

Environmental Systems and Processes

Principles, Modeling, and Design

Walter J. Weber, Jr.

Contents

Preface	vii
1 Environmental Systems and Processes	1
2 Process and System Characterization	31
3 Process and System Modeling	61
4 Fluid Flow and Mass Transport	101
5 Elementary Process Equilibria	133
6 Process Energy Relationships	159
7 Elementary Process Rates	187
8 Complex Process Rates	223
9 Ideal System Modeling and Design	265
10 Hybrid System Modeling and Design	289
11 Nonideal System Modeling and Design	315
12 Multiphase Process Equilibria	349
13 Interfacial Process Equilibria	387
14 Passive Interphase Mass Transfer	415
15 Reactive Interphase Mass Transfer	449
16 Multiphase System Modeling and Design	479
Notation	521
Indices	537
