	Aspherical Refracting Surfaces .....	51
4.3	Spherical Refracting Surfaces .....	54
4.4	The Thin Lens Equation .....	57
4.5	Simple Thin Lens Imagery .....	62
4.6	Compound Thin Lenses .....	68
4.7	Thick Lenses .....	72
4.8	Lens Combinations .....	76
4.9	Planar, Aspherical and Spherical Mirrors .....	79

## CONTENTS

	Page
<b>Chapter 5 POLARIZATION</b> .....	93
5.1 Introduction .....	93
5.2 Plane Polarization .....	93
5.3 Circular Polarization .....	96
5.4 Elliptical Polarization .....	99
5.5 Natural and Partially Polarized Light .....	102
5.6 Dichroism and Polaroid .....	104
5.7 Polarization by Reflection .....	108
5.8 Birefringence .....	111
<hr/>	
<b>Chapter 6 INTERFERENCE AND COHERENCE</b> .....	123
6.1 Introduction .....	123
6.2 Interference of Two Waves .....	123
6.3 Wavefront-Splitting Interferometers .....	128
6.4 Amplitude Splitting by Thin Films .....	135
6.5 Amplitude-Splitting Interferometers .....	142
6.6 Coherence .....	148
<hr/>	
<b>Chapter 7 DIFFRACTION</b> .....	159
7.1 Introduction .....	159
7.2 Radiation from a Coherent Line Source .....	159
7.3 Fraunhofer Diffraction by One and Two Narrow Slits .....	164
7.4 Multiple Narrow Slits – The Diffraction Grating .....	170
7.5 Rectangular and Circular Apertures – Fraunhofer Diffraction .....	176
7.6 Fresnel Diffraction – Circular Systems .....	182
7.7 Fresnel Diffraction – Straight Edges .....	190
<hr/>	
<b>Chapter 8 INTRODUCTION TO FOURIER OPTICS</b> .....	205
8.1 Periodic Waves and Fourier Series .....	205
8.2 Fourier Transforms .....	211
8.3 Convolution .....	217
<hr/>	
<b>Appendix VALUES OF THE FUNCTION <math>(\sin u)/u \equiv \text{sinc } u</math></b> .....	231
<hr/>	
<b>INDEX</b> .....	237
