

QUANTUM THEORY  
• of the •  
SOLID STATE

*Second Edition*

— Joseph Callaway —

# Contents

<i>Preface to the Second Edition</i> . . . . .	<i>xi</i>
<i>Preface to the First Edition</i> . . . . .	<i>xiii</i>
CHAPTER 1	
<b>Electronic Structure</b> . . . . .	<b>1</b>
1.1 Bloch's Theorem . . . . .	2
1.2 The Reciprocal Lattice and the Brillouin Zone . . . . .	4
1.3 Plane Wave Expansions . . . . .	10
1.4 The Density of States . . . . .	19
1.5 General Properties of Energy Bands . . . . .	27
1.6 The Calculation of Energy Bands . . . . .	45
1.7 The Calculation of Energy Bands: Cell Methods . . . . .	72
1.8 The Hartree-Fock Method . . . . .	95
1.9 Density Functional Theory . . . . .	106
1.10 Surfaces . . . . .	116
Problems . . . . .	120
References . . . . .	122
CHAPTER 2	
<b>Lattice Dynamics</b> . . . . .	<b>127</b>
2.1 Equations of Motion and Their Solution . . . . .	127
2.2 Optical Properties: Classical Theory . . . . .	136
2.3 Quantization of Lattice Vibrations . . . . .	140
2.4 Thermodynamics . . . . .	145
2.5 Scattering of Thermal Neutrons by a Vibrating Crystal Lattice . . . . .	149
2.6 The Mössbauer Effect . . . . .	163
2.7 Lattice Thermal Conductivity . . . . .	168

2.8	Quantum Theory of the Interaction of Lattice Vibrations with Electro- magnetic Radiation . . . . .	188
	Problems . . . . .	193
	References . . . . .	195
<b>CHAPTER 3</b>		
	<b>Symmetry and Its Consequences . . . . .</b>	<b>197</b>
3.1	Space Groups and Point Groups . . . . .	198
3.2	Irreducible Representations: Point Groups . . . . .	205
3.3	Symmetry with Spin . . . . .	216
3.4	Ions in Crystals . . . . .	221
3.5	Irreducible Representations: Translation and Space Groups . . . . .	244
3.6	Time Reversal Symmetry . . . . .	253
	Problems . . . . .	259
	References . . . . .	261
<b>CHAPTER 4</b>		
	<b>Phenomenological Theories of Magnetic Order . . . . .</b>	<b>263</b>
4.1	General Introduction . . . . .	263
4.2	Interactions of Atomic Spins . . . . .	265
4.3	Molecular Field Theory . . . . .	276
4.4	Spin Waves . . . . .	284
4.5	Scattering of Slow Neutrons by Magnetically Ordered Systems . . . . .	311
4.6	The Ising Model . . . . .	321
4.7	The Magnetic Phase Transition . . . . .	337
4.8	The Renormalization Group . . . . .	360
	Problems . . . . .	371
	References . . . . .	372
<b>CHAPTER 5</b>		
	<b>Impurities and Alloys . . . . .</b>	<b>377</b>
5.1	Representation Theory . . . . .	377
5.2	Localized Impurity States . . . . .	388
5.3	Impurities with Long Range Potentials . . . . .	412
5.4	Alloys . . . . .	423
5.5	Magnetic Impurities . . . . .	448
	Problems . . . . .	476
	References . . . . .	478
<b>CHAPTER 6</b>		
	<b>External Fields . . . . .</b>	<b>481</b>
6.1	The Electric Field . . . . .	481
6.2	The Steady Magnetic Field . . . . .	513
6.3	The Low Field Diamagnetic Susceptibility . . . . .	536

6.4	The de Haas–van Alphen Effect . . . . .	543
6.5	Optical Properties . . . . .	554
6.6	Excitons . . . . .	582
6.7	Effect of External Fields on Optical Properties . . . . .	597
	Problems . . . . .	605
	References . . . . .	607
CHAPTER 7		
	<b>Electrons, Phonons, and Transport . . . . .</b>	<b>611</b>
7.1	The Electron–Phonon Interaction . . . . .	611
7.2	Transport Theory . . . . .	631
7.3	The Hall Effect and Magnetoresistance . . . . .	645
7.4	Electromagnetic Properties of Metals . . . . .	665
7.5	Transport in Strongly Disordered and Lower Dimensional Systems . . . . .	684
7.6	Electrical Resistance Due to Lattice Vibrations . . . . .	702
7.7	The Polaron Problem . . . . .	709
7.8	Superconductivity . . . . .	720
	Problems . . . . .	754
	References . . . . .	755
CHAPTER 8		
	<b>Aspects of the Electron–Electron Interaction . . . . .</b>	<b>761</b>
8.1	Direct Calculations of Electron Interactions . . . . .	763
8.2	Properties of Green’s Functions . . . . .	776
8.3	Some Properties of an Electron Gas . . . . .	813
8.4	The Landau Theory of Fermi Liquids . . . . .	839
8.5	Electron Interaction and Magnetic Order . . . . .	855
8.6	Superconductivity Revisited . . . . .	894
8.7	Many-Body Effects in Semiconductors . . . . .	908
	Problems . . . . .	914
	References . . . . .	916
APPENDIX A		
	<b>Summation Relations . . . . .</b>	<b>921</b>
APPENDIX B		
	<b>Quantization of the Free Electromagnetic Field . . . . .</b>	<b>925</b>
APPENDIX C		
	<b>Character Tables and Compatibility Tables . . . . .</b>	<b>929</b>
APPENDIX D		
	<b>Second Quantization for a System of Fermions . . . . .</b>	<b>935</b>
	References . . . . .	939
	<i>Index . . . . .</i>	<i>941</i>
