

AMD-Vol. 197

MECHANICAL TESTING OF CERAMICS AND CERAMIC COMPOSITES

edited by
A. Gilat

CONTENTS

Utilization of the Split Hopkinson Pressure Bar Under Hydrostatic Confining Pressure to Characterize the Compressive Behavior of Ceramics and Ceramic Composites <i>James Lankford, Jr.</i>	1
Static and Dynamic Tension Testing of Ceramics and Ceramic Composites <i>M. E. Walter, D. M. Owen, and G. Ravichandran</i>	13
Pressure-Shear Impact Investigation of Dynamic Fragmentation and Flow of Ceramics <i>S. Sairam and R. J. Clifton</i>	23
A Spherical Cavity Expansion Experiment for Characterizing Penetration Resistance of Armor Ceramics <i>Richard W. Klopp, Donald A. Shockey, Lynn Seaman, Donald R. Curran, Joseph T. McGinn, and Thibaut de Resseguier</i>	41
A Novel Tensile Test Technique for Structural Ceramics <i>R. Nathan Katz, Harald Lucas, and Houssam Toutanji</i>	61
A New Testing Method for Ceramic R-Curve Determination at Elevated Temperatures <i>Kwanho Yang, C. James Hwang, and John A. Rice</i>	73
Creep-Rupture and Gradient Creep-Rupture Testing of Silicon Nitride <i>Charles S. White, Jonathan A. Wade, and Ara M. Vartabedian</i>	85
Experimental Demonstration of Potential Failure Modes in Brittle-Matrix Composites <i>Ran Y. Kim, Allan S. Crasto, and Nicholas J. Pagano</i>	103
Fatigue Damage Mechanisms and Environmental Effects of the Long-Term Performance of Ceramic Matrix Composites <i>S. S. Lee, T. Nicholas, and L. P. Zawada</i>	117
