		vii
Preface		vii
Preface to Problem Solving with FORTRAN 77		ix
1 Getting Going		1
1.1 Introduction		1
1.2 Fortran		2
1.3 Running Fortran Programs		2
Exercises		4
2 Elementary Fortran: I		5
2.1 Compound Interest Again		6
2.2 Program Layout		7
2.3 Data Types		9
2.4 Literal Constants		9
2.5 Names and Variables		11
2.6 Vertical Motion under Gravity		13
2.7 Programming Style		14
2.8 Numeric Expressions		14
2.9 Numeric Assignment		16
2.10 Simple Input and Output		17
Exercises		21
3 Elementary Fortran: II		25
3.1 DO Loops		25
3.2 Deciding with IF-THEN-ELSE		29
3.3 Characters		31
3.4 Named Constants		33
3.5 Kind		34
3.6 Complex Type		37
3.7 Introduction to Intrinsic Functions		37

	Exercises	40
4	Program Preparation	45
	4.1 Flowcharts	45
	4.2 Structure Plans	46
	4.3 Structured Programming with Procedures	49
5	Decisions	53
	5.1 The IF Construct	53
	5.2 Logical Type	58
	5.3 The CASE Construct	61
	5.4 The GO TO Statement	62
	Exercises	64
6	Loops	67
	6.1 Deterministic Repetition	67
	6.2 The DO in General	70
	6.3 DO with Non-integer Increments	72
	6.4 Nested DOs: Loan Repayments	73
	6.5 Non-deterministic Loops	75
	6.6 Taking Stock: Modelling a Population of Gnus	84
	Exercises	88
7	Errors	93
	7.1 Compilation Errors	93
	7.2 Run-time Errors	95
	7.3 Errors in Logic	96
	7.4 Rounding Error	96
	Exercises	97
8	Subprograms and Modules	99
	8.1 Internal Subprograms	100
	8.2 The Main Program	105
	8.3 External Subprograms	106
	8.4 Interface Blocks	108
	8.5 Modules	109
	8.6 Scope	112
	8.7 Arguments	114
	8.8 Generic Subprogram Names: Overloading	116
	8.9 Stubs	118
	8.10 Recursion	118
	Exercises	122
9	Arrays	125
	9.1 Mean and Standard Deviation	126
	9.2 Basic Rules and Notation	127
	9.3 Arrays as Subprogram Arguments	129
	9.4 Allocatable (Dynamic) Arrays	131
	9.5 Top of the Class	132
	9.6 Sorting a List: the Bubble Sort	133

9.7	Sorting a List: Quick Sort	136
9.8	More Array Features	139
	Exercises	143
10	Advanced Input and Output	147
10.1	Rabbit Breeding the Fibonacci Way	147
10.2	The PRINT Statement	149
10.3	Formatting Features	150
10.4	Formatted READ	155
10.5	Formatted WRITE	155
10.6	Internal Files	156
10.7	External Files	156
10.8	Non-advancing I/O	161
10.9	Miscellaneous	162
	Exercises	164
11	Handling Characters	165
11.1	Characters	165
11.2	Bar Charts and Frequency Distributions	166
11.3	Sorting Words	167
11.4	Graphs without Graphics	169
11.5	Word Count and Extraction	170
11.6	General Information	172
	Exercises	175
12	Derived Types: Structures	179
12.1	Structures	179
12.2	A Database: Student Records	186
12.3	A Binary Search	192
12.4	Keyed Files	195
12.5	Hashing	197
	Exercises	201
13	Pointer Variables	203
13.1	Introduction	203
13.2	Linked Lists	211
13.3	Hidden Implementations of Abstract Data Types	214
	Exercises	218
14	Simulation	221
14.1	Random Number Generation	221
14.2	Spinning Coins	222
14.3	Rolling Dice	224
14.4	Bacteria Division	225
14.5	A Random Walk	225
14.6	Dealing a Bridge Hand	227
14.7	Traffic Flow	229
	Exercises	232

15	Matrices and Their Applications	235
15.1	Tables: a Concrete Example	236
15.2	Graphs without Graphics	238
15.3	Matrices	241
15.4	Array Handling Features	247
15.5	Networks	250
15.6	Leslie Matrices: Population Growth	254
15.7	Markov Chains	256
15.8	Solution of Linear Equations	259
	Exercises	265
16	Introduction to Numerical Methods	267
16.1	Equations	267
16.2	Integration	273
16.3	Numerical Differentiation	276
16.4	First-order Differential Equations	277
16.5	Runge-Kutta Methods	283
16.6	A Differential Equation Modelling Package	284
16.7	Partial Differential Equations: a Tridiagonal System	289
	Exercises	293
	Epilogue	295
A	Order of Statements in a Program Unit	297
B	Summary of Fortran 90 Statements	299
C	Intrinsic Procedures	315
C.1	Elemental Numeric Functions	316
C.2	Elemental Character-handling Functions	317
C.3	Non-elemental Character-handling Functions	317
C.4	Functions Relating to Numeric Representation	318
C.5	Bit Manipulation Functions	319
C.6	Vector and Matrix Multiplication Functions	319
C.7	Array Reduction Functions	320
C.8	Array Inquiry Functions	320
C.9	Array Construction and Manipulation Functions	320
C.10	Inquiry Functions for Any Type	321
C.11	Elemental Logical Function	322
C.12	Functions Relating to Kind	322
C.13	Transfer Function	322
C.14	Non-elemental Intrinsic Subroutines	322
D	ASCII Character Codes	325
E	Solutions to Selected Exercises	327
	Index	343
