

**Introduction to**

**ENGINEERING  
MATERIALS**

**B K Agrawal**

# Contents

Preface

iii

## 1 Classification and Properties of Materials

1

- 1.1 Classification of engineering materials 1
- 1.2 The property spectrum of materials 3
- 1.3 Hardness test 5
- 1.4 Tensile test 11
- 1.5 Bend test 16
- 1.6 Impact test 18
- 1.7 Fatigue test 20
- 1.8 Creep test 24

## 2 The Structure of Materials

28

- 2.1 Atomic structure 28
- 2.2 Crystal structure 31
- 2.3 Crystal imperfection 42
- 2.4 Microstructure 44
- 2.5 Phases in alloys 46
- 2.6 Macrostructure 52
- 2.7 Structure of engineering materials 52
- 2.8 Dislocations 54
- 2.9 Strengthening mechanisms in metals 55
- 2.10 Polycrystalline metals 61

## 3 Equilibrium Diagrams

65

- 3.1 Isomorphous systems 66
- 3.2 Eutectic systems 70
- 3.3 Peritectic systems 73
- 3.4 Monotectic systems 73
- 3.5 Eutectoid systems 74

## 4 Plain Carbon and Alloy Steels

79

- 4.1 Plain carbon steels 79
- 4.2 Iron-carbon phase diagram 79
- 4.3 Classification and designation of steels 89
- 4.4 Properties and applications of steels 92
- 4.5 Alloy steels 95
- 4.6 Effects of alloying elements 95
- 4.7 Functions and uses of alloying elements 97
- 4.8 Typical examples of alloy steels 101

<b>15 Composites</b>	<b>294</b>
15.1 Dispersion reinforced composites	294
15.2 Particle reinforced composites	295
15.3 Laminated composites	300
15.4 Fibre-reinforced composites	303
<b>16 Non-Destructive Testing and Inspection</b>	<b>308</b>
16.1 Liquid penetrant method	309
16.2 Magnetic particle inspection	309
16.3 Eddy-current inspection	311
16.4 Radiographic inspection	312
16.5 Ultrasonic inspection	314
16.6 Concrete test hammer	316
<b>17 Macro- and Micro-Examination of Metals</b>	<b>318</b>
17.1 Macro-examination	318
17.2 Specimen preparation	321
17.3 Macro-Examination of the specimen	324
17.4 Metallurgical optical microscope	326
17.5 Electron microscope	328
17.6 Scanning electron microscope	330
17.7 Electron-probe microanalyzer	331
<b>APPENDICES</b>	<b>333</b>
1. Temperature conversion table	333
2. Hardness conversion table	335
3. Conversion of millivolts to degrees centigrades	337
4. Physical and mathematical constants	338
5. The SI units and useful conversion factors	339
6. Indian standard code for designation of steels	341
7. AISI-SAE steel compositions	342
8. British standard designation for steels	344
9. LM series for cast aluminium alloys	348
10. Etchants for microscopic examination	349
