

HYDRAULIC STRUCTURES

SECOND EDITION

P. Novak, A.I.B. Moffat,
C. Nalluri, R. Narayanan

E & FN SPON
An Imprint of Chapman & Hall

Contents

Preface	xi
Preface to the first edition	xiii
Acknowledgements	xv
List of tables	xvii
List of main symbols	xix

Part One

Dam engineering

1 Elements of dam engineering	3
1.1 General	3
1.2 Introductory perspectives	3
1.3 Embankment dam types and characteristics	9
1.4 Concrete dam types and characteristics	12
1.5 Spillways, outlets and ancillary works	16
1.6 Site assessment and selection of type of dam	19
1.7 Loads on dams	30
References	34
2 Embankment dam engineering	37
2.1 Introduction	37
2.2 Nature and classification of engineering soils	37
2.3 Engineering characteristics of soils	41
2.4 Principles of design	51
2.5 Materials and construction	61
2.6 Seepage analysis	65
2.7 Stability and stress	68
2.8 Settlement and deformation	76
2.9 Rockfill and rockfill embankments	79
2.10 Geosynthetics in embankment dams	80
Worked examples	82
References	87

3	Concrete dam engineering	93
3.1	Loading: concepts and criteria	93
3.2	Gravity dam analysis	105
3.3	Buttress dam analysis	125
3.4	Arch dam analysis	127
3.5	Design features and construction	134
3.6	Concrete for dams	140
3.7	The roller-compacted concrete gravity dam	143
	Worked examples	147
	References	153
4	Dam outlet works	157
4.1	Introduction	157
4.2	The design flood	158
4.3	Flood routing	160
4.4	Freeboard	162
4.5	Sedimentation in reservoirs	165
4.6	Cavitation	168
4.7	Spillways	170
4.8	Bottom outlets	193
	Worked examples	194
	References	198
5	Energy dissipation	203
5.1	General	203
5.2	Energy dissipation on spillways	204
5.3	Stilling basins	207
5.4	Plunge pools	216
5.5	Energy dissipation at bottom outlets	217
	Worked examples	219
	References	221
6	Gates and valves	223
6.1	Classification of gates	223
6.2	Crest gates	223
6.3	High-head gates and valves	229
6.4	Hydrodynamic forces acting on gates	232
	References	234
7	Dam safety: instrumentation and surveillance	237
7.1	Introduction	237
7.2	Instrumentation	238
7.3	Surveillance	250
7.4	Dam safety legislation	251

7.5 Reservoir hazard analysis	253
References	255

Part Two Other hydraulic structures

8 River engineering	261
8.1 Introduction	261
8.2 Some basic principles of open-channel flow	261
8.3 River morphology and régime	266
8.4 River surveys	271
8.5 Flow-measuring structures	277
8.6 River flood routing	280
8.7 River improvement	282
Worked examples	291
References	298
9 Diversion works	301
9.1 Weirs and barrages; worked example	301
9.2 Intakes; worked example	320
9.3 Fish passes	337
References	342
10 Cross-drainage and drop structures	345
10.1 Aqueducts and canal inlets and outlets; worked examples	345
10.2 Culverts, bridges and dips; worked examples	354
10.3 Drop structures; worked examples	373
References	383
11 Inland waterways	387
11.1 Introduction	387
11.2 Definitions, classifications and some UK and other waterways	388
11.3 Multipurpose utilization of waterways	392
11.4 Transport on inland waterways	394
11.5 Canalization and navigation canals	396
11.6 Resistance of ships	398
11.7 Wave action on banks	400
11.8 Locks	402
11.9 Thrift locks	411
11.10 Lifts and inclined planes	412
11.11 Lock approaches	413
11.12 Inland ports	415
Worked examples	416
References	418

12	Hydroelectric power development	421
12.1	Introduction	421
12.2	Worldwide hydroelectric power development in perspective	421
12.3	Power supply and demand	422
12.4	Some fundamental definitions	423
12.5	Types of water power development	424
12.6	Head classification of hydropower plants	427
12.7	Streamflow data essential for the assessment of water-power potential	427
12.8	Hydraulic turbines and their selection	430
12.9	Other components of hydropower plants	442
12.10	Surge tanks	449
12.11	Minihydroelectric power plant development	453
12.12	Renewable energy sources	454
	Worked examples	458
	References	470
13	Pumping stations	473
13.1	Introduction	473
13.2	Pumps and their classification	473
13.3	Design of pumping mains	478
13.4	Classification of pumping stations and intakes	480
13.5	Sump design	483
13.6	Screening devices	486
13.7	Benching	486
13.8	Surges	486
13.9	General design considerations of pumping stations and mains	489
	Worked examples	491
	References	497
14	Coastal and offshore engineering	499
14.1	Introduction	499
14.2	Wave motion	500
14.3	Range of validity of linear theory	507
14.4	Waves approaching a shore	508
14.5	Wave breaking	511
14.6	Wave reflection	513
14.7	Oscillations in two-dimensional basins	514
14.8	Wave diffraction	514
14.9	Wave prediction	516
14.10	Wave statistics	520
14.11	Coastal defence	522
14.12	Wave forces on coastal structures	527

14.13	Wave run-up	530
14.14	Rubble-mound breakwaters	533
14.15	Forces on piles and pipelines	537
14.16	Vortex-induced oscillations	543
14.17	Sea outfalls	548
	Worked examples	557
	References	569
15	Models in hydraulic engineering	573
15.1	Hydraulic models	573
15.2	Structural models	580
	Worked examples	584
	References	585
	Author index	587
	Subject index	593
