

GEOCHEMISTRY FOR HYDROLOGISTS

EDITIONS TECHNIP

The Mouth of the Ganga.

B. C. RAYMAHASHAY

CONTENTS

Chapter one	1
INTRODUCTION	
Solubility of gases; Partial pressure of gases; Concentration of dissolved species; Cation-anion balance; Law of mass action; Ionic strength and activity; Use of thermodynamic data; Problems; References.	
Chapter Two	13
WEATHERABILITY OF ROCKS	
Atomic structure of rock-forming silicate minerals; Weatherability series; Relative mobility of elements; Problems; References.	
Chapter Three	23
ARBON DIOXIDE-WATER EQUILIBRIA	
Solubility of carbon dioxide; pH of rain water; Effective CO_2 -pressure; Alkalinity of water; Impact of acid rain; Problems; References.	
Chapter Four	36
CARBONATE-WATER REACTIONS	
Dissolution and precipitation of calcite; Ground water in limestone caves; Calcite in sea water; Origin of dolomite; Marine evaporite deposits; Saline lakes; Problems; References.	
Chapter Five	58
SILICATE-WATER REACTIONS	
Weathering and soil formation; Influence of weathering on ground water quality; Influence of weathering on sea water composition; Thermodynamic stability; Problems; References.	

Chapter Six	81
REDOX REACTIONS	
Concept of <i>pe</i> ; <i>Eh-pH</i> diagrams; Redox reactions among iron species; Limitations of <i>Eh</i> measurement; Problems; References.	
Chapter Seven	99
RIVER EROSION AND WATER QUALITY	
Suspended load and rate of mechanical erosion; Dissolved load and rate of chemical erosion; Flux of materials to the oceans; Interference by man; Water quality models; Problems; References.	
Chapter Eight	130
SOILS AND SEDIMENTS AS SINKS FOR POLLUTANTS	
Shape and size of clay particles; Clay colloids in water; Ion exchange and adsorption; Other soil colloids; Field and laboratory studies; Problems; References.	
Chapter Nine	147
WATER QUALITY IN GEOTHERMAL AREAS	
Mineral equilibria at elevated temperatures; Estimation of under ground temperature; Isotope data; Composition of thermal waters; Alteration of rocks; Problems; References.	
Appendix I	173
STANDARD METHODS	
Collection of water samples; Temperature and <i>pH</i> ; Alkalinity (HCO_3); Sodium, potassium, calcium and magnesium; Total iron; Silica; Chloride; Sulphate; Rock and soil samples; Soil <i>pH</i> ; Organic matter; Cation exchange capacity; Bibliography.	
Appendix II	179
ATOMIC WEIGHTS OF SELECTED ELEMENTS
