

Principles of  
**Foundry  
Technology**

Second Edition

**P L JAIN**

# CONTENTS

<i>Fore word</i>	v
<i>Preface to the First Edition</i>	vii
<i>Preface to the Second Edition</i>	ix
<b>1. INTRODUCTION</b>	<b>1</b>
<b>2. TECHNOLOGY OF PATTERNMAKING</b>	<b>5</b>
2.1 Requirement 5	
2.2 Pattern materials 5	
2.3 Machines and tools for patternmaking 14	
2.4 Allowances and other technological considerations 24	
2.5 Metal patterns 43	
2.6 Life expectancy of patterns 44	
2.7 Pattern storage and repair 45	
<b>3. TECHNOLOGY OF MOULDING AND COREMAKING</b>	<b>46</b>
3.1 Moulding sands 46	
3.2 Sand conditioning 68	
3.3 Moulding processes 73	
3.4 Core sands and coremaking 77	
3.5 Machine moulding 81	
3.6 'Special' sand moulding processes 88	
<b>4. TECHNOLOGY OF METAL MOULD CASTING PROCESSES</b>	<b>109</b>
4.1 Permanent mould casting 109	
4.2 Pressure die casting 111	
4.3 Low pressure die casting 118	
4.4 Squeeze casting 119	
4.5 Centrifugal casting 119	
4.6 Continuous casting 121	
4.7 Electro-slag casting 122	
<b>5. GATING AND RISERING OF CASTINGS</b>	<b>123</b>
5.1 Gating system 123	
5.2 Risering of castings 132	
5.3 Casting design 138	

**viii Contents**

<b>6. TECHNOLOGY OF MELTING AND CASTING</b>	<b>143</b>
6.1 Melting equipment for foundries 143	
6.2 Refractories for melting units 172	
6.3 Metallurgical characteristics of cast metals 175	
<b>7. DEFECTS IN CASTING AND QUALITY CONTROL</b>	<b>194</b>
7.1 Defects in castings 194	
7.2 Inspection and testing of castings 199	
7.3 Quality control in foundries 210	
<b>8. FETTLING AND HEAT TREATMENT OF CASTINGS</b>	<b>212</b>
8.1 Fettling and repair of castings 212	
8.2 Heat treatment of castings 222	
<b>9. MODERNISATION AND MECHANISATION OF FOUNDRIES</b>	<b>238</b>
9.1 Need for modernisation and mechanisation 238	
9.2 Areas of mechanisation 239	
9.3 Pollution control in foundries 247	
9.4 Plant layout for foundries 252	
<i>Suggested Reading</i>	<b>257</b>
