Pascal for Students

including Turbo Pascal

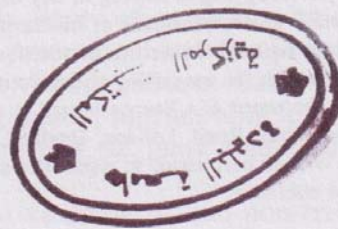

Third Edition

Brian D. Hahn

Department of Mathematics and Applied Mathematics
University of Cape Town
Rondebosch
South Africa

Ray Kemp

Department of Computer Science
Massey University
Palmerston
New Zealand

Contents

Preface to the first edition	iii
Preface to the second edition	iv
Preface to the third edition	v
Introduction	1
Section 1: Pre-defined simple types and control structures	3
1 First steps	5
Introduction	5
1.1 Some simple programs	5
1.2 Constructing a program	12
1.3 Program errors and debugging	19
1.4 Program testing	20
Summary	21
Solutions to quick quizzes	22
Exercises	23
2 Comparisons and characters	26
Introduction	26
2.1 Arithmetic comparisons	26
2.2 Boolean variables and functions	28
2.3 Two programs using Boolean variables	30
2.4 Characters	33
Summary	38
Solutions to quick quizzes	38
Exercises	39
3 Repetition	41
Introduction	41
3.1 The <i>repeat</i> statement	41
3.2 The <i>while</i> statement	46
3.3 Developing a program	51
3.4 The <i>for</i> statement	56
3.5 Use of <i>eoln</i> and <i>eof</i> in repetition statements	57

Summary	58
Solutions to quick quizzes	59
Exercises	61
4 Conditional execution and transfers	63
Introduction	63
4.1 The <i>if</i> statement	63
4.2 The <i>case</i> statement	72
4.3 The <i>goto</i> statement	75
4.4 Data validation	78
Summary	83
Solutions to quick quizzes	84
Exercises	87
5 Subprograms	89
Introduction	89
5.1 Functions	89
5.2 Procedures	94
5.3 Value and variable parameters	99
5.4 Further features of subprograms	104
Summary	110
Solutions to quick quizzes	110
Exercises	113
Section 2: Structured and enumerated data types	115
6 Arrays	117
Introduction	117
6.1 Arrays of scalars	117
6.2 Sorting and searching	122
6.3 Manipulating complete arrays	128
6.4 Arrays of arrays	134
Summary	141
Exercises	141
7 User-defined values, subranges and record structures	143
Introduction	143
7.1 Enumerated types	143
7.2 Subranges	152
7.3 Records	152
7.4 Arrays of records	154
7.5 Record variants	165
Summary	167
Exercises	167
8 Files	168
Introduction	168
8.1 Defining a sequential file	168
8.2 Initialising and writing to a file	169

8.3	Reading from a file	172
8.4	File update	175
8.5	Textfiles	180
8.6	<i>Input and output</i>	183
	Summary	185
	Exercises	185
9	Pointer structures	187
	Introduction	187
9.1	Lists and pointers	187
9.2	Ordered lists	193
9.3	Recursion revisited	196
9.4	Binary search trees	200
9.5	Other pointer structures	205
	Summary	205
	Exercises	205
10	Set structures and tackling a larger problem	207
	Introduction	207
10.1	Sets	207
10.2	Getting it together	211
	Summary	225
	Exercises	225
	Section 3: Turbo Pascal	227
11	General Turbo Pascal extensions and exceptions	229
11.1	General syntax	229
11.2	Types	231
11.3	String type	233
11.4	Expressions	237
11.5	Standard input and output	238
11.6	Statements	240
11.7	Procedures and functions	240
11.8	Memory matters	241
11.9	Units	242
11.10	The <i>system</i> unit	244
11.11	The <i>crt</i> unit	246
11.12	The <i>dos</i> unit	251
11.13	Compiler directives	251
	Summary	252
12	Turbo Pascal files	253
12.1	Text files	253
12.2	Random access with typed files	260
12.3	Untyped files	263
12.4	Device files	265
	Summary	266

13 Turbo Pascal graphics	267
13.1 Some basics	267
13.2 <i>myworld</i> : a world coordinate graphics unit	274
13.3 Fractals	282
13.4 Some other graphics goodies	285
Summary	285
Exercises	286
Section 4: Mathematical applications of Turbo Pascal	289
14 Simulation	291
14.1 Random number generation	291
14.2 Spinning coins	292
14.3 Rolling dice	292
14.4 A random walk	293
14.5 Traffic flow	294
Summary	297
Exercises	297
15 Matrices and their applications	299
15.1 Matrices	299
15.2 Reachability of spies	301
15.3 Leslie matrices: population growth	304
15.4 Markov chains	306
15.5 Solution of linear equations	309
Summary	311
Exercises	311
16 Introduction to numerical methods	313
16.1 Equations	313
16.2 Integration	317
16.3 Numerical differentiation	319
16.4 First-order differential equations	320
16.5 Runge–Kutta methods	324
16.6 A differential equation modelling package	325
16.7 Partial differential equations: a tridiagonal system	331
Summary	335
Exercises	335
Appendices	337
A: Syntax diagrams for Pascal	337
B: Reserved words and required identifiers	348
C: Required functions and procedures	349
D: Turbo Pascal functions and procedures	351
D.1 <i>system</i> unit	351
D.2 <i>crt</i> unit	352
D.3 <i>dos</i> unit	353
D.4 <i>graph</i> unit	353
