KONRAD F.W. MESSMER
MITCHELL P. FINK

JEAN-LOUIS VINCENT
SERIES EDITOR

Contents

List of Contributors	IX
----------------------------	----

Abbreviations	XIII
---------------------	------

Physiology of Oxygen Delivery

Role of the Cardiorespiratory System in Delivering Oxygen	3
<i>Michael R. Pinsky</i>	

Intraorgan Heterogeneity of Blood Flow, Oxygen Consumption and Tissue Oxygenation	14
<i>J.H.G.M. van Beek</i>	

The Microcirculation and Tissue Oxygenation	36
<i>Roland N. Pittman</i>	

Oxygen Distribution and Consumption by the Microcirculation and the Determinants of Tissue Survival	55
<i>Amy G. Tsai, H. Kerger, and Marcos Intaglietta</i>	

Oxygen Signaling Cascades in Mammalian Cells	63
<i>A. Görlach</i>	

Hypoxia and Its Consequences

Hypoxic Hypoxia	81
<i>Keith R. Walley</i>	

Circulatory Hypoxia	98
<i>Janice M. Marshall</i>	

Anemic Hypoxia	116
<i>P. Van der Linden</i>	

Cytopathic Hypoxia: Mitochondrial Dysfunction as a Potential Mechanism Contributing to Organ Failure in Sepsis	128
<i>Mitchell P. Fink</i>	

Poly (ADP-ribose) Synthetase Activation in Circulatory Shock	138
<i>Andrew L. Salzman</i>	

Cellular Responses to Hypoxia: Possible Relevance to Multiple Organ Failure in Critical Illness?	159
<i>Paul T. Schumacker and N.S. Chandel</i>	

The Mitochondrial Permeability Transition	174
<i>Andrew P. Halestrap</i>	

Measuring Tissue Oxygenation

The Available Clinical Tools – Oxygen-Derived Variables, Lactate, and pHi ...	193
<i>Jean-Louis Vincent</i>	

Microcirculatory Flows, Microcirculatory Responsiveness, Microcirculatory and Regional (Arteriolar/Venular) O ₂ Saturations	204
<i>Christopher G. Ellis</i>	

Monitoring the Systemic Circulation in Sepsis with Microelectrodes	226
<i>C.P. Winlove, M. Sair, and Timothy W. Evans</i>	

Oxygen Electrodes, Optode Microsensing, Near-Infrared Spectroscopy, Spectrophotometry	241
<i>M. Siegemund, M. van Iterson, and Can Ince</i>	

Blood and Blood Substitutes as Oxygen Carriers

The Optimal and Critical Hemoglobin in Health and Acute Illness	263
<i>D.R. Spahn</i>	

Hemoglobin-Based Artificial Oxygen Carriers (HBOC): Classification and Historical Overview	276
<i>G. Kemming, O. Habler, and Konrad F.W. Messmer</i>	

Hemoglobin Solutions: Effects on Tissue Oxygenation	291
<i>O. Habler and Konrad F.W. Messmer</i>	

Effect of Diaspirin Crosslinked Hemoglobin on Systemic and Regional Blood Circulation	307
<i>Anil Gulati</i>	

Blood Substitutes – Effects on the Microcirculation	318
<i>William J. Sibbald and A. Sielenkämper</i>	

Perfluorocarbons as Oxygen Carriers	332
<i>M. Lamy, M. Mathy-Hartert, and G. Deby-Dupont</i>	

Serum-Free Hemoglobin Increases Tumor Necrosis Factor Synthesis
and Lipopolysaccharide Lethality 352

K.J. Tracey

Enhancement of Tissue Oxygenation by Intracellular Introduction
of Inositol Hexaphosphate by Flow Electroporation of Red Blood Cells 357

Leo Einck and John W. Holaday

Subject Index 375
